New Deal For Death:

The Money Makers Eric Rauchway, 2015-10-27 With *The Money Makers* Eric Rauchway tells the absorbing story of how FDR and his advisors pulled the levers of monetary policy to save the domestic economy and propel the United States to unprecedented prosperity and superpower status Drawing on the ideas of the brilliant British economist John Maynard Keynes among others Roosevelt created the conditions for recovery from the Great Depression deploying economic policy to fight the biggest threat then facing the nation deflation Amazon com

Free Enterprise Lawrence B. Glickman, 2019-08-20 An incisive look at the intellectual and cultural history of free enterprise and its influence on American politics Throughout the twentieth century free enterprise has been a contested keyword in American politics and the cornerstone of a conservative philosophy that seeks to limit government involvement into economic matters Lawrence B Glickman shows how the idea first gained traction in American discourse and was championed by opponents of the New Deal Those politicians believing free enterprise to be a fundamental American value held it up as an antidote to a liberalism that they maintained would lead toward totalitarian statism Tracing the use of the concept of free enterprise Glickman shows how it has both constrained and transformed political dialogue He presents a fascinating look into the complex history and marketing of an idea that forms the linchpin of the contemporary opposition to government regulation taxation and programs such as Medicare

The American Presidents Melvin I. Urofsky, 2004-11-23 What makes a president great Here is the ideal source for students scholars and the general public *The American Presidents* is a collection of articles that analyze and evaluate the presidential careers of the men who have occupied the office since its inception in 1789 In this volume the leading presidential historians in the United States offer insights into what makes a president great mediocre or in the case of most of them something in between The contributors to *The American Presidents* were not asked to write straightforward biographies of the presidents other sources are available for that Rather they were asked to evaluate their subjects No strict patterns were imposed by the editor each author approached his or her subject in the way that best illustrated the strengths and weaknesses of the president under consideration Forty one have held the office of president and all in one way or another were exceptional men Some like Andrew Jackson and Harry Truman are usually thought of as representing the common folk but nothing was common about either of them Each proved to be an extraordinary and singular politician able to rally and represent the country through the challenges of their times Some presidents had achieved brilliance in other fields Ulysses Grant in the military and Herbert Hoover as an engineer and humanitarian for example but had presidencies that are considered unsuccessful What accounts for this seeming paradox in which insight sensitivity and competence suddenly become nontransferable when the man reaches the White House This book offers the reader multiple perspectives on this and other issues Examination of the ways in which challenges affect presidential greatness Theodore Roosevelt a successful president by any standard was acutely aware that the prosperity and peace the country enjoyed during his two

terms in office would ironically prevent him from reaching the upper tier of greatness enjoyed by Washington and Lincoln. After he left office he yearned to return in hope of finding the challenge that would seal his greatness. Earlier in the late nineteenth century the electorate placed competent men such as Rutherford B. Hayes, Grover Cleveland and Benjamin Harrison in the White House but they are little remembered today. None faced earth shaking challenges at home and abroad and their presidencies slipped into obscurity.

Discussion of personal characteristics and presidential performance: For more than two centuries the presidency has proved a remarkably durable institution. Presidential personalities have varied widely from the patrician aloofness of Washington to the moody introspection of Lincoln to the noisy exuberance of Theodore Roosevelt. The articles in *The American Presidents* consider the ways in which personality has affected performance.

Special features: 41 signed essays by the leading experts illustrated with portraits of the presidents. Selected bibliographies. At a glance summaries of each president's achievements. Useful charts and tables on cabinet members, first ladies and vice presidents from Washington to Clinton. Addresses and Web sites for major presidential libraries.

Sociopolitics of Migrant Death and Repatriation Krista E. Latham, Alyson J. O'Daniel, 2017-10-03. As scholars have by now long contended, global neoliberalism and the violence associated with state restructuring provide key frameworks for understanding flows of people across national boundaries and eventually into the treacherous terrains of the United States borderlands. The proposed volume builds on this tradition of situating migration and migrant death within broad systems level frameworks of analysis but contends that there is another perhaps somewhat less tidy but no less important sociopolitical story to be told here. Through examination of how forensic scientists define, navigate and enact their work at the frontiers of US policy and economics, this book joins a robust body of literature dedicated to bridging social theory with bioarchaeological applications to modern day problems. This volume is based on deeply and critically reflective analyses submitted by individual scholars wherein they navigate and position themselves as social actors embedded within and perhaps partially constituted by relations of power, cultural ideologies and the social structures characterizing this moment in history. Each contribution addresses a different variation on themes of power, relations, production of knowledge and reflexivity in practice. In sum, however, the chapters of this book trace relationships between institutions, entities and individuals comprising the landscapes of migrant death and repatriation and considers their articulation with sociopolitical dynamics of the neoliberal state.
