Dialectics and Deconstruction in Political Economy R. Albritton, 1999-06-08 Robert Albritton offers the most authoritative reassessment of Marxist political economy since Althusser Original reinterpretations of thinkers including Hegel Weber Althusser Derrida and Adorno cast new light on heated battles between Hegelian dialectics and deconstructivist criticism The book makes accessible the sometimes daunting thought associated with both dialectics and deconstruction drawing upon insights from philosophy sociology political science and critical theory Finding a non essentialist way of using the immense cognitive power of dialectics accepting a limited deconstruction but challenging further deconstructionist directions represents a major breakthrough for political economy

Economics Transformed Robert Albritton, 2007-05-20 Is Marx relevant Bringing to life the classic concepts in Marx's economic thought Robert Albritton shows that he offers great potential for study Deeply critical of the way economics is taught and studied today this is a textbook that will appeal to anyone who wants a forward thinking approach to the discipline that's free from the constraints of neo classical orthodoxy Taking up key aspects of Marx's work including surplus value theory dialectical

reasoning and the commodity form Albritton highlights their relevance in the modern world and explains why mainstream economics has been so blind to their revolutionary potential Written with style and clarity it is perfect for economics undergraduates *Against the Crisis* Ståle Holgersen,2024-11-26 If crisis defines our era we need a coherent socialist policy in response Stle Holgersen delves into today s economic and ecological crises to demonstrate that they are not exceptions to an otherwise functioning system but integral to its operation It is naive to see these upheavals as opportunities for reform or revolution They are the bedrock of the status quo Fortunately the vicious circle sustaining capitalism is not founded on an iron law Our historical mission in the face of the climate crisis is to create a historical exception to the rule It is time for ecosocialism against crisis Nietzsche's Political Economy Dmitri G. Safronov,2023-08-21 Safronov s Nietzsche s Political Economy is a pioneering appraisal of Nietzsche s critique of industrial culture and its unfolding crisis The author contends that Nietzsche remains unique in conceptualizing the upheavals of modern political economy in terms of the crisis of its governing values Nietzsche scrutinises the norms which not only preside over the unfathomable build up in debt the proliferation of meaningless impersonal slavery and the rise of increasingly repressive social control systems but inevitably set these precarious tendencies of modern political economy on a collision course liable to culminate in an unprecedented human and environmental catastrophe Safronov explores the core themes of Nietzsche s political economy debt slavery and the division of labour with reference to the influential views of Adam Smith and Karl Marx as well as against the backdrop of the Long Depression 1873 1896 the first truly international crisis of industrial capitalism during which most of Nietzsche s work was completed In Nietzsche s assessment modern political economy is predicated on the valuations that diminish humankind s prospects and harm the planet s future by consistently enfeebling the present as long as there is profit to be made from it Nietzsche s critical insight which challenges the most fundamental tenet of modern economics and finance is that in order to build a stronger and intrinsically more valuable future in lieu of simply speculating on it as though the liberal Promised Land could descend upon us like the manna from heaven at the wave of an invisible hand of the market it is necessary to walk from the future we dare to envisage resolutely back to the present we inhabit to determine what demands achieving such a vision would impose upon us instead of embellishing the here and now by cynically discounting the future to the net value of the present while disparaging disowning and rewriting the past to unburden ourselves of its troubling legacy as we continue to frivolously squander its capital to the alluring tunes of the sirens who in the marketplace sing to us of the future The enabling mechanism for changing our valuing perspectives Nietzsche tells us lies dormant in us and it must be unlocked before it is too late
