Dinosaur Systematics
Kenneth Carpenter, Philip J. Currie, 1992-07-31 In recent years dinosaurs have captured the attention of the public at an unprecedented scale At the heart of this resurgence in popular interest is an increased level of research activity much of

which is innovative in the field of palaeontology For instance whereas earlier palaeontological studies emphasized basic morphologic description and taxonomic classification modern studies attempt to examine the role and nature of dinosaurs as living animals More than ever before we understand how these extinct species functioned behaved interacted with each other and the environment and evolved Nevertheless these studies rely on certain basic building blocks of knowledge including facts about dinosaur anatomy and taxonomic relationships One of the purposes of this volume is to unravel some of the problems surrounding dinosaur systematics and to increase our understanding of dinosaurs as a biological species

Dinosaur Systematics presents a current overview of dinosaur systematics using various examples to explore what is a species in a dinosaur what separates genders in dinosaurs what morphological changes occur with maturation of a species and what morphological variations occur within a species
