## **New Directions In Austrian Economics:**

New Directions in Austrian Economics University College at Buckingham, Institute for Humane Studies, 1978 Papers presented at a symposium sponsored by the University College at Buckingham and the Institute for Humane Studies and held at Windsor Castle Sept 1976 Includes bibliographical references and index Austrian Economics: Tensions and New Directions Bruce J. Caldwell, Stephan Böhm, 2012-12-06 When we first invited the group of distinguished scholars represented here to contribute to a new volume on Austrian economics four themes were stressed tensions new directions selectivity and criticism In this brief introduction we will explain why those themes were emphasized and thereby shed light on our intentions and aspirations for the volume The subtitle Tensions and New Directions indicates clearly the intent of the volume desired If we take the 1871 publication of Carl Menger's Principles of Economics Grundsätze der Volkswirtschaftslehre as marking its birth the Austrian tradition is now well over one hundred years old The origins of the so called Austrian Revival are more difficult to pinpoint precisely but many would accept two decades as a reasonable estimate of its lifespan In any case since the mid 1970s several collections of articles written by Austrians have been published The intent of these collections appeared to be to educate persuade and inspire various audiences Uninformed readers needed to be told about the specifics of the Austrian position to be shown how it differed from and improved upon its rivals The initiated needed to be reassured that their commitment to a novel program was justified As such much of the recent Austrian literature has consisted either of exegetical accounts of the views of past figures or of critical assessments of the positions of alternative research programs in economics from an Austrian perspective **Information Technology and Socialist Construction** Daniel E. Saros, 2014-05-09 The failure of command central planning in the twentieth century has led to a general disillusionment within the socialist movement worldwide Some alternatives to capitalism have been proposed since the end of the Cold War but none has offered an alternative form of economic calculation This book explains how modern information technology may be used to implement a new method of economic calculation that could bring an end to capitalism and make socialism possible In this book the author critically examines a number of socialist proposals that have been put forward since the end of the Cold War It is shown that although these proposals have many merits their inability effectively to incorporate the benefits of information technology into their models has limited their ability to solve the problem of socialist construction The final section of the book proposes an entirely new model of socialist development based on a needs profile that makes it possible to convert the needs of large numbers of people into data that can be used as a guide for resource allocation This analysis makes it possible to rethink and carefully specify the conditions necessary for the abolition of capital and consequently the requirements for socialist revolution and ultimately communist society Information Technology and Socialist Construction will be of interest to students and scholars of political economy the history of economic thought labour economics and industrial economics Friedrich A. Hayek John Cunningham Wood, Robert D. Wood, 2004 Foundations of

Entrepreneurship and Economic Development David A Harper,2003-03-13 This well written book is the first to deal with entrepreneurship in all its aspects It considers the economic psychological political legal and cultural dimensions of entrepreneurship from a market process perspective David A Harper has produced a volume that analyses why some people are quicker than others in discovering profit opportunities Importantly the book also covers the issue of how cultural value systems orient entrepreneurial vision and in contrast to conventional wisdom the book argues that individualist cultural values are not categorically superior to group oriented values in terms of their consequences for entrepreneurial discovery

The Austro-Libertarian Point of View Alan G. Futerman,Walter E. Block,2021-11-01 This book covers several areas of economic theory and political philosophy from the perspective of Austrian Economics and libertarianism As such it deals with Epistemology and Methodology Microeconomics Macroeconomics Labor Economics International Economics Political Philosophy Law and Public Policy all from the Austro libertarian perspective Hence this book offers an integrated view of libertarianism and Austrian economics in the light of recent debates in the areas of economic science and political philosophy Moreover it builds from the foundations of the Austrian approach epistemology and methodology while the latter material deals with its application to the individual from the microeconomic perspective which in turn allows an exploration of subjects in macroeconomics Additionally this work applies Austro libertarianism to law politics and public policy Thus it offers a unified view of the entire approach in a logical progression allowing the readers to judge this perspective in full Futerman and Block say that their book is not a manual which I suppose it is not But it is a collection of highly pertinent essays from which you can understand what is mistaken in the orthodoxy of economics law and politics The central term of art in Austrian economics is that phrase human action It is the exercise of human will not the blind bumping of one molecule against another or one organism against another as in the physical sciences Futerman and Block distinguish Austrian economics as a scientific enterprise based on liberty of the will from libertarianism as an advocacy based on policies implied by such liberty Although Austrian economics is positive and libertarianism is normative they write this book shows how both are related how each can support the other Indeed they do Deirdre N McCloskey PhD UIC Distinguished Professor of Economics and of History Emerita Professor of English Emerita Professor of Communication Emerita University of Illinois at Chicago
