New Global Order A World Regional Geography:

World Regional Geography Michael J. Bradshaw, Richard A. Walasek, 1997 *The new global order* Michael John Bradshaw, 1998 The theme adopted as the title of this text focuses attention on the essentially geographic nature of the forces at work for change in the world including political economic cultural and environmental concerns and processes It shifts the emphasis from a cataloging of differences between unique parts of the world to a context of interlinked dependencies and explanations that might form a basis for positive and productive action It alerts readers to an expectation of change and encourages personal involvement with a changing and unequal world It also questions the extent to which global forces are able to override local and internal country factors Within the format of regional geographic studies there is a comprehensive coverage of basic geographic concepts and a reflection of current research themes in the subject Pref

World Regional Geography in the New Global Order David Bradshaw, 1999-07 This text focuses on the geographic nature of the forces at work for change in the world including political economic cultural and environmental aspects It emphasizes the dynamic nature of geographic regions in a changing world and the interdependence of the regions around the world rather than cataloging their differences It alerts readers to expect continuing change and encourages personal involvement with the changing world The author focuses initial attention on the developmental problems of the poorer countries instead of imposing a Western model of development that is uncritically applied to the rest of the world **New Global Order**
