Mediators and Drugs in Gastrointestinal Motility I, 2012-12-06 Since the exhaustive Handbook of Physiology Alimentary Canal Section 6 Motility edited by CHARLES F CODE in 1968 no complete survey of the morphological basis and the physiological control of intestinal motility has been published in spite of the enormous amount of new data in the literature on this topic. The new techniques and methodologies, the use of electron microscopy, radioimmunoassay and binding techniques as well as ever more sophisticated electrophysiological procedures have made possible a real flood of discoveries in this field. Moreover the possibility of new studies of the endocrine cells in biopsies of human intestinal mucosa even during routine endoscopies has opened new horizons for gastroenterologists and generated a number of important contributions to our knowledge of the morphology and physiopathology of the gut. As usual new discoveries have also revealed both ignorance and many new problems. For this reason although many of the data reported in this volume can be considered as firmly established others still require confirmation and the results of new research in this field are awaited with extreme interest. Since advances are occurring so rapidly even experts in the specific topics need frequent comprehensive reviews. To avoid an excessively large volume considerations of the pancreas, liver and biliary system were not included in this Handbook which nevertheless has attempted to offer the reader the essence of more than 1 500 papers. *Evidence Based Practices in Gastrointestinal & Hepatobiliary Surgery* Govind Nandakumar, 2017-03-22 Textbook of Hepatobiliary Gastrointestinal Surgery is an extensive illustrated evidence based review of complex liver and gastrointestinal surgery edited by gastrointestinal expert Govind Nandakumar based at Weill Cornell Medical College New York. Divided into 63 chapters the book begins with a chapter on minimally invasive and robotic oesophagectomy followed by overviews of oesophageal conditions requiring surgery. Subsequent chapters cover the surgical management of a broad range of disorders including Crohn's disease, colitis and several cancers affecting the hepatobiliary and gastrointestinal systems. Surgical techniques discussed include gastric bypass, banding and sleeve gastrectomy, liver and pancreas transplantation and a separate chapter on bariatric surgery in developing countries. Textbook of Hepatobiliary Gastrointestinal Surgery concludes with discussion on radiology techniques, pathology and nutrition for gastrointestinal patients and recovery after surgery. 638 full colour illustrations enhance this comprehensive resource for surgeons in training and in practice. Key Points Comprehensive guide
