New Macroeconomics Imperfect Markets And Policy Effectiveness:

The New Macroeconomics Huw David Dixon, Neil Rankin, 1995-10-19 Brings together leading researchers from the USA and Europe to examine the literature on the new macroeconomics

The Macroeconomics of Imperfect Competition and Nonclearing Markets Jean-Pascal Benassy, 2005-01-14 In this book Jean Pascal Benassy attempts to integrate into a single unified framework dynamic macroeconomic models reflecting such diverse lines of thought as general equilibrium theory imperfect competition Keynesian theory and rational expectations He begins with a simple microeconomic synthesis of imperfect competition and nonclearing markets in general equilibrium under rational expectations He then applies this framework to a large number of dynamic macroeconomic models covering such topics as persistent unemployment endogenous growth and optimal fiscal monetary policies The macroeconomic methodology he uses is similar in spirit to that of the popular real business cycles theory but the scope is much wider All of the models are solved by hand making the underlying economic mechanisms particularly clear

Macroeconomics and the Real World: Volume 2: Keynesian Economics, Unemployment, and Policy Roger E. Backhouse, Andrea Salanti, 2000-11-23 Since the middle of twentieth century economists have invested great resources into using statistical evidence to relate macroeconomic theories to the real world and many new econometric techniques have been employed In these two volumes a distinguished group of economic theorists econometricians and economic methodologists examine how evidence has been used and how it should be used to understand the real world Volume 1 focuses on the contribution of econometric techniques to understanding the macroeconomic world It covers the use of evidence to understand the business cycle the operation of monetary policy and economic growth A further section offers assessments of the overall impact of recent econometric techniques such as cointegration and unit roots Volume 2 focuses on the labour market and economic policy with sections covering the IS LM model the labour market new Keynesian macroeconomics and the use of macroeconomics in official documents in both the USA and EU These volumes will be valuable to advanced undergraduates graduate students and practitioners for their clear presentation of opposing perspectives on macroeconomics and how evidence should be used The chapters are complemented by discussion sections revealing the perspectives of other contributors on the methodological issues raised

Advances in Macroeconomic Theory J. Drèze, 2001-08-02 Leading world scholars analyze a range of specific departures from general equilibrium theory which have significant implications for the macroeconomic analysis of both developed and developing economies Jacques Drèze considers uncertainty and incomplete markets and Nobel Laureate Robert Solow relates growth theory to the macroeconomic framework Other issues examined are the implications for macro policy of new research including Joseph Stiglitz's warning on the misplaced zeal for financial market liberalization which partly engendered the East Asian and Russian crises

Disequilibrium, Growth and Labor Market Dynamics Carl Chiarella, Peter Flaschel, Gangolf Groh, Willi Semmler, 2013-06-29 In this book on disequilibrium growth and labor market dynamics we take predominantly a

macroeconomic perspective We present a working model that can easily be varied in different directions in order to subsume innovations in the literature on macroeconomics old and new and to contribute to important currently discussed macroeconomic issues Our working model is set up in a way that there is a close relationship between our presented dynamic models and modern macro econometric models with disequilibrium both in the labor and the goods markets One of our objectives is therefore to narrow the gap between theoretical and applied structural macrodynamic model building We hope that the book will be a useful reference for all researchers academic teachers and practitioners of macroeconomic and macro econometric model building who are interested in economic dynamics independently of whether they use equilibrium or disequilibrium methods in their own research We base this hope on the fact that our approach contains a number of unique features The emphasis on the identification and analysis of the basic feedback mechanisms at work in modern macro economies A detailed study of the partial as well as integrated dynamic interaction between these feedback mechanisms that constitute the interdependence of markets and sectors of the modern macro economy The relationship between the macroeconomic framework of our working model and the Walrasian Non Walrasian and New Keynesian reformulations of macroeconomics

Theory of Macroeconomic Policy Christopher Tsoukis, 2020-10-22 Theory of Macroeconomic Policy reviews the theoretical foundations of macroeconomic fiscal and monetary policy It offers a panoramic view of macroeconomic theory covering a wide range of topics that are not customarily dealt with in macroeconomics texts as well as more standard material Advanced theory is bridged with more elementary or intermediate material and established models are reviewed alongside current research directions There is an extensive review of empirical evidence on virtually every topic supplemented by narrative accounts for various episodes The policy implications of the various theories are emphasised throughout The chapters are largely self contained so that different courses can focus at different places A Guidance for Further Study Section and extensive bibliography give plenty of ideas for all levels of independent study from Undergraduate Projects to MSc Dissertations to PhD Theses Theory of Macroeconomic Policy presents a balance between breadth as well as depth analytical treatment and intuition theory and evidence vintage theories and current directions theory and policy established theory and debate Theory of Macroeconomic Policy is an affirmation that there is a well developed body of theory that is invaluable for an in depth understanding of the macro economy and policy equally there is much scope for critical discussion and debate

Structural Reform and Macroeconomic Policy R. Solow, 2004-06-29 The relation between structural reform and macroeconomic policy underlies the widespread perception that the large European economies have under performed in the past decade in comparison both with their own standards and with the contemporaneous performance of the United States This book edited and introduced by Noel Laureate Robert M Solow provides analyses of how these economies could take a co ordinated and simultaneous approach to reform in labour and product markets and the demand side

Dynamic Macroeconomics with Imperfect Competition Leo Kaas, 2012-12-06 This thesis was stimulated throughout the time of my participation in a research project on Dynamic Macroeconomics supported by the German Research Foundation DFG The starting point was the central question of how to integrate price setting firms in a dynamic disequilibrium model Almost all recent literature on imperfect competition

in macroeconomics applies the objective demand approach by assuming that firms know the true demand curve they are faced with. While this approach can be applied in temporary monetary equilibrium models, it proves inadequate for formulating price adjustment in a dynamic disequilibrium model where it has to be replaced by the concept of subjective demand. Based on this distinction, the thesis starts out with a comparison of the concepts of subjective and objective demand in an abstract framework and surveys the literature on general equilibrium theory with imperfect competition. The objective demand approach is criticized not only on the grounds of its strong rationality requirements and existence problems but also by the observation that it cannot be applied successfully to characterize determinate rational expectations equilibria in intertemporal macroeconomics. Finally, price setting firms using subjective demand functions are integrated in a dynamic disequilibrium model in order to study monopolistic and oligopolistic price adjustment.
