Ukens,2007-12-19 The What Would You Do game contains eight decision making scenarios For each scenario players have to decide whether to take a collaborative or competitive road scoring points for each of several rounds Points are based on

how an individual's choice compares with those of the other players in the group. At the end of the game, players compare their decisions with the other players. The first scenario mirrors the original Prisoner's Dilemma: two prisoners are captured and brought in for questioning. Each has to decide whether to collaborate, which results in a lighter sentence, or save their own skin, which results in no punishment for one prisoner and a heavy sentence for the other. Each of the next seven scenarios introduces additional problems that turn up the heat and force the participants to make increasingly difficult ethical decisions.
