The New Epoch as Developed by the Manufacture of Power George Shattuck Morison, 2023-07-18 This book is a visionary work that explores the role of power in shaping the future of humanity Morrison believes that the development of new sources of power will usher in a new epoch transforming society in ways we cannot even imagine Drawing on cutting edge scientific research and his own extensive experience in industry Morrison paints a vivid picture of a world where energy is plentiful and cheap and where technology has unlocked new frontiers of human achievement This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work is in the public domain in the United States of America and possibly other nations Within the United States you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work Scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public We appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant

The Religion of Technology David F. Noble, 2013-01-23 Arguing against the widely held belief that technology and religion are at war with each other David F Noble s groundbreaking book reveals the religious roots and spirit of Western technology It links the technological enthusiasms of the present day with the ancient and enduring Christian expectation of recovering humankind s lost divinity Covering a period of a thousand years Noble traces the evolution of the Western idea of technological development from the ninth century when the useful arts became connected to the concept of redemption up to the twentieth when humans began to exercise God like knowledge and powers Noble describes how technological advance accelerated at the very point when it was invested with spiritual significance By examining the imaginings of monks explorers magi scientists Freemasons and engineers this historical account brings to light an other worldly inspiration behind the apparently worldly endeavors by which we habitually define Western civilization Thus we see that Isaac Newton devoted his lifetime to the interpretation of prophecy Joseph Priestley was the discoverer of oxygen and a founder of Unitarianism Freemasons were early advocates of industrialization and the fathers of the engineering profession Wernher von Braun saw spaceflight as a millenarian new beginning for humankind The narrative moves into our own time through the technological enterprises of the last half of the twentieth century nuclear weapons manned space exploration Artificial Intelligence and genetic engineering Here the book suggests that the convergence of technology and religion has outlived its usefulness that though it once contributed to human well being it has now become a threat to our survival Viewed at the dawn of the new millennium the technological means upon which we have come to rely for the preservation and enlargement of our lives betray an increasing impatience with life and a disdainful disregard for mortal needs David F Noble thus contends that we must collectively strive to disabuse ourselves of the inherited religion of technology and begin rigorously to re examine our enchantment with unregulated technological advance **Gaither's**
