New Goose:

Head First Design Patterns Eric Freeman, Elisabeth Robson, Bert Bates, Kathy Sierra, 2004-10-25 What's so special about design patterns? At any given moment someone struggles with the same software design problems you have. And chances are someone else has already solved your problem. This edition of Head First Design Patterns now updated for Java 8 shows you the tried and true road-tested patterns used by developers to create functional, elegant, reusable, and flexible software. By the time you finish this book, you'll be able to take advantage of the best design practices and experiences of those who have fought the beast of software design and triumphed. What's so special about this book? We think your time is too valuable to spend struggling with new concepts. Using the latest research in cognitive science and learning theory to craft a multi-sensory learning experience, Head First Design Patterns uses a visually rich format designed for the way your brain works, not a text-heavy approach that puts you to sleep. **IEC 61850: Digitizing the Electric Power Grid** Alexander Apostolov, 2022-10-31 This book covers the digitalization of the grid from a practical point of view and helps you understand the principles used in the development of the standard and its multiple benefits of how they can help in all aspects of the specialists' everyday work. The book demonstrates that the IEC 61850 standard is a new communications protocol and a completely new engineering environment using named data objects and attributes that support the interoperability between multifunctional devices from different manufacturers integrated in protection, automation, and control systems. It highlights the contribution of the standard in introducing high-speed peer-to-peer communications that support different substation and wide-area protection and automation-related applications. You will be introduced to the different parts of the standard and their evolution from a substation-centered approach towards its expansion targeting the coverage of the different domains of the smart grid. It approaches the subject from a practical point, utilizing an expert's years of experience. It provides numerous examples of the application of the standard for protection, automation, and control in smart grid. This is an excellent resource for utility specialists and researchers developing protection, automation, and control devices in systems based on the standard and by consultants helping with the implementation of the standard in different projects. **Merchant Vessels of the United States**, 1989 **Cara Mudah UN 09 B.Ing SMP/MTs**, *Lorine Niedecker* Lorine Niedecker, 2002 This volume presents all of Lorine Niedecker's surviving poetry, plays, and creative prose in the sequence of their composition. It includes many poems previously unpublished in book form and all of Niedecker's surviving 1930s surrealist work. **Annual Report of the Ohio State Board of Agriculture** Ohio State Board of Agriculture, 1914 Reports for 1862-66 include reports of the Ohio Pomological Society. **Currants and Gooseberries** Albert Hugh Bryan, Alfred R.
