Researchers and providers are beginning to recognize the impending ethnogeriatric imperative as the number of elders from diverse ethnic and cultural backgrounds continues to rise. Ethnicity and the Dementias offers invaluable background information in this area while also examining how those suffering from dementia and their family members respond or adapt to the challenges that follow. Thoroughly updated and revised from the first edition the book features contributions from leading clinicians and researchers on the epidemiology of dementias by ethnic population, new information on the assessment of diverse populations and updates and inclusions of new populations in the management of dementia and working with families. The book is ideal for practitioners, researchers and policy makers in search of the most current ethnogeriatric findings.

Caregiving Across the Lifespan Ronda C. Talley, Lydia LaGue, 2012-12-22

Most scholars do not consider the long term nature of caregiving but rather focus on a specific developmental period e.g. old age or a specific disability e.g. cancer. Yet the most important lessons about caregiving may occur at any age regardless of disabilities or other limitations. Caregiving is a lifelong process. It begins in a mother's womb, continues throughout the lifespan and ends after death. *Caregiving Across the Lifespan* emphasizes caregiving as a process that occurs throughout one's life. It discusses infant care, the developmental needs of children and adolescents, the many caregiving issues in adulthood and mid life and finally end of life care and bereavement. Key coverage includes: Examining caregiving issues across a developmental perspective; Caregiving from infancy through early childhood through end of life; Mid life and multigenerational bonds and responsibilities; Caregiver identity in older adults; Family caregiving at the end of life. This must have volume offers a wealth of insights and ideas for researchers, practitioners and graduate students across the caregiving fields including psychology, social work, public health, geriatrics and gerontology and medicine as well as public and education policy makers.
