People And Wildlife Conflict Or Co Existence:

People and Wildlife, Conflict or Co-existence? Rosie Woodroffe, Simon Thirgood, Alan Rabinowitz, 2005-08-25 Human wildlife conflict is a major issue in conservation As people encroach into natural habitats and as conservation efforts restore wildlife to areas where they may have been absent for generations contact between people and wild animals is growing Some species even the beautiful and endangered can have serious impacts on human lives and livelihoods Tigers kill people elephants destroy crops and African wild dogs devastate sheep herds left unattended Historically people have responded to these threats by killing wildlife wherever possible and this has led to the endangerment of many species that are difficult neighbours The urgent need to conserve such species however demands coexistence of people and endangered wildlife This book presents a variety of solutions to human wildlife conflicts including novel and traditional farming practices offsetting the costs of wildlife damage through hunting and tourism and the development of local and national policies **People and**

Wildlife Rosie Woodroffe, Simon Thirgood, Alan Rabinowitz, 2008 Human-Wildlife Interactions Beatrice Frank, Jenny A. Glikman, Silvio Marchini, 2019-05-02 Presents solutions to turn conflict into tolerance and coexistence with an emphasis on the human dimensions of human wildlife interactions **People and Wildlife, Conflict or Co-existence?** Rosie

Woodroffe, Simon Thirgood, Alan Rabinowitz, 2005-08-25 As humans continue to encroach into natural habitats and conservation efforts restore wildlife to areas where they have been absent contact between humans and wild animals is growing Some species even the endangered can have serious impacts on human lives and livelihoods Tigers kill people elephants destroy crops and African wild dogs devastate sheep herds left unattended This book presents a variety of solutions to human wildlife conflicts including novel and traditional farming practices controlled hunting and tourism as well as the development of local and national conservation policies **People and Predators** Defenders of Wildlife, 2012-06-22 Carnivores provide innumerable ecological benefits and play a unique role in preserving and maintaining ecosystem services and function but at the same time they can create serious problems for human populations A key question for conservation biologists and wildlife managers is how to manage the world s carnivore populations to conserve this important natural resource while mitigating harmful impacts on humans In People and Predators leading scientists and researchers offer case studies of human carnivore conflicts in a variety of landscapes including rural urban and political The book covers a diverse range of taxa geographic regions and conflict scenarios with each chapter dealing with a specific facet of human carnivore interactions and offering practical concrete approaches to resolving the conflict under consideration Chapters provide background on particular problems and describe how challenges have been met or what research or tools are still needed to resolve the conflicts People and Predators will helps readers to better understand issues of carnivore conservation in the 21st century and provides practical tools for resolving many of the problems that stand between us and a future in which carnivores fulfill their historic ecological roles **Planning and decision-making in human-wildlife conflict and**

Understanding Coexistence with Wildlife Simon Pooley,John D. C. Linnell,Ursula Münster,Thom van Dooren,Alexandra Zimmermann,2022-03-25 **Tarangire: Human-Wildlife Coexistence in a Fragmented Ecosystem** Christian Kiffner,Monica L. Bond,Derek E. Lee,2022-04-22 This edited volume summarizes multidisciplinary work on wildlife conservation in the Tarangire Ecosystem of northern Tanzania By drawing together human centered wildlife centered and interdisciplinary research this book contributes to furthering our understanding of the often complex mechanisms underlying human wildlife interactions in dynamic landscapes By synthesizing the wealth of knowledge generated by anthropologists ecologists conservationists entrepreneurs geographers sociologists and zoologists over the last decades this book also highlights practicable and locally adapted solutions for shaping human wildlife interactions towards coexistence Readers will discover the reciprocal and often unexpected direct and indirect dynamics between people and wildlife While boundaries e g between people and wildlife between protected and un protected areas and between different groups of people are a common theme throughout the different chapters this book stresses the commonalities links and synergies between seemingly disparate disciplines opinions and conservation approaches The chapters are divided into clear sections such as the human dimension the wildlife dimension and human wildlife interactions representing a detailed summary of anthropological ecological and interdisciplinary research projects that have been conducted in the Tarangire Ecosystem over the last decades Beyond this work contributes to the debate about land sharing versus land sparing and provides an in depth case study for understanding the complexities associated with human wildlife coexistence in one of the few remaining ecosystems that supports migratory populations of large mammals The topic of this book is particularly relevant for students scholars and practitioners who are interested in reconciling the needs of human populations with those of the environment in general and large mammal populations in particular Introduction to Human-Animal Interaction Laëtitia Maréchal,Emile Zee,2024-01-29 Introduction to Human Animal Interaction focuses on the human dimension of interacting with other animals This book introduces recent developments theories and debates in the relatively new research area of Human Animal Interaction HAI and focuses on the social and life sciences aspect of these interactions Experts from different academic disciplines provide an overview for students and professionals interested in how humans and other animals interact and what advantages and disadvantages emerge for both parties in this relationship The book starts with the theories and mechanisms supporting our interactions with animals such as human animal communication and it then covers the implications of HAI in terms of ethics and welfare After discussing cultural differences and forensic aspects in human animal interaction e g wildlife crime and animal abuse the book examines evidence in the area of animal assisted intervention The final chapters give an overview of current research in specific human animal interaction systems human pet human livestock and human wildlife interaction The book offers a scientific evidence based perspective on human animal interaction providing pedagogical tools

to make a systematic critical and constructive evaluation of research in HAI possible It offers a range of in text pedagogical features like a subject index chapter MCQs open questions further reading and additional digital resources including videos which are accessible via QR codes or through the associated website This textbook provides the fundamental tools for achieving a comprehensive current and critical overview of the HAI field and is an integral text for undergraduate and postgraduate students undertaking modules in human animal interaction in social sciences such as anthropology cultural studies criminology ethics and laws or in life sciences such as animal behaviour conservation and welfare biology neuroscience physiology psychology public health and those studying veterinary science

Protecting the Wild George Wuerthner,Eileen Crist,Tom Butler,2015-02-19 Protected natural areas have historically been the primary tool of conservationists to conserve land and wildlife These parks and reserves are set apart to forever remain in contrast to those places where human activities technologies and developments prevail But even as the biodiversity crisis accelerates a growing number of voices are suggesting that protected areas are pass Conservation they argue should instead focus on lands managed for human use working landscapes and abandon the goal of preventing human caused extinctions in favor of maintaining ecosystem services to support people If such arguments take hold we risk losing support for the unique qualities and values of wild undeveloped nature Protecting the Wild offers a spirited argument for the robust protection of the natural world In it experts from five continents reaffirm that parks wilderness areas and other reserves are an indispensable albeit insufficient means to sustain species subspecies key habitats ecological processes and evolutionary potential Using case studies from around the globe they present evidence that terrestrial and marine protected areas are crucial for biodiversity and human well being alike vital to countering anthropogenic extinctions and climate change A companion volume to Keeping the Wild Against the Domestication of Earth Protecting the Wild provides a necessary addition to the conversation about the future of conservation in the so called Anthropocene one that will be useful for academics policymakers and conservation practitioners at all levels from local land trusts to international NGOs

Primates of Gashaka Volker Sommer,Caroline Ross,2010-11-23 The Gashaka Primate Project has grown into one of the largest research and conservation activities in West Africa At present it keeps going on the initiative of the editors of this volume and their academic home institutions The appearance of this volume marks the 10th anniversary of the Gashaka Primate Project

Wildlife Biodiversity Conservation Susan C. Underkoffler, Hayley R. Adams,2021-06-26 This book addresses the multidisciplinary challenges in biodiversity conservation with a focus on wildlife crime and how forensic tools can be applied to protect species and preserve ecosystems Illustrated by numerous case studies covering different geographical regions and species the book introduces to the fundamentals of biodiversity conflicts outlines the unique challenges of wildlife crime scenes and reviews latest techniques in environmental forensics such as DNA metagenomics In addition the volume explores the socio economic perspective of biodiversity protection and provides an overview of national and international conservation laws The field of

conservation medicine stresses the importance of recognizing that human health animal health and ecosystem health are inextricably interdependent and the book serves as important contribution towards achieving the UN Sustainable Developmental Goals in particular SDG 15 Life on Land The book addresses graduate students scientists and veterinary professionals working in wildlife research and conservation biology An Introduction to Primate Conservation Serge A. Wich, Andrew J. Marshall, 2016 This book provides a comprehensive and state of the art synthesis of research principles and applied management practices for primate conservation **Frontiers in Conservation Science - Highlights From Its First Year** Daniel T. Blumstein, 2022-03-25 **Applied Ecology and Human Dimensions in Biological Conservation** Luciano M. Verdade, Maria Carolina Lyra-Jorge, Carlos I. Piña, 2014-05-12 This book provides both the conceptual basis and technological tools that are necessary to identify and solve problems related to biodiversity governance The authors discuss intriguing evolutionary questions which involve the sometimes surprising adaptive capacity of certain organisms to dwell in altered and or changing environments that apparently lost most of their structure and functionality Space and time heterogeneities are considered in order to understand the patterns of distribution and abundance of species and the various processes that mold them The book also discusses at which level from genes to the landscape including individuals populations communities and ecosystems men should intervene in nature in order to prevent the loss of biodiversity *Elgar Concise Encyclopedia of Animal Law* Joan E. Schaffner, 2025-07-15 With contributions from over 135 international experts this Encyclopedia provides an expansive overview of the emerging field of animal law Focusing on the legal regulation of human interactions with non human animals the volume serves as an insightful guide to how the law can promote the wellbeing of animals as well as the environment **Key Topics in Conservation Biology 2** David W. Macdonald, Katherine J. Willis, 2013-02-06 Following the much acclaimed success of the first volume of Key Topics in Conservation Biology this entirely new second volume addresses an innovative array of key topics in contemporary conservation biology Written by an internationally renowned team of authors Key Topics in Conservation Biology 2 adds to the still topical foundations laid in the first volume published in 2007 by exploring a further 25 cutting edge issues in modern biodiversity conservation including controversial subjects such as setting conservation priorities balancing the focus on species and ecosystems and financial mechanisms to value biodiversity and pay for its conservation Other chapters setting the framework for conservation address the sociology and philosophy of peoples relation with Nature and its impact on health and such challenging practical issues as wildlife trade and conflict between people and carnivores As a new development this second volume of Key Topics includes chapters on major ecosystems such as forests islands and both fresh and marine waters along with case studies of the conservation of major taxa plants butterflies birds and mammals A further selection of topics consider how to safeguard the future through monitoring reserve planning corridors and connectivity together with approaches to reintroduction and rewilding along with managing wildlife disease A final chapter by the editors synthesises thinking on the relationship between

biodiversity conservation and human development Each topic is explored by a team of top international experts assembled to bring their own cross cutting knowledge to a penetrating synthesis of the issues from both theoretical and practical perspectives The interdisciplinary nature of biodiversity conservation is reflected throughout the book Each essay examines the fundamental principles of the topic the methodologies involved and crucially the human dimension In this way Key Topics in Conservation Biology 2 like its sister volume Key Topics in Conservation Biology embraces issues from cutting edge ecological science to policy environmental economics governance ethics and the practical issues of implementation Key Topics in Conservation Biology 2 will like its sister volume be a valuable resource in universities and colleges government departments and conservation agencies It is aimed particularly at senior undergraduate and graduate students in conservation biology and wildlife management and wider ecological and environmental subjects and those taking Masters degrees in any field relevant to conservation and the environment Conservation practitioners policy makers and the wider general public eager to understand more about important environmental issues will also find this book invaluable

Handbook on Tourism and Conservation Joseph E. Mbaiwa, Oluwatoyin D. Kolawole, Wame L. Hambira, Emmanuel Mogende, 2023-11-03 The Handbook on Tourism and Conservation demonstrates the intrinsic nexus between tourism the environment and sustainable natural resources use It applies Ostrom's social ecological systems SESs theory as the analytical framework for reaching a consensus on divergent viewpoints within the context of global environmental change and emerging governance issues *The Food Security, Biodiversity, and Climate Nexus* Mohamed Behnassi, Himangana Gupta, Mirza Barjees Baig, Ijaz Rasool Noorka, 2022-10-20 This volume is the outcome of an international cooperation between 73 scientists experts and practitioners from many countries disciplines and professional areas As a part of a series of CERES publications the volume attempts to contribute to the scientific debate about the food biodiversity climate nexus by developing a comprehensive region specific and broader global understanding of the linkages between these areas especially in the context of Global South Instead of providing only modern science based solutions for the nexus related challenges the volume covers case studies that present mixed solutions offering the use of traditional ecological knowledge in combination with modern science for both resilience and sustainability This is increasingly instrumental in shaping the needed response options regarding the economic social and environmental future of the world Based on a multi regional and cross sectoral analysis the approach consists of assessing the different natural and anthropogenic factors currently affecting ecosystems and their services especially the impacts of climate change highlighting the different linkages between the state of biodiversity and food systems in many contexts and scales and exploring the various response mechanisms to effectively manage the implications of such linkages Most chapters provide inputs for future relevant research and policy agendas

Problematic Wildlife Francesco M. Angelici, 2015-12-18 This book provides insight into the instances in which wildlife species can create problems Some species trigger problems for human activities but many others need humans to save them

and to continue to exist The text addresses issues faced by economists and politicians dealing with laws involving actions undertaken to resolve the problems of the interaction between humans and wildlife Here the words problematic species are used in their broadest sense as may be appreciated in the short introductions to the various sections At times the authors discuss special cases while always extending the discussion into a more general and broad vision At others they present real cutting edge analysis of ecological topics and issues The book will be of interest to biologists ecologists and wildlife managers involved in research on wildlife parks and environmental management as well as to government departments and agencies NGOs and conservation wildlife organizations Even those in contact with nature such as hunters herders and farmers will be able to find a great deal of important information Specific case studies are selected from among the most significant and prevalent cases throughout the world A total of 26 papers have been selected for this book written by zoologists biologists and ecologists Many have an interdisciplinary approach with contributions by economists criminologists technical specialists and engineers
