Public Opinion and Nuclear Weapons Catherine Marsh, Colin Fraser, 1989      *Public Opinion and Nuclear Energy* Stanley M. Nealey, Barbara D. Melber, William L. Rankin, 1983      *Energy, the Environment, and Public Opinion* Eric R. A. N. Smith, 2002 Using the state of California as a model Eric Smith explores how much the public understands energy policy what the public wants officials to do about U S energy problems and how governments will cope with energy shortages in the future

**Public Opinion on Nuclear Energy and Nuclear Weapons** Jonathon Baron, 2020 Does a lack of enthusiasm for nuclear energy among the US public relate to connections with nuclear weapons The United States is projected to decline as the global leader in nuclear power production due to stagnation in the industry Alongside this trend US public skepticism of nuclear energy has remained high for decades Policymakers industry and pro and anti nuclear advocates must understand these attitudes given electricity needs energy sector competition and climate change Existing scholarship explains public opinion on nuclear power by comparing its economic and environmental desirability with other energy sources Yet a critical area of public opinion remains understudied the connection between nuclear energy and nuclear weapons Scholars have theorized such a relationship in the public consciousness but the premise has not been systematically investigated Two studies examine this theoretical linkage Study 1 uses a nationally representative US survey experiment n 904 to validate that public attitudes toward civilian and military nuclear technologies are indeed related Study 2 uses an exploratory survey experiment n 1 003 to show that persuasive information about each technology affects opinion about the other These studies provide evidence of psychological linkage In fact attitudes toward nuclear weapons may even drive those on nuclear energy

Energy Security in Japan Vlado Vivoda,2016-04-29 For a country already uneasy about energy security the 2011 earthquake and tsunami which caused a nuclear catastrophe at the Fukushima nuclear power plant turned pre existing Japanese concern about the availability of energy into outright anxiety The subsequent closure of many nuclear reactors meant Japan needed to replace lost power quickly and so had no choice but to secure additional fossil fuels undermining Japanese diversification policy and increasing global and regional competition for energy This switch has been at a cost to the already weak Japanese economy whilst the increase in fossil fuel consumption has caused a significant increase in greenhouse gas emissions In this book Vlado Vivoda examines the drastically changed environment following the disaster in order to analyse Japan s energy security challenges and evaluate Tokyo s energy policy options Looking at how the disaster exacerbated Japan s existing energy security challenges Vivoda considers the best policy options for Japan to enhance national energy security in the future exploring the main impediments to change and how they might be overcome
