**Law and Development in East and South-East Asia** Christoph Antons, 2005-10-05 During the 1980s and 1990s Asian developmental states attracted much attention in political science and economics literature but the role of law in the economic development was neglected It was only after the Asian crisis of 1997 that many analysts began to focus on a lack of regulation and transparency as a major factor triggering the crisis The crucial questions now are how successful the current reforms will be and which features of the Asian approach to commercial law will be resistant to reform pressures This book examines the prospects for commercial law reform in Asia giving particular attention to Japan and Singapore as frequently cited role models for Asian developmentalism and also examining development related business laws in countries such as China Korea Indonesia Malaysia Vietnam and the Philippines

**Health Insurance Reforms in Asia** Sabrina Ching Yuen Luk, 2014-03-26 This book empirically examines health care financing reforms and popular responses in three major cities in East Asia Shanghai Singapore and Hong Kong It adopts a new revised version of the theory of historical institutionalism to compare and explain the divergent reform paths in these three places over the past three decades It also examines forces that propel institutional change The book provides three detailed case studies on the development of health care financing reforms and the politics of implementing them It shows that health care systems in Shanghai Singapore and Hong Kong were the products of Western presence in the nineteenth century It illustrates how greater attention is paid to the roles played by ideas actors and environmental triggers without abandoning the core assumptions that political institutions and policy feedback remain central to impact health care financing reforms It shows that health care financing reform is shaped by a complex interplay of forces over time It also provides the most updated material about health care

financing reforms in Shanghai Singapore and Hong Kong The central argument of this book is that health care financing reform is both an evolving process responding to changing circumstances and a political process revealing an intricate interplay of power relationships and diverse interests It shows that institutional changes in health care financing system can be incremental but transformative in nature It argues that social policies will continue to develop and welfare states will continue to adapt and evolve in order to cope with new risks and needs This book sheds new lights on understanding the politics of health care financing reform and sources and modes of institutional change **Public Policies in Singapore**
