Wilson, Joan Petersilia, 2011 Crime in the United States has fluctuated considerably over the past thirty years as have the policy approaches to deal with it During this time criminologists and other scholars have helped to shed light on the roles of incarceration prevention drugs guns policing and numerous other aspects to crime control Yet the latest research is rarely heard in public discussions and is often missing from the desks of policymakers This book summarizes the latest scientific information on the causes of crime and the evidence about what does and does not work to control it As with previous editions each essay reviews the existing literature discusses the methodological rigor of the studies identifies what policies and programs the studies suggest and then points to policies now implemented that fail to reflect the evidence The chapters cover the principle institutions of the criminal justice system juvenile justice police prisons probation and parole sentencing how broader aspects of social life inhibit or encourage crime biology schools families communities and topics currently generating a great deal of attention criminal activities of gangs sex offenders prisoner reentry changing crime rates *Crime and Criminal Justice* John A. Gardiner, Michael A. Mulkey, 1975 Criminal Justice James P. Levine, Michael C. Musheno, Dennis J. Palumbo, 1980 Concentrating on the conflicts of interest among criminal justice system components between the public and its perception of crime and among policymakers this analysis promotes new public policy directions First an analysis of crime criminals and the criminal justice system provides a perspective to help distinguish myths about ideal system operation from the reality of its functioning This conceptual framework focuses on the conflicting priorities of private motives and public interests perceptions and misconceptions of crime theories about what constitutes a criminal and the implementation of criminal justice policy from these perceptions The workings of each of the major components of the criminal justice system are then examined with attention to the real roles and interests of the police lawyers attorneys and the defense counsel the courts and corrections

Interests and goals that are prime points of conflict between these components are detailed as is the impact of these conflicts on law enforcement and crime Third four policies currently being used in the U S to deal with crime are explored deterrence rehabilitation decriminalization and diversion Attempts are made to fit each policy into its historical beginning and to highlight reasons for its emerging as an important policy each policy s assumptions about the nature of crime and the nature of criminals are discussed Finally processes for assessing policies and their impact on society and crime are presented the processes are evaluated for advantages and pitfalls Evaluations of research designed to assess policies then lead to proposals for improving criminal justice policy
