**Public Policy to Reduce Inequalities across Europe** Paul Cairney,Michael Keating,Sean Kippin,Emily St Denny,2022-07-28 This is an open access title available under the terms of a CC BY NC ND 4.0 International licence It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations There is a broad consensus across European states and the EU that social and economic inequality is a problem that needs to be addressed Yet inequality policy is notoriously complex and contested This book approaches the issue from two linked perspectives First a focus on functional requirements highlights what policymakers think they need to deliver policy successfully and the gap between their requirements and reality We identify

this gap in relation to the theory and practice of policy learning and to multiple sectors to show how it manifests in health education and gender equity policies Second a focus on territorial politics highlights how the problem is interpreted at different scales subject to competing demands to take responsibility This contestation and spread of responsibilities contributes to different policy approaches across spatial scales We conclude that governments promote many separate equity initiatives across territories and sectors without knowing if they are complementary or contradictory This outcome could reflect the fact that ambiguous policy problems and complex policymaking processes are beyond the full knowledge or control of governments It could also be part of a strategy to make a rhetorically radical case while knowing that they will translate into safer policies It allows them to replace debates on values regarding whose definition of equity matters and which inequalities to tolerate with more technical discussions of policy processes Governments may be offering new perspectives on spatial justice or new ways to reduce political attention to inequalities

**Ethical Competencies for Public Leadership** David Bromell, 2019-10-31 This book identifies six ethical competencies for public leadership in contexts of pluralism While diversity in proximity generates conflict where people want and value different things the right kind of leadership and the right kind of politics can minimise domination humiliation cruelty and violence Written by a public policy advisor for fellow practitioners in politics and public life this book applies political theory and social ethics to identify a set of competencies being civil diplomatic respectful impartial fair and prudent to keep ethics at the centre of a pluralist democratic politics The six competencies are described in behavioural terms as personal resolutions They offer valuable tools for mentoring and professional development This book will appeal to politicians and those who advise them and anyone who engages in or aspires to public leadership whether in the public sector the

private sector the community and voluntary sector or academia      Market Failure, Government Failure, Leadership and Public Policy B. Dollery, J. Wallis, 1999-07-19 A global wave of reform is fundamentally reshaping the role of the state in national economies This book provides a fresh and accessible perspective on the political economy of this megatrend It traces the theoretical roots of the reforms to developments in public economics which emphasize problems of government rather than market failure It then breaks new ground in developing an economic theory of leadership to explain how policy leadership networks can strive to influence the direction of reform processes
