Making Security Social Greg Eghigian, 2016-04-06 While welfare has been subject to pronounced criticism throughout the twentieth century social insurance has consistently enjoyed the overwhelming support of European policy makers and citizens This volume argues that the emergence of social insurance represents a paradigmatic shift in modern understandings of health work political participation and government By institutionalizing compensation social insurance transformed it into a right that the employed population quickly came to assume Theoretically informed and based on intensive archival research on disability insurance records most of which have never been used by historians the book considers how social science and political philosophy combined to give shape to the idea of a social insurance in the nineteenth century the process by which social insurance gave birth to modern notions of disability and rehabilitation and the early twentieth century development of political action groups for the disabled Most earlier histories of German social insurance have been legislative histories that stressed the system's coercive features and functions Making Security Social by contrast emphasizes the administrative practices of everyday life the experience of consumers and the ability of workers not only to resist but to transform social insurance bureaucracy and political debate It thus demonstrates that social insurance was pivotal in establishing a general attitude of demand claim and entitlement as the primary link between the modern state and those it governed In addition to historians of Germany Making Security Social will attract researchers across disciplines who are concerned with public policy disability studies and public health Greg Eghigian is Associate Professor of History Penn State University

Work, Race, and the Emergence of Radical Right Corporatism in Imperial Germany Dennis Sweeney, 2010-02-24

In the late nineteenth and early twentieth centuries the Saar river valley was one of the three most productive heavy industrial regions in Germany and one of the main reference points for national debates over the organization of work in large scale industry Among Germany's leading opponents of trade unions Saar employers were revered for their system of factory organization which was both authoritarian and paternalistic stressing discipline and punitive measures and seeking to regulate behavior on and off the job In its repressive and beneficent dimensions the Saar system provided a model for state labor and welfare policy during much of the 1880s and 1890s Dennis Sweeney examines the relationship between labor relations in heavy industry and public life in the Saar as a means of tracing some of the wider political ideological changes of the era Focusing on the changing discourses representations and institutions that gave shape and meaning to factory work and labor conflict in the Saar *Work Race and the Emergence of Radical Right Corporatism in Imperial Germany* demonstrates the ways in which Saar factory culture and labor relations were constituted in wider fields of public discourse and anchored in the institutions of the local regional public sphere and the German state Of particular importance is the gradual transition in the Saar from a paternalistic workplace to a corporatist factory regime a change that brought with it an authoritarian vision that ultimately converged with core elements in the ideological discourses of the German radical Right including the National Socialists This volume will be of interest to scholars and students of labor industrial organization ideology and political culture and the genealogies of Nazism Dennis Sweeney is Associate Professor of History at the University of Alberta The author makes a very insightful argument about the emergence of a kind of scientific racism within the new corporatism one that brings biopolitics into German industry prior to the rise of National Socialism This book will be an important contribution to the history of Imperial Germany and has much potential to appeal to audiences in other fields of history
