---

- In a democracy, we expect that the pluralist model should be true
- A government is supposed to be responsive to public opinion
- Challenge is that we see differing views of the public: attentive, mass, non-attitudes, irrational

**Public Opinion and Foreign Policy** Roderick McGirr Wright, 1958 Democracies and Foreign Policy Bernard Cecil Cohen, 1995 In *Democracies and Foreign Policy* however Bernard Cohen offers the first detailed comparison of two Western democracies the United States and the Netherlands and their patterns of public participation in foreign policy To assess the influence of citizens on the foreign policies of each nation he examines the institutions that both shape and express public opinion national legislative bodies media of communication organized interest groups and searches for the roots of these institutions in the national political systems Cohen s thought provoking results demand a reassessment of aspects of foreign policy making that have been taken for granted in each of these countries Cohen finds for example that within the United States the media have significant power in setting agendas while the political parties remain relatively mute on foreign policy issues In the Netherlands on the other hand the media have a lesser role with the government instead

sampling the opinion of the more outspoken political parties and party members The Dutch Foreign Ministry remaining walled off from the public has a much freer hand in foreign policy Cohen also finds that the U S State Department is much more sensitive to public opinion than its Dutch counterpart but surprisingly is less successful in understanding and coping with demands from its public

Furia, Bethany Barratt, 2012-05 Rarely has a foreign policy event spawned such interest in international public opinion as has the Iraq War What does this war indicate about the extent to which public opinion influences foreign policy leaders Have leaders decisions about participating in the Iraq Coalition reflected the willingness of their citizens to do so Are leaders of some countries more responsive to public opinion than others The editors address these questions using select case studies that explore the extent to which leaders and people in democracies that are capable of participating in the Iraq War Coalition have willingly done so Each chapter is based on the premise that democracies are most responsive to public opinion and that the wealthiest democracies would be most capable though not necessarily most willing to participate in the Iraq War The editors have assembled contributions that build on the successful model of Richard Sobel's International Public Opinion and the Bosnia Crisis In this Iraq volume leading scholars debate the role of public opinion in particular countries decisions to participate or not in an international conflict making it an essential text for any foreign policy course

Thomas Knecht, 2015-09-10 Do American presidents consider public opinion when making foreign policy decisions In a democracy it is generally assumed that citizen preferences inform public policy For a variety of reasons however foreign policy has always posed a difficult challenge for democratic governance In *Paying Attention to Foreign Affairs* Thomas Knecht offers new insights into the relationship between public opinion and U S foreign policy He does so by shifting our focus away from the opinions that Americans hold and toward the issues that grab the public s attention Policy making under the glare of public scrutiny differs from policy making when no one is looking As public interest in foreign policy increases the political stakes also rise A highly attentive public can then force presidents to choose foreign policies that are less politically risky but usually less effective By tracking the ebb and flow of public attention to foreign policy this book offers a method of predicting when presidents are likely to lead follow or simply ignore the American public      **New Directions in**

**US Foreign Policy** Inderjeet Parmar, Linda B. Miller, Mark Ledwidge, 2009-06-19 This text is a state of the art overview of US foreign policy The book provides a comprehensive account of the latest theoretical perspectives the key actors and issues and new policy directions

*The US Public and American Foreign Policy* Andrew Johnstone, Helen Laville, 2010-06-10 Though often overlooked public opinion has always played a significant role in the development and promotion of US foreign policy and this work seeks to comprehensively assess the impact and nature of that opinion through a collection of historical and contemporary essays The volume evaluates the role of organizations and movements that look to represent public opinion and assesses the nature of their relationship with the government The contributors utilize a number of different approaches to examine this impact including polling data assessments of the role of the media and the wider consideration of ideas and

ideology moving on to examine the specific role played by the public in the policy making and policy promotion process Engaging with new questions as well as approaching old questions from a new angle the work argues that whilst the roles change and the extent of influence varies the power of the public to both initiate and constrain foreign policy clearly exists and should not be underestimated This work will be of great interest to all those with an interest in American foreign policy American politics and American history

**American Sanctions in the Asia-Pacific** Brendan Taylor, 2009-12-04 Sanctions are a persistent many would argue increasingly central component of American efforts to shape foreign policy outcomes in the Asia Pacific The use of sanctions in the context of two of the most pressing regional security issues currently on Washington's radar the ongoing North Korean nuclear crisis and the management of China's emergence clearly reaffirms this pattern This book provides the first comprehensive treatment of US sanctions policy in the Asia Pacific Using the Bill Clinton and George W Bush presidencies as a basis for comparison it examines nine prominent episodes involving the US use of sanctions toward countries in this economically and strategically vital part of the world In each case it addresses the reasons why sanctions were employed in the first place the precise nature of sanctions and how they operated in practice before evaluating their effectiveness Finally it identifies common trends that emerge from this analysis and draws out practical implications for US sanctions policy in particular when and how the US can and cannot optimally use sanctions in an Asia Pacific context

**The Politics of War** Jean-Christophe Boucher, Kim Richard Nossal, 2017-10-02 When the Canadian government committed forces to join the military mission in Afghanistan following the terrorist attacks of September 11 2001 little did it foresee that this decision would involve Canada in a war riven country for over a decade The Politics of War explores how as the mission became increasingly unpopular Canadian politicians across the political spectrum began to use it to score points against their opponents This was politics with a vengeance Through historical analysis of the public record and interviews with officials Jean Christophe Boucher and Kim Richard Nossal show how the Canadian government sought to frame the engagement in Afghanistan as a mission rather than what it was a war They examine the efforts of successive governments to convince Canadians of the rightness of Canada's engagement the parliamentary politics that resulted from the increasing politicization of the mission and the impact of public opinion on Canada's involvement This contribution to the field of Canadian foreign policy demonstrates how much of Canada's war in Afghanistan was shaped by the vagaries of domestic politics and political gamesmanship
