Income Inequality and Public Policy

BRIAN NOLAN*

University College Dublin

Abstract: This paper briefly summarises the evidence that Ireland has a relatively high level of income inequality, which has been rather stable over time and reflects institutional legacies and choices made in the past. A comparative and over time perspective suggests that modest reductions in income inequality are achievable within the framework of Ireland's current socio-economic model, but bringing it below the (EU or OECD) average may well be beyond the capacity of that model. The current financial, fiscal and economic crises require very substantial increases in tax revenue and reductions in state spending. The imperative to close the fiscal deficit provides a window of opportunity to restructure the tax system in a fashion that is not only more economically efficient but also more equitable. Another core aim should be to minimise the number experiencing long-term unemployment and thus the long-term impact of the recession on labour market careers. Once the most immediate needs of the situation are met, this context may provide an opportunity to debate fundamental questions about the role of the state, the extent and nature of social provision and its financing, and the broader relationship between economic performance, the Welfare State, and the underlying goals of Ireland's socio-economic policy.

I INTRODUCTION

The onset of deep recession after a decade of unprecedented economic growth, and the emergence of an enormous fiscal deficit, have brought concerns about fairness to the fore in Irish public debate. What is a fair distribution of the burden of closing that fiscal deficit via tax increases and expenditure reductions? To what extent can or should those who fared best during the boom contribute proportionately to extrication from the “bust”? Were the reward structures that emerged during the boom – the differentials between top executives and average earners, between average earnings and

China's Social Policy Kinglun Ngok, Chak Kwan Chan, 2015-10-23 This book critically and comprehensively examines China's welfare development amidst its rapid economic growth and increasing social tensions It covers the main policy areas from China's inception of the open door policy in 1978 to the new administration of Jinping Xi and Keqiang Li including social security health education housing employment rural areas migrant workers children and young people disabled people old age pensions and non

governmental organisations In particular it critically analyses the impact of policy changes on the well being of Chinese people *The Economic Impact of Government Policy on China's Private Higher Education Sector* Xiaoying Ma, 2021-02-03 This book provides an overview of the growth of the private higher education sector in China and in addition provides an analysis of some of the key drivers of this growth and impediments to it What is new about the book is that it combines the results of a series of interviews with work that is more quantitative in nature The book is of use to not only those engaged in academic research but also those who more generally wish to know more about an educational sector that is growing in importance The most obvious factors promoting expansion of this sector have been the growth in per capita incomes higher levels of participation in secondary school education the strong growth in demand for graduates and the inability of the public sector to keep pace with demand All of these factors intermingled with the involvement of government regulation This regulation however is not uniform across all of China given the different provincial government departments of education that are also involved in dealing with private higher education institutions In particular this book looks at the way in which the Chinese government's regulatory framework both national and provincial influenced the development of the sector and the way in which it operates especially the private higher education component of that sector The analysis undertaken finds that there is a link between regulation and the private higher education sector growth and a link between the funding of the government sector The more intense regulation was and the more funds provided to the state sector the less scope there was for the private sector to expand Growth of the private sector therefore did not just depend upon rising demand for higher education overall but also to a fair degree of tolerance on the part of government Much of this work in subsequent years has been supported by the further changes that have been undertaken in the Chinese higher education sector Over the years the growth of the Chinese higher education sector has stabilised as has the private segment of this sector *The Public Policy Exception in the Judicial Review of International Commercial Arbitral Awards* Shu Zhang, 2023-09-19 This book systematically examines how the Chinese arbitration law system responds to the application of the public policy exception in the judicial review of international arbitral awards The discussion is based on a general understanding of the legal concept of public policy in international arbitration practice and the understanding developed in Chinese arbitration law and judicial practice In focusing on both international developments and Chinese arbitral and judicial practice this book provides some lessons from and for China The book is based on a review of both legislation and cases in China and a comparison with the international trends and consensuses as well as a systematic assessment of China's performance in defining and applying public policy in the judicial review of international commercial arbitral awards Valuable insights are provided on the basis of detailed analysis of the relevant cases In this context the author raised and examined a few key questions to be answered by the judicial practice including the international national nature of public policy the key elements of public policy and the appropriate boundaries of judicial review The author also highlighted a few unique legal concepts and approaches adopted in

the Chinese context and evaluated its impacts on foreign parties and practitioners dealing with arbitration issues in China It is proposed that in the context of China s recent law reforms further steps are expected to be taken by the Chinese legal system in order to achieve a more comprehensive view of the public policy exception that is consistent with the globalized trend of a converging understanding of public policy in international arbitration
