Sport Facility Operations Management Stacey A. Hall, Simon Shibli, Eric Schwarz, 2010-05-14 This is the first book to take a truly global look at facilities operations management in the sport industry

Sports facilities management is in the national news with reports from the BBC that three 2012 Olympic venues in London are being evaluated by accountants to see whether they will deliver value for money. The current estimate of government spending on the games is 9.3 billion. There is also an ongoing debate about the fate of the 80,000 seat stadium that is being constructed for the games at a cost of 500 million. Sport facilities of all shapes and sizes are an ingrained part of global sport management culture. As such it is inevitable that students who enter into the field of sport management will interact with the management and operations of a sport facility at some point during their career. This textbook provides the theoretical foundation for sport facility operations management and is supplemented both in the text and in the companion site containing schematics, planning documents, sample forms and sample ownership management structures. In addition, each author will infuse research and experiences from sport facilities around the world: North America, Europe, Middle East, Asia, Australia and New Zealand to ensure that a global perspective is at the core of this book. This book is published with the sport management lecturer and student in mind.
