Publication, Teaching, and the Academic Reward Structure Howard P. Tuckman, 1976 *Assessing What Professors Do* D M Bialik, David A. Dilts, L.J. Haber, 1994-05-25 This book is a basic treatment of faculty performance appraisal in higher education It is written for those scholars faced with the need to understand the issues and solutions to the often thorny problems posed by having to judge the performance of their colleagues in teaching service research and citizenship Neophyte administrators committee members and those facing evaluation are often perplexed by the range and depth of the questions concerning what constitutes an effective and reasonable performance appraisal system This book provides answers to the most common of these questions and integrates current thinking from education literature with models of strategic management from business administration **The Economics of American Higher Education** William E. Becker Jr., D.R. Lewis, 2012-12-06 Postsecondary educational institutions in the United States are facing increasing financial stress and waning public support Unless these trends can be changed higher education can be expected to stagnate What if anything can be done As a starting point advocates of higher education need to more fully recognize the issues associated with the economic mission of higher education and how this mission gets translated into individual student gains regional growth and social equity This requires an understanding of the relationship between the outcomes of higher education and measures of economic productivity and well being This volume addresses topics related to the role of postsecondary education in microeconomic development within the United States Attention is given to the importance of colleges and universities in the enhancement of individual students and in the advancement of the communities and states within which they work Although several of the chapters in this volume are aimed at research teaching universities much of what is presented throughout can be generalized to all of postsecondary education Little attention however is given to the role of higher education in the macroeconomic development of the United States this topic is covered in our related book *American Higher Education and National Growth* **Bulletin of the United States Bureau of Labor Statistics** United States. Bureau of Labor Statistics, 1980 Productivity: a Selected Annotated Bibliography , 1980 Productivity: a Selected, Annotated Bibliography, 1976-78 United States.
