Literacy in Grades 4-8 Nancy L. Cecil, Joan P. Gipe, Merrill E. Marcy, 2017-07-05 Comprehensive yet succinct and readable Literacy in Grades 4-8 Third Edition offers a wealth of practical ideas to help preservice and practicing teachers create a balanced and comprehensive literacy program while exploring the core topics and issues of literacy in grades 4 through 8. It addresses teaching to standards, differentiating instruction for readers and writers, motivating students using assessment to inform instruction, integrating technology into the classroom, working with English learners and struggling readers, and connecting with caregivers. Selected classroom strategies, procedures, and activities represent the most effective practices according to research, and the many outstanding classroom teachers who were observed and interviewed for the book. The Third Edition includes added material connecting the Common Core State Standards to the instruction and assessment of literacy skills, a combined word study and vocabulary chapter to help readers integrate these important topics in their teaching, more on technology including comprehension of multimodal texts, enhancing writing instruction with technology tools and teaching activities with an added technology component, added discussion of teacher techniques during text discussions, strategic moves that help students become more strategic readers. Key features: In the Classroom vignettes, more than 50 activities, some with a technology component, questions for journal writing and for projects, and field-based activities, troubleshooting sections offering alternative suggestions and activities for those middle grade students who may find a particular literacy focus challenging. Using Graphic Novels in the English Language Arts Classroom William Boerman-Cornell, Jung Kim, 2020-10-01 Shortlisted for the UK Literacy Association's Academic Book Award 2021. There is an increasing trend in teachers using graphic novels to get their students excited about reading and writing using both original stories and adaptations of classic works by authors such as Homer, Shakespeare, and the Brontës. However, there is surprisingly little research available about which pedagogies and classroom practices are proven to be effective. This book draws on cutting-edge research, surveys, and classroom observations to provide a set of effective methods for teaching with graphic novels in the secondary English language arts classroom. These methods can be applied to a broad base of uses ranging from understanding literary criticism, critical reading, multimodal composition to learning literary devices like foreshadowing and irony. The book begins by looking at what English language arts teachers hope to achieve in the classroom. It then considers the affordances and constraints of using graphic novels to achieve these

specific goals using some of the most successful graphic novels as examples including *Maus* *Persepolis* *The Nameless City* and *American Born Chinese* and series such as *Manga Shakespeare* Finally it helps the teacher navigate through the planning process to figure out how to best use graphic novels in their own classroom Drawing on their extensive teaching experience the authors offer examples from real classrooms suggested lesson plans and a list of teachable graphic novels organized by purpose of teaching
