*Business and Regional Development* Rodrigo Basco, Roger Stough, Lech Suwala, 2021-04-06 This book explores the relationship between families firms and regions and the extent to which these relationships contribute to regional economic and social development Although family business participation in economic activities has been a common phenomenon since pre industrial societies and its importance has evolved throughout time and across spatial contexts the book suggests that

these factors have often been neglected in family business and regional studies Taking this research gap into account the book aims to deepen our understanding of the role family firms play in the regional economy In particular it explores two seldom studied questions Firstly what role do family firms play in regional development Secondly how do different spatial regional contexts shape family firm operations and performance Family Business and Regional Development presents a model of spatial familiness and uses themes such as productivity networks and competitiveness to shed new light on family businesses Moreover it approaches the juxtaposition between family business and regional studies to encourage the cross fertilisation of ideas theories and research methods between the two fields Bringing together leading experts in entrepreneurship regional economics and economic geography this book will be a valuable reading for advanced students researchers and policymakers interested in family firms regional studies and economic geography

**Native Wine Grapes of Italy** Ian D'Agata, 2014-05-16 Mountainous terrain volcanic soils innumerable microclimates and an ancient culture of winemaking influenced by Greeks Phoenicians and Romans make Italy the most diverse country in the world of wine This diversity is reflected in the fact that Italy grows the largest number of native wine grapes known amounting to more than a quarter of the world's commercial wine grape types Ian D Agata spent thirteen years interviewing producers walking vineyards studying available research and tasting wines to

create this authoritative guide to Italy's native grapes and their wines. Writing with great enthusiasm and deep knowledge, D'Agata discusses more than five hundred different native Italian grape varieties from Aglianico to Zibibbo. D'Agata provides details about how wine grapes are identified and classified, what clones are available, which soils are ideal, and what genetic evidence tells us about a variety's parentage. He gives historical and anecdotal accounts of each grape variety and describes the characteristics of wines made from the grape. A regional list of varieties and a list of the best producers provide additional guidance. Comprehensive, thoroughly researched, and engaging, this book is the perfect companion for anyone who wants to know more about the vast enological treasures cultivated in Italy. Earthquakes and Their Impact on Society

Sebastiano D'Amico, 2015-09-28. This book provides an integrated approach to the assessment of seismic hazards. The reduction of losses expected by future earthquakes is probably the most important contribution of seismology to society. Large earthquakes occurred in densely populated areas highlight the dramatic inadequacy of a massive portion of the buildings, demonstrating the high risks of modern industrial societies. Building earthquake-resistant structures and retrofitting old buildings on a national scale can be extremely expensive and can represent an economic challenge even for developed western countries. Earthquakes can cause also several psychological problems due to the fact that such kind of disasters will result in casualties, collapsing of houses, strategic buildings and facilities, and deeply affect a community. Moreover, in our society it is necessary to properly plan emergency responses and rescues, taking into account any possible secondary effect in order to avoid more casualties. *Il consulente del lavoro* Pietro Zarattini, Rosalba Pelusi, 2015-09-02. Il nuovo volume *IL CONSULENTE DEL LAVORO* nella sua prima edizione realizzata in collaborazione con Novecento Editore offre un quadro organico della normativa che disciplina l'amministrazione del personale e la consulenza del lavoro sia per quanto riguarda gli aspetti contrattuali che per quelli connessi agli adempimenti contributivi e fiscali. L'opera è suddivisa in tre parti: la prima parte, diretta all'esame dei rapporti di lavoro subordinato e quindi tempo determinato, parziale, apprendistato, intermittente, ripartito e somministrazione, vengono inoltre trattati istituti quali orario, retribuzione, sospensione del rapporto, licenziamento e dimissioni, ma anche adempimenti come assunzioni, inquadramento e ammortizzatori sociali. La seconda parte, invece, esamina gli obblighi di carattere contributivo e fiscale come retribuzione, imponibile, contributi, agevolazioni, previdenza integrativa e tassazione. La terza parte esamina le altre forme di rapporto di lavoro autonomo e quindi collaborazioni, lavoro a progetto, occasionale, partite IVA, associazione in partecipazione, completando la trattazione con gli aspetti inerenti il rapporto, il regime contributivo e le prestazioni previdenziali. La trattazione viene svolta con taglio operativo alla luce delle prassi e della giurisprudenza più rilevante. Specifica attenzione è riservata agli adempimenti posti a carico del datore di lavoro ed alle sanzioni sia amministrative che penali.  unemployment club convergence have been touched on in a large number of works and have recently also been studied using

 reasons why structural changes in some sectors cause slumps in some regions but not in others the extent to which  
 agglomeration factors explain regional imbalances the degree of convergence divergence across EU countries and regions  
 the role of labor mobility in reducing increasing regional labor market imbalances the impact of EU and country level
