## **Punishment Excuses And Moral Development:**

**Punishment, Excuses and Moral Development** Henry Benedict Tam,1996 Confronted by the damages and pain caused by offenders society reaches for punishment to redress the balance Yet faced with causes of crime which lie beyond the control of offenders themselves we are also inclined to consider accepting a variety of excuses Therefore we are faced with a conundrum which forms the central question of this book when all the factors are taken together just when should an offender be punished or excused

**Education for Spiritual, Moral, Social and Cultural Development** Ron Best,2000-06-01 Drawing on successful practice and relating such practice to theoretical insights this comprehensive treatment of the challenge of educating children spiritually morally socially and culturally offers enlightenment for individual teachers classroom practice as well as for whole school approaches

**Punishment and Sentencing** Mirko Bagaric,2025-02-03 First published in 2001 Punishment and Sentencing provides a way of introducing principle into sentencing This is done by bridging the gap between the philosophical justification for punishment and sentencing law and practice In terms of the interests it deals with sentencing is the most important area of law Ironically it is also arguably the least coherent Nearly three decades ago sentencing was described as a wasteland in the law Unfortunately little has changed in that time Sentencing decisions are often made in accordance with the idiosyncratic sentiments of sentencers rather than on the basis of binding rules and principles Part A of the book provides an overview of current sentencing law and practice Part B critically examines the main contemporary theories of punishment Part C discusses the implications that this has for the sentencing process It is a useful text for students of criminology law and philosophy courses as well as a valuable resource for criminal law practitioners

**Punishment and Process in International Criminal Trials** Ralph Henham,2017-03-02 International sentencing has become significant given the numerous events on the world stage which have focused attention on the justifications and adequacy of punishment for heinous crimes such as genocide and crimes against humanity In addition to providing a detailed evaluation of the philosophical and theoretical difficulties raised by this rapidly developing area of international criminal justice this book provides an integrated socio legal analysis of the law and process of international sentencing It considers the rationale and development of international sentencing structures and processes the nature and scope of legal and procedural constraints on decision making as well as access to justice and rights issues The book discusses sentencing within the context of international criminal law and examines internationalized trial processes and alternative mechanisms for resolution In seeking to comprehend the punishment of international crimes through the comparative contextual analysis of trial processes it challenges our present understanding of how and why particular sentencing outcomes are produced and the perceived legitimacy of international trial justice

*The Philosophy of Psychiatry* Jennifer Radden,2004-06-10 This is a comprehensive resource of original essays by leading thinkers exploring the newly emerging inter disciplinary field of the philosophy of psychiatry The contributors aim to define this exciting field and to

highlight the philosophical assumptions and issues that underlie psychiatric theory and practice the category of mental disorder and rationales for its social clinical and legal treatment As a branch of medicine and a healing practice psychiatry relies on presuppositions that are deeply and unavoidably philosophical Conceptions of rationality personhood and autonomy frame our understanding and treatment of mental disorder Philosophical questions of evidence reality truth science and values give meaning to each of the social institutions and practices concerned with mental health care The psyche the mind and its relation to the body subjectivity and consciousness personal identity and character thought will memory and emotions are equally the stuff of traditional philosophical inquiry and of the psychiatric enterprise A new research field the philosophy of psychiatry began to form during the last two decades of the twentieth century Prompted by a growing recognition that philosophical ideas underlie many aspects of clinical practice psychiatric theorizing and research mental health policy and the economics and politics of mental health care academic philosophers practitioners and philosophically trained psychiatrists have begun a series of vital cross disciplinary exchanges This volume provides a sampling of the research yield of those exchanges Leading thinkers in this area including clinicians philosophers psychologists and interdisciplinary teams provide original discussions that are not only expository and critical but also a reflection of their authors distinctive and often powerful and imaginative viewpoints and theories All the discussions break new theoretical ground As befits such an interdisciplinary effort they are methodologically eclectic and varied and divergent in their assumptions and conclusions together they comprise a significant new exploration definition and mapping of the philosophical aspects of psychiatric theory and practice

**Critical Perspectives on Coercive Interventions** Claire Spivakovsky, Kate Seear, Adrian Carter, 2018-05-11 Coercive medico legal interventions are often employed to prevent people deemed to be unable to make competent decisions about their health such as minors people with mental illness disability or problematic alcohol or other drug use from harming themselves or others These interventions can entail major curtailments of individuals liberty and bodily integrity and may cause significant harm and distress The use of coercive medico legal interventions can also serve competing social interests that raise profound ethical legal and clinical questions Examining the ethical social and legal issues involved in coerced care this book brings together the views and insights of leading researchers from a range of disciplines including criminology law ethics psychology and public health as well as legal and medical practitioners social service consumers and government officials Topics addressed in this volume include compulsory treatment and involuntary detention orders in civil mental health and disability law mandatory alcohol and drug treatment programs and drug courts community treatment orders the use of welfare cards with Indigenous populations mandated treatment of seriously ill minors as well as adult guardianship and substituted decision making regimes These contributions attempt to shed light on why we use coercive interventions whether we should whether they are effective in achieving the benefits that are offered to justify their use and the impact that they have on some of society's most vulnerable citizens in the names of justice and treatment

Kramer, Mark R. Reiff, 2011-07-14 For many years Antony Duff has been one of the world s foremost philosophers of criminal law This volume collects essays by leading criminal law theorists to explore the principal themes in his work In a response to the essays Duff clarifies and develops his position on central problems in criminal law theory Some of the essays concentrate on the topic of criminalization That is they examine what forms of conduct including attempts offensiveness and negligence can aptly qualify as criminal offences and what principled limits if any should be placed on the reach of the criminal law Several of the other essays assess the thesis that punishment is justifiable as a form of communication between offenders and their community Those essays examine the presuppositions about the nature and function of community and about the moral structure of atonement that must be embraced if communication is to be a primary role for punishment The remaining essays examine the nature and limits of responsibility in the law as they engage

with philosophical debates over moral luck by investigating the ways in which the law can legitimately hold people responsible for events that were not within their control These chapters tie the first and third parts of the book together as they explore the relationship between the principles that determine a person's responsibility and the principles that determine which types of actions can appropriately be criminalized Finally Duff responds with comments that seek to defend and clarify his views while also acknowledging the correctness of some of the critics objections

Plato on Punishment Mary Margaret Mackenzie, 2023-11-15 Punishments hurt Therefore they must be justified but philosophical attempts to do so founder in contradictions and moral difficulties Danger faces the unwary penologist yet he persists for with social organization comes the need to punish those who do wrong Plato on Punishment draws together philosophy law and the history of ideas in the classical topic of Plato's penology it discusses this philosopher's attitude towards punishment in relation to the whole of his philosophy Mackenzie begins by examining the three major theories of punishment current today retribution utilitarianism and reform arguing that held separately they are objectionable maintained simultaneously they provoke intolerable conflict Thus attempt to justify punishment is necessarily doomed to failure However Mackenzie claims that compelling reasons lead people to punish Drawing on the development of the moral values of early and classical Greece she shows how the institution of punishment is entailed by ordinary moral attitudes Finally Mackenzie presents Plato's theory of reformatory punishment in relation to the whole of his moral theory She argues that although his theory of punishment appears formidable when viewed as a product of his moral theory it requires the strong foundation of an unacceptable Platonic metaphysics Plato succumbs to the demands imposed by tradition of moral justice thus demonstrating how heavy the pressure of ordinary moral attitudes can be reinforced by tradition we like Plato are compelled to justify punishment although the rationale we employ is but imperfect Mackenzie criticizes the modern philosophy of punishment She participates in the current controversy about the development of Greek values And her account of Plato's theory of punishment is the first to employ both the perspective of classical scholarship and a modern philosophical viewpoint The major contribution of this original work is the fusion of three elements the philosophy of punishment the history of ideas and Platonic scholarship into a single argument we should not punish but we must Punishments hurt Therefore they must be justified but philosophical attempts to do so founder in contradictions and moral difficulties Danger faces the unwary

penologist yet he persists for with social organization comes the need to punish those who d **Higher Education and National Development** David Bridges, Palmira Juceviciene, Roberta Jucevicius, Terence H.
