Pure War:

Pure War Paul Virilio, Sylvère Lotringer, 1997 In this dazzling dialogue with Sylvère Lotringer Paul Virilio for the first time displayed the whole range of his reflections on the effect of speed on our civilization every one of which has been dramatically confirmed over the years since this book's publication *Pure War, new edition* Paul Virilio, Sylvère Lotringer, 2008-04-25 Virilio and Lotringer revisit their prescient book on the invisible war waged by technology against humanity since World War II In June 2007 Paul Virilio and Sylvère Lotringer met in La Rochelle France to reconsider the premises they developed twenty five years before in their frighteningly prescient classic *Pure War* *Pure War* described the invisible war waged by technology against humanity and the lack of any real distinction since World War II between war and peace Speaking with Lotringer in 1982 Virilio noted the accidents that inevitably arise with every technological development from car crashes to nuclear spillage to the extermination of space and the derealization of time wrought by instant communication In this new and updated edition Virilio and Lotringer consider how the omnipresent threat of the accident both military and economic has escalated With the fall of the Soviet bloc the balance of power between East and West based on nuclear deterrence has given way to a more diffuse multi polar nuclear threat Moreover as the speed of communication has increased exponentially local accidents like the collapse of the Asian markets in the late 1980s escalate with the speed of contagion into global events instantaneously Globalization Virilio argues is the planet's ultimate accident Paul Virilio was born in Paris in 1932 to an immigrant Italian family Trained as an urban planner he became the director of the cole Speciale d'Architecture in the wake of the 1968 rebellion He has published twenty five books including *Pure War* 1988 his first in English and *The Accident of Art* 2005 both with Sylvère Lotringer and published by Semiotexte Sylvère Lotringer general editor of Semiotexte lives in New York and Baja California He is the author of *Overexposed* *Perverting Perversions* Semiotexte 2007 and other books **Postmodern War** Chris Hables Gray, 2013-11-12 Postmodern War poses an urgent challenge to the ways we conceptualize and actually wage war in our high technology age Computerization and artificial intelligence have brought about a revolution in warfare spawning both increasingly powerful weapons and a rhetoric which disguises their apocalyptic potential in catch phrases like smart weapons and bloodless combat Postmodern War examines contemporary practices of war defining and critiquing trendy military doctrines hidden behind phrases like Infowar and Cyberwar the roles of those who manipulate high technology those who are manipulated by it and those who are increasingly merging with it the role of peace activists and socially responsible scientists in countering dangerous assumptions made by a postmodern military Far from opposing technological change however Gray finds new hopes for peace in the twenty first century Provocative and far reaching in its scope the book argues that postmodern war has left us poised between the most dreadful and most utopian of alternatives we may eradicate either the human race or war itself **Law and the Long War** Benjamin Wittes, 2008-06-19 An authoritative assessment of the new laws of war and a sensible and sophisticated roadmap for the

future of liberty in the Age of Terror America is losing a crucial front in the ongoing war on terror It is losing not to Al Qaeda but to its own failure to construct a set of laws that will protect the American people during this global conflict As debate continues to rage over the legality and ethics of war Benjamin Wittes enters the fray with a sober minded exploration of law in wartime that is definitive accessible and nonpartisan Outlining how this country came to its current impasse over human rights and counterterrorism Law and the Long War paves the way toward fairer more accountable rules for a conflict without end

Nihilism and the Sublime Postmodern William Slocombe,2013-11-05 This book examines the relationship between nihilism and postmodernism in relation to the sublime and is divided into three parts history theory and praxis Arguing against the simplistic division in literary criticism between nihilism and the sublime the book demonstrates that both are clearly implicated with the Enlightenment Postmodernism as a product of the Enlightenment is therefore implicitly related to both nihilism and the sublime despite the fact that it is often characterised as either nihilistic or sublime Whereas prior forms of nihilism are modernist because they seek to codify reality postmodernism creates a new formulation of nihilism postmodern nihilism that is itself sublime This is explored in relation to a broad survey of postmodern literature in two chapters the first on aesthetics and the second on ethics It offers a coherent thesis for reappraising the relationship between nihilism and the sublime and grounds this argument with frequent references to postmodern literature making it a book suitable for both researchers and those more generally interested in postmodern literature

Implicating Empire Stanley Aronowitz,Heather Gautney,2009-07-21 Over the past several years while visible protests against the World Bank and the I M F made front page news there has been a growing field of scholarship that looks at the role of globalization for national and international state identities The first truism of globalization that we live in an increasingly interconnected world one in which it is impossible to separate the fate of one nation from that of the others was dramatically illustrated on September 11 2001 when the seemingly distant effects of a civil war in Afghanistan so murderously interrupted life in the United States Implicating Empire is the first book to look at four crucial dimensions of globalization first its role vis a vis the current war second the impact of globalization on domestic U S policy third how globalization will necessarily alter national security both in its definition as well as how it is pursued and finally the future of globalization Including original essays by Stanley Aronowitz Ahmed Rashid Tariq Ali Manning Marable Michael Hardt and Ellen Willis among others Implicating Empire will set the agenda for how globalization is debated and resisted in the future

War Isn't Hell, It's Entertainment Rikke Schubart,Fabian Virchow,Debra White-Stanley,2009-03-19 Real war is a cruel theater of death yet it is also an exciting narrative exploited for national political and commercial purposes and turned into numerous films television shows computer games news stories and reenactment plays These essays examine the relationship between war visual media and entertainment from a number of academic perspectives Key topics include how war is used as an imaginary site to stage dramas how boundaries between war media and entertainment dissolve as new media alters the formal qualities of

representation how entertainment is used to engage audiences and what effect products of war and entertainment have on consumers of popular culture

War, Peace, and Reconciliation Theodore R. Weber, 2015-11-11 War Peace and Reconciliation invites Christians and the churches into a conversation over how to think about war from a standpoint in faith. It asks how reconciliation which is central to Christian life and doctrine can engage the realities of war without surrendering its fundamental affirmations. It defines these realities politically by discussing the meanings of power, peace as a particular organization of power and the international system. The study of war and politics is unavoidable as is the engagement with reconciliation because all human existence and activity exist in the context of the gracious work of God to renew and reconcile the fallen creation. The inquiry is theocentric and christocentric. It culminates in a call to the churches to examine all their practices in the light of this perspective.

Paul Virilio John Armitage, 2000-05-24 Paul Virilio is one of the most significant and stimulating French cultural theorists writing today. Increasingly hailed as the archaeologist of the future, Virilio is noted for his proclamation that the logic of ever increasing acceleration lies at the heart of the organization and transformation of the contemporary world. The first book to afford a properly critical evaluation of Virilio's cultural theory, it includes an interview with Virilio, a recently translated example of his work, and a select bibliography of his writings. The commissioned contributions by leading cultural and social theorists examine Virilio's work from his early speculations on military and urban space to his current writings on dromology, politics, new communications technologies, disappearance, and the fallout from the information bomb.

The Visual Divide between Islam and the West Hatem N. Akil, 2016-12-22 This book considers the ways in which Muslims view the way they are being viewed, not viewed or incorrectly viewed by the West. The book underscores a certain will to visibility whereby Muslims, Arabs, wish just to be seen and to be marked as fellow human beings. The author relates the failure to achieve this visibility to a state of desperation that inextricably and symmetrically ties visibility to violence. When Syrian and Palestinian refugees recently started refusing to be photographed, they clearly ushered the eventual but inevitable collapse of the image and its final futility. The photograph has been completely emptied of its last remaining possibility of signification. The book attempts to engage with questions about the ways in which images are perceived within cross-cultural contexts. Why and how do people from different cultural backgrounds view the same image in opposing ways? Why do cartoon photographs and videos become both the cause and target of bloody political violence as witnessed recently by the deadly attacks against Charlie Hebdo in France and in the swift military response by the US, Jordan, France, and others to videotaped violence by ISIS?

Reading Richard Matheson Cheyenne Mathews, Janet V. Haedicke, 2014-05-07 Richard Matheson (1926-2013) was a prolific author and screenwriter whose career helped shape the horror and fantasy genres in literature, film, and television for over sixty years. Matheson authored more than ninety short stories and dozens of novels, many of which including *I Am Legend*, *A Stir of Echoes*, *What Dreams May Come*, *The Shrinking Man*, *Hell House*, and *Bid Time Return* have been adapted into feature films. Despite his extensive body of work and influence

however Matheson has remained largely outside the scope of academic scrutiny The essays in *Reading Richard Matheson A Critical Survey* provide the first critical overview of Matheson's texts covering seven of Matheson's novels a sampling of short stories and several adaptations for both film and television The essays are arranged thematically and address the sociopolitical anxieties reflected in Matheson's oeuvre consider his precursors and successors and situate him within narrative traditions of mythology cinema genre and memory studies By providing an overview of his career *Reading Richard Matheson* illustrates how a commercial writer can contribute to academic discourses of literature and film Though the essays use a variety of theoretical frameworks the crossover nature of the collection reflects the broad range of Matheson's output As such this volume will appeal to fans of Matheson's work in general as well as scholars of literature film studies cultural studies genre studies media studies memory studies and popular culture

Theology, Ethics, and Technology in the Work of Jacques Ellul and Paul Virilio Michael Morelli, 2021-06-17 *Theology Ethics and Technology in the Work of Jacques Ellul and Paul Virilio* examines biographical and textual connections between sociologist theologian Jacques Ellul and philosopher phenomenologist Paul Virilio Through an examination of their embeddedness in the socio historical context of postwar France Michael Morelli identifies a relationship between these critics of technology that bears the marks of a nascent theological tradition He shows from various vantage points how Ellul and Virilio's nascent tradition exposes technology as modernity's primary idol and how these thinkers use multiple disciplines including history sociology philosophy phenomenology theology and ethics to resist the perilous consequences of the modern world's worship of power and the kinds of technologies this misdirected worship produces Jacques Ellul's death in 1994 and Paul Virilio's death in 2018 may have prevented the maturation of this nascent theological tradition but this book will aid in this tradition's ripening through the presentation of an illuminating way to read these two unique prophetic intellectuals

Behind the Lines Philip Metres, 2007-05 Whether Thersites in Homer's *Iliad* Wilfred Owen in *Dulce et Decorum Est* or Allen Ginsberg in *Wichita Vortex Sutra* poets have long given solitary voice against the brutality of war The hasty cancellation of the 2003 White House symposium *Poetry and the American Voice* in the face of protests by Sam Hamill and other invited guests against the coming shock and awe campaign in Iraq reminded us that poetry and poets still have the power to challenge the powerful *Behind the Lines* investigates American war resistance poetry from the Second World War through the Iraq wars Rather than simply chronicling the genre Philip Metres argues that this poetry gets to the heart of who is authorized to speak about war and how it can be represented As such he explores a largely neglected area of scholarship the poet's relationship to dissenting political movements and the nation In his elegant study Metres examines the ways in which war resistance is registered not only in terms of its content but also at the level of the lyric He proposes that protest poetry constitutes a subgenre that by virtue of its preoccupation with politics history and trauma probes the limits of American lyric poetry Thus war resistance poetry and the role of what Shelley calls unacknowledged legislators is a crucial though largely unexamined body of writing

that stands at the center of dissident political movements *High-speed Society* Hartmut Rosa,2010-11-01 Everywhere life seems to be speeding up we talk of fast food and speed dating But what does the phenomenon of social acceleration really entail and how new is it While much has been written about our high speed society in the popular media serious academic analysis has lagged behind and what literature there is comes more from Europe than from America This collection of essays is a first step toward exposing readers on this side of the Atlantic to the importance of this phenomenon and toward developing some preliminary conceptual categories for better understanding it Among the major questions the volume addresses are these Is acceleration occurring across all sectors of society and all dimensions of life or is it affecting some more than others Where is life not speeding up and what results from this disparity What are the fundamental causes of acceleration as well as its consequences for everyday experience How does it affect our political and legal institutions How much speed can we tolerate The volume tackles these questions in three sections Part 1 offers a selection of astute early analyses of acceleration as experienced in the late nineteenth and early twentieth centuries Part 2 samples recent attempts at analyzing social acceleration including translations of the work of leading European thinkers Part 3 explores acceleration s political implications **Germany and the Second World War** ,1990 This is the second in the comprehensive ten volume *Germany and the Second World War* The five volumes so far published in German take the story to the end of 1941 and have achieved international acclaim as a major contribution to historical study Under the auspices of the Militargeschichtliches Forschungsamt Research Institute for Military History a team of renowned historians has combined a full synthesis of existing material with the latest research to produce what will be the definitive history of the Second World War This volume surveys the first year of the war deliberately begun by Nazi Germany The authors examine the train of interconnected political and military events and set military operations against the background of Hitler s war policy and general aims both immediate and long term The authors show that the conflict took a course quite different from that which Hitler had intended but nevertheless resulted in a series of conquests for the Third Reich *Critique of Information* Scott Lash,2002-01-21 This penetrating book raises questions about how power operates in contemporary society It explains how the speed of information flows has eroded the separate space needed for critical reflection It argues that there is no longer an outside to the global flows of communication and that the critique of information must take place within the information itself The operative unit of the information society is the idea With the demise of depth reflection reflexivity through the idea now operates external to the subject in its circulation through networks of humans and intelligent machines It is these ideas that make the critique of information possible This book is a major testament to the prospects of culture politics and theory in the global information society **The Good Men Who Won the War** Robert E. Hunt,2010-04-08 Examines how Union veterans of the Army of the Cumberland employed the extinction of slavery in the trans Appalachian South in their memory of the Civil War Robert Hunt examines how Union veterans of the Army of the Cumberland employed the extinction of slavery in the

trans Appalachian South in their memory of the Civil War Hunt argues that rather than ignoring or belittling emancipation it became central to veterans retrospective understanding of what the war and their service in it was all about The Army of the Cumberland is particularly useful as a subject for this examination because it invaded the South deeply encountering numerous ex slaves as fugitives refugees laborers on military projects and new recruits At the same time the Cumberlanders were mostly Illinoisans Ohioans Indianans and significantly Kentucky Unionists all from areas suspicious of abolition before the war Hunt argues that the collapse of slavery in the trans Appalachian theater of the Civil War can be usefully understood by exploring the post war memories of this group of Union veterans He contends that rather than remembering the war as a crusade against the evils of slavery the veterans of the Army of the Cumberland saw the end of slavery as a by product of the necessary defeat of the planter aristocracy that had sundered the Union a good and necessary outcome but not necessarily an assertion of equality between the races Some of the most provocative discussions about the Civil War in current scholarship are concerned with how memory of the war was used by both the North and the South in Reconstruction redeemer politics the imposition of segregation and the Spanish American War This work demonstrates that both the collapse of slavery and the economic and social post War experience convinced these veterans that they had participated in the construction of the United States as a world power built on the victory won against corrupt Southern plutocrats who had impeded the rightful development of the country

Meanings of War and Peace Francis A. Beer, 2001 When the stakes of public words and actions are global and permanent and especially when they involve war and peace can we afford not to seek their meaning For three decades Francis Beer has pioneered the effort to discover describe and connect pieces of the complex puzzle of war peace their interrelationship and their causes In this volume Beer joined by colleagues as co authors of some chapters examines the cognitive behavioral and linguistic dimensions of war and peace Language he shows is important because it mediates between thought and action It expresses beliefs about war and peace and affects the perceptions of potential adversaries about one s own intentions Using multiple perspectives and methods he explores the uses of communication in international relations and the development of meaning for war and peace In this unique and innovative post realist analysis Beer examines how language transmits and creates meaning through interaction with specific audiences His case studies include the Somalian intervention Sarajevo and the Balkan conflict and the Gulf War Moving beyond the discrete words of war the book takes a broader view of how political participants interact in war and peace through continuous streams of communication that reflect and construct worlds of meaning This stimulating and challenging volume brings together insights and evidence from political science cognitive psychology linguistics history and rhetorical studies and applies them in a focused way to the problem of war and peace
