Sacred Trust Robert B. Ekelund, Robert D. Tollison, Gary M. Anderson, Robert F. Hébert, Audrey B. Davidson, 1996-10-31 Without meaning to be irreverent it is fair to say that in the Middle Ages at the height of its political and economic power the Roman Catholic Church functioned in part as a powerful and sophisticated corporation The Church dealt in a product many consumers felt they had to have the salvation of their immortal souls The Pope served as its CEO the College of Cardinals as its board of directors bishoprics and monasteries as its franchises And while the Church certainly had moral and social goals this early antecedent to AT T and

General Motors had economic motives and methods as well seeking to maximize profits by eliminating competitors and extending its markets In *Sacred Trust The Medieval Church as an Economic Firm* five highly respected economists advance the controversial argument that the story of the Roman Catholic Church in the Middle Ages is in large part a story of supply and demand Without denying the centrality or sincerity of religious motives the authors employ the tools of modern economics to analyze how the Church's objectives went well beyond the realm of the spiritual They explore the myriad sources of the Church's wealth including tithes and land rents donations and bequests judicial services and monastic agricultural production And they present an in depth look at the ways in which Church principles on marriage usury and crusade were revised as necessary to meet and in many ways to create the needs of a vast body of consumers Along the way the book raises and answers many intriguing questions The authors explore the reasons behind the great crusades against the Moslems probing beyond motives of pure idealism to highlight the Church's concern with revenues from tourism and the sale of relics threatened by Moslem encroachment in the holy lands They examine the Church's involvement in the marriage market revealing how the clergy filled their coffers by extracting fees for blessing or dissolving marital unions for hearing marital disputes and even for granting permission for blood relatives to wed And they shed light on the concept of purgatory showing how this product innovation developed by the Church in the twelfth century a form of deferred payment opened the floodgates for a fresh market in post mortem atonement through payments on behalf of the deceased Finally the authors show how the cumulative costs that the faithful were asked to bear eventually priced the Roman Catholic church out of the market paving the way for Protestant reformers like Martin Luther A ground breaking look at the growth and decline of the medieval Church *Sacred Trust* demonstrates how economic reasoning can be used to cast light on the behavior of any complex historical institution It offers rare insight into one of the great historical powers of Western civilization in a analysis that will intrigue anyone interested in life in the Middle Ages in church history or in the influence of economic motives on historical events *The Curved Jewels* Tom Bradley,1999-04 *Vigor Mortis* Scott G. Bruce,Stephen Gordon,2024-12-16

This volume explores the enduring presence and participation of the dead in the lives of premodern people from the Carolingian period to the end of the Middle Ages Unlike modern states which erect barriers to separate the dying and the deceased from their families friends and associates premodern societies in western Europe fostered an on going relationship between the living and the dead that was mutually beneficial to both parties As these studies show the dead had many means at their disposal to communicate their needs and disaffection including ghostly visitations and unquiet corpses For their part medieval authors told stories about the fate of the dead and the geography of the afterlife to dissuade sinful behaviour and foster virtue in preparation for the Last Judgment Premodern hauntings also serve as a useful metaphor for the uncertainty of archival research in recovering past voices and for the racial presumptions that inform our reconstruction of the western Middle Ages This book will appeal to scholars and students of history and literature especially those interested in the concept

of death in the medieval period The chapters in this book were originally published in the Journal of Medieval History
