**Science of A Happy Brain** Dr. Jay Kumar, 2020-01-13 What is happiness? Is happiness even realistic for you to achieve in today's world of rising anger, anxiety, and addiction? It's the fundamental question Dr. Jay Kumar, your Happiness professor, yearned to discover in the wake of a life-transforming family tragedy as a young adult that led him to the halls of academia and holy ashrams to explore the science and spirituality of happiness. *Science of a Happy Brain* is adapted upon actual lessons from Dr. Jay's popular university Happiness course that he has been co-teaching for the past seven years. From millennials suffering from anxiety to folks in Middle America struggling with addiction, from veterans battling PTSD to parents coping to raise children hooked on technology, from the spike in suicides to the tribalism and hate in today's world, Dr. Jay guides you on a personalized and proven strategy for building a Happy Brain for you and society. More research in brain science points to one undeniable truth: to socialize is to survive; to tribe is to thrive. *Science of a Happy Brain* uncovers a long-forgotten aspect of humanity by exposing a shared element of human biology: your social brain. Only recently has science affirmed what religions knew all along: you are a social being with a social brain that is nourished and strengthened by community and connection. But the marvels of society's Age of Digitalization can unwittingly bring you into the malaise of today's Age of Disconnection, which presently sabotages your health, weakens our society, and hijacks your Happy Brain. Your happiness demands tribe. Creating tribe in your life creates balance, longevity, and resilience—the foundation required for generating your Happy Brain. *Science of a Happy Brain* is equally a self-help course and a social commentary whose time has come that brings hope to a world in crisis, a nation in a happiness deficit, and a generation discovering where enduring happiness resides. It is a powerful work that is vital for the crossroads at which society finds itself by presenting a platform for public discourse to explore today's crucial social, cultural, and health issues. Dr. Jay reveals how you can achieve a Happy Brain by learning to experience happiness the way your brain evolved: biologically, psychologically, socially, and spiritually. A Happy Brain creates happy people. Happy people make a happy world. Now more than ever, the future needs you Happy. For more information about Dr. Jay Kumar, visit <https://www.drjaykumar.com>. **The Pursuit of Happiness and the American Regime** Elizabeth Amato, 2018-02-28 The Declaration of Independence claims that individuals need liberty to pursue happiness, but provides little guidance on the what of happiness. Happiness studies and liberal theory are incomplete guides. Happiness studies offer insights into what makes people happy, but happiness policy risks becoming doctrinaire. Liberal theory is better on personal liberty but weak on the what of happiness. My argument is that American novelists are surer guides on the pursuit of happiness. Treated as political

thinkers my book offers a close reading of four American novelists Tom Wolfe Walker Percy Edith Wharton and Nathaniel Hawthorne and their critique of the pursuit of happiness With a critical and friendly eye they present the shortcomings of pursuing happiness in a liberal nation but also present alternatives and correctives possible in America Our novelists point us toward each other in friendship as our greatest resource to guide us towards happiness
