Rift Between America And Old Europe:

The Rift Between America and Old Europe Peter Merkl, 2005-11-17 This new book explains the recent rift between America and some of her oldest European allies especially with Germany and France Particular attention is devoted to the several competing interpretations of the Euro American rift for example that Europeans were taken aback when American neo conservative leaders scornfully rejected their well meant offers of post 9 11 assistance with expressions of disdain for the allies backward military technology and budgets The Bush administration s rejection of the Kyoto Treaty its environmental stance and its position on international treaties are also examined in detail Merkl s interpretation emphasizes America s neo imperial unilateralist posture and policies as contrasted to the Wilsonian internationalism that created the United Nations and established international rule of law backed up by the Security Council a web of international treaties and international courts including the International Court of Criminal Justice Today s American leaders thus oppose European champions of an American initiated international order while identifying themselves with the imperialist European doctrines and practices of another age

The United States and Europe John Baylis, Jon Roper, 2007-01-24 A penetrating new examination of the triangular political and cultural relationship between America Britain and continental Europe This relationship is both fraught and dynamic Post war reconstruction of Europe brought integration Creating a United States of Europe was a goal shared by many Americans Yet the contemporary War on Terror has redefined relationships between America Britain old and new Europe For Britain the Channel seems wider than the Atlantic although geopolitically it is part of Europe This book brings together experts from Britain Europe and America to explore the complexities of contemporary cultural and political relationships considering the challenges that have been met and those that have to be faced

Globalization and Conflict Robert G. Patman, 2006-08-10 This volume highlights the gap between the new security environment and the notion of state centred national security favoured by Washington showing how a Cold War phenomenon known as the national security state in which defence and foreign policy interests essentially converge remains largely intact The conventional wisdom since the suicide attacks of 9 11 is that the world has been transformed and according to President Bush September 11 changed the strategic thinking of the US This book challenges these assumptions Indeed the Bush administration s National Security strategy of 2002 has reinvigorated and even extended the idea of national security Paradoxically the renewed emphasis on a distinctly state centred approach to security including the War on Terror has unfolded during an era of deepening globalization Drawing on the international expertise of fourteen specialists the book examines four inter related themes the impact of globalization on the concept of security the strategic outlook of the world s only superpower the US the new conflicts that have come to characterize the post Cold War era efforts to regulate the emerging patterns of conflict in the world Globalization and Conflict will be essential reading for students of strategic studies security studies and international relations

European Union and Strategy Kjell Engelbrekt, Jan Hallenberg, 2010-09-13 This edited volume looks into the

Propaganda, the Press and Conflict David R. Willcox, 2005-09-19 An incisive analysis of the use of the press for propaganda purposes during conflicts using the first Gulf War and the intervention in Kosovo as case studies As the contemporary analysis of propaganda during conflict has tended to focus considerably upon visual and instant media coverage this book redresses the imbalance and contributes to the growing discourse on the role of the press in modern warfare Through an innovative comparative analysis of press treatment of the two conflicts it reveals the existence of five consistent propaganda themes portrayal of the leader figure portrayal of the enemy military threat threat to international stability and technological warfare As these themes construct a fluid model for the analysis and understanding of propaganda content in the press during conflicts involving British forces they also provide the background against which the author can discuss general issues regarding propaganda Amongst the issues which have become increasingly relevant to both recent academic debate and popular culture the author tackles the role of the journalist in war coverage the place of the press in a news market dominated by instant visual media and the effectiveness of propaganda in specific cultural and political context This book will appeal to advanced students and researchers in war studies media studies propaganda and psychology

Intra-State Conflict, Governments and Security Stephen M. Saideman, Marie-Joelle J. Zahar, 2008-05-29 This volume seeks to understand the central role of governments in intra state conflicts The book explores how the government in any society plays two pivotal roles as a deterrent against those who would use violence and as a potential danger to the society These roles come into conflict with each other as those governments that can best deter *The EU and the European Security Order* Rikard Bengtsson, 2009-09-10 This book attempts to conceptualise EU action in the field of regional security Drawing on constructivist theory the framework of the book focuses on the meeting or interface of actors a situation reflecting the mutual construction of self other and situation The analytical framework applied here to European security politics is potentially open ended as the theoretical logic that informs the framework is general and abstract in character and not limited to state actors in an international setting The empirical aim of this book is to further our understanding of the EU as a security actor in a regional perspective The book thus links International Relations scholarship with that of EU studies By analyzing a number of different interfaces such as with Russia the US and other states we can learn more about the circumstances and preconditions and with what resources and power the EU acts in a regional security setting This book will be of great interest to students of European security EU policy IR theory and security studies in general Rikard Bengtsson is Assistant Professor of Political Science at Lund University Sweden He has a PhD in Political Science from Lund University Sweden Afghanistan, Arms and Conflict Michael Vinay Bhatia, Mark Sedra, 2008-05-05 This is the first book to provide a comprehensive assessment of small arms and security related issues in post 9 11 Afghanistan It includes case studies which

reveal the findings of in depth field research on hitherto neglected regions of the country and provides a distinctive balance of thematic analysis conceptual models and empirical research Exploring various facets of armed violence and measures to tackle it the volume provides significant insight into broader issues such as the efficacy of international assistance the shadow economy warlordism and the Taliban led insurgency In an effort to deconstruct and demystify Afghanistan s alleged gun culture it also explores some of the prevailing obstacles and opportunities facing the country in its transition period In so doing the book offers valuable lessons to the state builders of Afghanistan as well as those of other countries and regions struggling to emerge from periods of transition This book will be of much interest to all students of Afghanistan small arms insurgency Asian Studies and conflict studies in general

[The West and the Global Power Shift](#) Riccardo Alcaro,John Peterson,Ettore Greco,2016-06-28 This book assesses the state of transatlantic relations in an era of emerging powers and growing interconnectedness and discusses the limits and potential of transatlantic leadership in creating effective governance structures The authors first resort to theory and history to understand the transatlantic relationship They then consider the domestic and systemic factors that might set the relationship between the United States and Europe on a different path Finally the authors locate the potential for transatlantic leadership in the context of the global power shift The world of the 21st century displays different power

configurations in different policy domains This changing structure of power complicates the exercise of leadership Leadership requires not only greater power and authority but also persuasion bargaining and moral suasion all necessary strategies to build coalitions and manage conflicts between great powers *Governance in Post-Conflict Societies* Derick W. Brinkerhoff, 2007-01-24 This volume explores questions of rebuilding governance in post conflict societies from an interdisciplinary perspective focusing on three interconnected gaps that arise in fragile states deficits in legitimacy effectiveness and security *Ethics, Technology and the American Way of War* Reuben E. Brigety II, 2007-06-11 A new investigation into how the advent of precision guided munitions affects the likelihood of US policy makers to use force As such this is an inquiry into the impact of ethics strategy and military technology on the decision calculus of national leaders Following the first Gulf War in 1991 this new study shows how US Presidents increasingly used stand off precision guided munitions or PGMs especially the Tomahawk cruise missile either to influence foreign adversaries to make specific policy choices or to signal displeasure with their actions Such uses of force are attractive because they can lead to desirable policy outcomes where conventional diplomacy has failed but without the large cost of lives economic resources or political capital that result from large scale military operations In a post 9 11 world understanding alternative uses of force under significant policy constraints is still of supreme importance Justifying America's Wars Nicholas Kerton-Johnson, 2010-09-13 This book examines the justifications for and practice of war by the US since 1990 and examines four case studies the Gulf War Kosovo Afghanistan and Iraq The author undertakes an examination of presidential speeches and public documents from this period to determine the focal points on which the respective presidents based their rhetoric for war The work then examines the practice of war in the light of these justifications to determine whether changes in justifications correlate with changes in practice In particular the justificatory discourse finds four key themes that emerge in the presidential discourses which are tracked across the case studies and point to the fundamental driving force in US motivations for going to war The four key themes which emerge from the data are international law or norms human rights national interest and egoist morality similar too but wider than exceptionalism This analysis shows that 9 11 resulted in a radical shift away from an international law and human rights focused justificatory discourse to one which was overwhelmingly dominated by egoist morality justifications and national interest This book will be of much interest to students of US foreign policy humanitarian intervention Security Studies and IR theory **U.S. Conflicts in the 21st Century** Spencer C. Tucker, 2015-12-14 This three volume reference work provides an up to date presentation and analysis of the U S wars of the 21st century addressing their backgrounds causes courses and consequences It serves as an indispensable resource for students seeking to understand the role of the United States in the world today Addressing the U S conflicts in Iraq Afghanistan and the Global War on Terror from the year 2001 to the present this comprehensive three volume encyclopedia covers the significant individuals key events and important places involved in these recent military events Beginning with the rise of Al Qaeda in the 1990s and the attacks on

Territory, War, and Peace John A. Vasquez, Marie T. Henahan, 2023-04-14 This book presents a collection of new and updated essays on what has come to be known as the territorial explanation of war The book argues that a key both to peace and to war lies in understanding the role territory plays as a source of conflict and inter group violence Of all the issues that spark conflict territorial disputes have the highest probability of escalating to war War however is hardly inevitable much depends on how territorial issues are handled More importantly settling territorial disputes and establishing mutually recognized boundaries can produce long periods of peace between neighbors even if other salient issues arise While territory is not the only cause of war and wars arise from other issues territory is one of the main causes of war and learning how to manage it can in principle eliminate an entire class of wars This book will be of great interest to all students of war and conflict studies causes of war and peace international security and strategic studies John A Vasquez is Thomas B Mackie Scholar in International Relations at the University of Illinois Urbana Champaign He is author of *The Steps to War* 2008 with Paul Senese and *The War Puzzle Revisited* 2009 He has been president of the Peace Science Society International and the International Studies Association Marie T Henahan is
