Right To Kill:

The Human Right to Dominate Nicola Perugini, Neve Gordon, 2015 At the turn of the millennium a new phenomenon emerged conservatives who just decades before had rejected the expanding human rights culture began to embrace human rights in order to advance their political goals In this book Nicola Perugini and Neve Gordon account for how human rights generally conceived as a counter hegemonic instrument for righting historical injustices are being deployed to further subjugate the weak and legitimize domination Using Israel Palestine as its main case study The Human Right to Dominate describes the establishment of settler NGOs that appropriate human rights to dispossess indigenous Palestinians and military think tanks that rationalize lethal violence by invoking human rights The book underscores the increasing convergences between human rights NGOs security agencies settler organizations and extreme right nationalists showing how political actors of different stripes champion the dissemination of human rights and mirror each other's political strategies Indeed Perugini and Gordon demonstrate the multifaceted role that this discourse is currently playing in the international arena on the one hand human rights have become the lingua franca of global moral speak while on the other they have become reconstrued as a tool for enhancing domination

War and Self-Defense David Rodin, 2002-10-17 When is it right to go to war The most persuasive answer to this question has always been in self defence David Rodin shows what's wrong with this answer He proposes a comprehensive new theory of the right of self defence which resolves many of the perplexing questions that have dogged both jurists and philosophers

Ethics and the Laws of War Antony Lamb, 2013-05-29 This book is an examination of the permissions prohibitions and obligations found in just war theory and the moral grounds for laws concerning war Pronouncing an action or course of actions to be prohibited permitted or obligatory by just war theory does not thereby establish the moral grounds of that prohibition permission or obligation nor does such a pronouncement have sufficient persuasive force to govern actions in the public arena So what are the moral grounds of laws concerning war and what ought these laws to be Adopting the distinction between jus ad bellum and jus in bello the author argues that rules governing conduct in war can be morally grounded in a form of rule consequentialism of negative duties Looking towards the public rules the book argues for a new interpretation of existing laws and in some cases the implementation of completely new laws These include recognising rights of encompassing groups to necessary self defence recognising a duty to rescue and considering all persons neither in uniform nor bearing arms as civilians and therefore fully immune from attack thus ruling out targeted or named killings This book will be of much interest to students of just war theory ethics of war international law peace and conflict studies and Security Studies IR in general
