Modeling Our World Michael Zeiler, 1999 Geographic data models are digital frameworks that describe the location and characteristics of things in the world around us With a geographic information system we can use these models as lenses to see interpret and analyze the infinite complexity of our natural and man made environments With the geodatabase a new geographic data model introduced with ArcInfo 8 you can extend significantly the level of detail and range of accuracy with which you can model geographic reality in a database environment *BKSB* R. B. Smith, 1963 **Once, Only Once, and in the Right Place** National Research Council, Division of Behavioral and Social Sciences and Education, Committee on National Statistics, Panel on Residence Rules in the Decennial Census, 2006-11-16 The usefulness of the U S decennial census depends critically on the accuracy with which individual people are counted in specific housing units at precise geographic locations The 2000 and other recent censuses have relied on a set of residence rules to craft instructions on the census questionnaire in order to guide respondents to identify their correct usual residence Determining the proper place to count such groups as college students prisoners and military personnel has always been complicated and controversial major societal trends such as placement of children in shared custody arrangements and the prevalence of snowbird and sunbird populations who regularly move to favorable climates further make it difficult to specify ties to one household and one place *Once Only Once and in the Right Place* reviews the evolution of current residence rules and the way residence concepts are presented to respondents It proposes major changes to the basic approach of collecting residence information and suggests a program of research to improve the 2010 and future censuses *Dancing Without an Instructor* Professor Wilkinson, 2019-12-05 In *Dancing Without an Instructor* Professor Wilkinson presents a profound exploration of the interplay between personal freedom and structured identity in contemporary society Through a blend of lyrical prose and analytical discourse the book critiques the societal constraints that inhibit individual expression Drawing on cultural references philosophical frameworks and historical contexts Wilkinson elucidates the metaphor of dance as a liberating force arguing for a reclamation of agency in a world increasingly dominated by prescribed norms The text invites readers to embark on a cognitive journey where each page dances between theory and personal narrative offering rich insights into the contemporary human experience Professor Wilkinson a distinguished scholar in sociology and cultural studies has dedicated decades to examining the nuances of social identity and personal autonomy His previous works have significantly influenced studies on the dynamics of self expression within oppressive frameworks His insights into the power dynamics of cultural expression are shaped by his own experiences in diverse global contexts revealing a deep seated understanding of the relationship between societal structures and the indomitable human spirit *Dancing Without an Instructor* is a must read for anyone seeking to understand the intricacies of personal agency in a constrained world It serves not only as an academic text but also as a practical guide for aspiring individuals to navigate their unique paths Readers will find themselves engaged
