Right Brain And Religion:

The Right Brain and Religion C. W. Dalton,1990 Complete Idiot's Guide to Understanding Catholicism Bob O'Gorman,Robert Thomas O'Gorman,Mary Faulkner,2003 No Marketing Blurb **The Last Book** John Williams,2007-08-27 There have been many attempts to explain life For the most part they are variants on a religious or mystical theme These provide a purpose to life but not the purpose of life A full rational explanation of our existence based on our rapidly accumulating scientific knowledge has eluded us until now The explanation of life which is offered in this book draws on three main components evolution genetics and psychology However something exists in our mind which stops us from seeing clearly what is already before us Once this block is removed we can view life objectively and see it as a special form of information which has arisen through evolution Information is identified as the unifying entity of the universe which is inherent in the spatial arrangement of matter This book relates these findings to our world and our lives It sets out in rational terms where we came from how we got here and finally reveals our destiny www.thelastbook.co.uk **Spiritual Intelligence and the Neuroplastic Brain** Charles W. Mark Ph. D.,Charles W. Mark,2010 Our brains are getting wired differently in the world of digital technology information revolution and in the inter cultural world of global society Think of the new vocabulary Global brain collective intelligence global village and cyberspace That should tell us something about the neural rewiring that is taking place inside of our brains whether or not we are aware of it The fact that the human brain changes throughout a person's life in response to intellectual stimulation physical exercise exposure to new cultural environments learning opportunities and challenges is a revolutionary discovery Till twenty years ago neuroscientists believed in the conventional theory that the brain's ability at making new neural connections stopped before a child entered adolescence That is the old dogma There is a Second Copernican Revolution taking place inside of our brains writes the author quoting Carl Zimmer Some experts are suggesting that we are already living in what Richard Restack calls the neurosociety Ray Kurzweil the futurist is predicting that by 2045 A D human beings will be living in an era of singularity when non biological machines invented by human brains and human ingenuity are going to outsmart human intelligence billions of times What is going to be the fate of the human spirit human spirituality the feeling of connection to a force and power that is greater than us God our ability to use spiritual imagination and our intelligence Are we progressively moving away from religion and community based spirituality into the spirituality of different strokes for different folks In his groundbreaking book **Spiritual Intelligence and The Neuroplastic Brain A Contextual Interpretation of Modern History** Charles W Mark takes the reader on a journey through modern history and shows the glimpse of what is to come <http://www.spiritualityintelligence.com> **Religion, Materialism and Ecology** Sigurd Bergmann,Kate Rigby,Peter Manley Scott,2023-05-31 This timely collection of essays by leading international scholars across religious studies and the environmental humanities advances a lively discussion on materialism in its many forms While there is little agreement on

what materialism means it is evident that there is a resurgence in thinking about matter in more animated and active ways The volume explores how debates concerning the new materialisms impinge on religious traditions and the extent to which religions with their material culture and beliefs in the Divine within the material can make a creative contribution to debates about ecological materialisms Spanning a broad range of themes including politics architecture hermeneutics literature and religion the book brings together a series of discussions on materialism in the context of diverse methodologies and approaches The volume investigates a range of issues including space and place hierarchy and relationality the relationship between nature and society human and other agencies and worldviews and cultural values Drawing on literary and critical theory and queer philosophical theological and social theoretical approaches this ground breaking book will make an important contribution to the environmental humanities It will be a key read for postgraduate students researchers and scholars in religious studies cultural anthropology literary studies philosophy and environmental studies Can Scientists Believe Sir Nevill Mott,2013-11-05 In this collection of thought provoking essays a range of distinguished scientists and theologians men and women young and old all with strong scientific training and deeply held religious beliefs in the Judeo Christian tradition give their personal answers They do not always agree the views of each contributor being informed both by their particular scientific expertise and religious affiliation They address a wide range of problems that will interest all concerned to reconcile their own religious beliefs with currently accepted scientific theory and practice The divergences of opinion are as significant as the agreements Positions are thoughtfully explained and make important often novel and illuminating contributions to debate on these great issues *Evolution of Faith and Religion* Ajit Randhawa,2009-08 We Believe... Roy E. Bourque,2021-02-24 We Believe A Journey into Christ Consciousness By Roy E Bourque After a profound spiritual experience at the age of nine the author found clarity in some of what the church was teaching while bringing into question other teachings of the church Eleven years later during a nuclear physics lecture this spiritual experience coincided with what the instructor was teaching Numerous additional spiritual experiences would soon follow We Believe A Journey into Christ Consciousness details the bridge that was formed between science and spirituality from those experiences Since that time the author has researched religious history looking for connections that would correlate modern science with what the ancient writers knew This endeavor has brought clarity to much of what the church teaches as well as serving as the basis to weed out misconceptions that have muddled up the waters This book may serve the reader who is looking for connections between science and religion **The Way It Is** R Preston Todd,2016-07-25 RPTodd has been involved with Scientific Consciousness for well over 30 years Here you will find a synopsis of how he sees the evolution of consciousness as well as his learnings in order that you too may apply these concepts In The Way It Is items looked at differently than usual or brand new are The three pieces of existence are given new labels You can re program your brain The evolution of consciousness Stories as given by Organized Religion The Infinite Roadmap of Life analogy aka the Akashic Records E mc2

Einstein got it almost right You can turn your ideas into reality Affirmations and Meditation also fit with reality Emotions and Creativity have no words attached The ego cannot be used to provide brand new solutions You will find humorous comments interspersed here and there to keep anyone with a sense of humor engaged If indeed consciousness is evolving the fact you are reading this is proof You will see how within **Living Deeply** Fraser Watts,2018-01-01 Here is a book that takes people on a personal journey a journey that is both spiritual and psychological a three fold journey that leads you the reader to face issues about yourself raises challenges about relationships and points towards what is above and beyond Fraser Watts draws on his own Christian tradition in a way that is relevant to spiritual people everywhere whatever tradition they belong to or if they are of no religious tradition at all It is a book to be read reflectively giving some time to make connections between what is gently written in the pages and your own experience of life if you let it Living Deeply will help you join up a spiritual perspective with your own psychological issues Such a journey could change a life Perhaps it will change yours helping you to see what deeper issues are at stake as you journey through life and give you a spiritual compass to respond to life's challenges This book will help you indeed to be living more deeply ESL Doxography 101 Clark Von Heller,2006-09 Doxography takes language instruction in a bold new direction guided by Affective Teaching techniques allowing language students to use right brain effectively Healthy Religion Walter Kania,2006-07-26 Dr Jacob Bronowski in his book and PBS documentary series entitled The Ascent of Man spoke of unhealthy religion when he stood before the ashes of his relatives at the Auschwitz crematorium He said This is how men behave when they believe they have absolute knowledge People seek simple answers and absolute knowledge but anyone or any religion that claims absolute knowledge or absolute and infallible religious sources and tells people what to think is a clear carrier and manifestation of unhealthy religion Is Healthy Religion an oxymoron or is it achievable in one's life This research based document provides you with the means for identifying what is healthy and what is unhealthy in religion You may be surprised to discover that what you believe and the manner in which you practice your religion may be more a function of your personality than of your religion in the way in which your personality attaches itself and expresses itself in your religion Literal dogmatic religious postures of fundamental and evangelical groups are manifestations of close minded authoritarianism They also reflect militant and extremist dictates for one to follow The manipulation and mind control methods of fear guilt and shame used with people to secure membership and provide group consensus in belief violate the very essence of religion and the basic foundations of what is Healthy Religion Certain attributes of healthy personality produce healthy religion and healthy religion promotes healthy personality You will uncover the ingredients and characteristics of both in this book Visit his website walterkaniaphd.com *The War of the Ghosts and Machines* Mike Hockney,2015-09 Are you a ghost or a machine You don't need to be a superstitious believer to support the side of the ghosts Machine people reduce everything to lifeless mindless purposeless atoms of matter the ultimate little machines For ghost people reality reduces to dimensionless mathematical singularities which are none other

than the hyperrational monadic souls posited by Pythagoras and Leibniz Ghost people subscribe to atoms minds with atomic number zero i e minds souls are made of massless dimensionless photons Machine people start with hydrogen atoms with atomic number one All ghost entities are associated with zero and infinity All machine people deny the existence of zero and infinity Mathematically these are the two numbers where the ghosts and the machines collide head on This book is all about demonstrating that there are indeed ghosts in the machines *Can a Scientist Believe in Miracles?* Ian Hutchinson, 2018-09-11 Plasma physicist Ian Hutchinson has been asked hundreds of questions about faith and science Is God s existence a scientific question Is the Bible consistent with the modern scientific understanding of the universe Are there scientific reasons to believe in God In this comprehensive volume Hutchinson answers a full range of inquiries with sound scientific insights and measured Christian perspective **Spirituality Beyond Science and Religion** Lillian Stover Wells, Jack McMahan, William Pillow, 2012-05-25 Spirituality means something different to everyone Some may believe it involves participating in organized religion Others may prefer it to be more personal like getting in touch with ones inner self through yoga meditation quiet reflection or even long walks A few may find that it lies in finding a new sense of purpose for their lives Spirituality Beyond Science and Religion addresses all of these and more through a new paradigm about life and death It lifts readers above their daily press for competitive survival and success by going to the heart of all spirituality The book disputes traditional sciences claim that physical matter is the only reality It also helps explain enigmas that have confronted orthodox religion for centuries To do so this book correlates published research from nearly one hundred and fifty authors and professionals in medicine neuroscience psychology theology history and metaphysics It explores new insights being revealed through thousands of subjective experiences around the world all of them beyond the ability of science or religion to explain The book therefore not only offers reassurance that death is not final but it also discloses profound implications for how we live our lives on earth The US Review of Books Spirituality Beyond Science and Religion by William Pillow with Jack McMahan and Lillian Stover Wells iUniverse reviewed by Priscilla Estes but deep inside us is the recognition that life can and should have more meaning one that reaches far beyond traditional science and orthodox religion and one that involves all of us The mind body spirit MBS publishing industry has come a long way since the 1960s and 1970s when Aldous Huxley Hermann Hesse and Carlos Castaneda combined Eastern and Western thought in the best sellers Doors of Perception Siddhartha and The Teachings of Don Juan respectively In fact according to religion and publishing expert Elizabeth Puttick MBS publishing is the fastest growing non fiction genre which a quick examination of virtual and real bookstores supports More than ever before great minds race to close the gap between science and religion to answer the questions of where do we come from why are we here and where do we go after death We search for answers inside the human brain the psyche the fetus gravity energy fields near death experiences NDEs universal consciousness time travel soul travel quantum medicine karma dharma and more it s hard for the average person to comprehend let alone keep up Finally

here is a book that helps pull it all together for us written by William Pillow ex US Air Force and retired pharmacist with thirty four years at Eli Lilly Pillow began a quest to discover where we go after death and why when a long and lingering illness befell his wife and he confronted aging Initially a Southern Baptist and a skeptic about all things metaphysical he changed his mind while reading the incredible body of research on soul survival After prodigious investigation much of which concerns NDEs and studies on fetal awareness Pillow concluded there is a soul a God and a Heaven His conclusions may challenge your philosophy but parenthetical documentation and a fifteen page bibliography encourage independent verification The book starts slowly and carefully as Pillow builds his case by conscientiously stitching together scientific religious and metaphysical literature both ancient and modern on the nature of God the spark of life souls the human superconsciousness and Heaven the spirit world The brain begins to smoke while chugging through study after study on NDE s shared NDE s life between lives LBL out of body experiences OBE past life regression after death communications ADC pre birth visions neurological pathways the transcendent source of consciousness the ego and more We long for an index a glossary and less use of quotes around words that don t require them Halfway through our mental labors are rewarded with chapter 7 Our Incomparable Souls This is the heart of the book a behind the scenes look at the soul and a parting of the veil of forgetfulness produced by the ego Pillow discusses studies on fetal consciousness which provide the strongest circumstantial evidence for existence of the soul and gives a moving testament to the soul s purpose to instill compassion empathy and benevolence in its human host The second half of the book flies by as we greedily gobble mainstream studies on energy healing brain waves and the need for face to face friendships in an electronically connected world Tucked unobtrusively at the end of chapter 11 are three paragraphs titled For Me Personally in which the author shares his private definition of faith Such unheralded brevity from a man who once considered entering the Christian ministry shows great respect for the reader and for the role of science in decoding religion and spirituality The final chapter implores us to at least consider the possible importance of these concepts and commentaries for your loved ones and for you Pillow believes that by knowing there is a God a soul and a Heaven we can sustain our inner journey toward purpose and meaning in our lives and that by recognizing our shared humanity we can save civilization One hopes and prays this is true as murders by children mass killings by governments greed corruption materialism apathy mental illness addiction and more threaten to suffocate humanity s life force Pillow is an accomplished author having written or edited five educational textbooks several dozen articles one murder mystery involving reincarnation and the paranormal and five books about the search for self and the meaning of life through science self awareness and spirituality Spirituality Beyond Science and Religion is his first book written with theologian Jack McMahan and clinical psychologist Lillian Stover Wells Pillow brilliantly connects his philosophy on the soul God and Heaven with salient literature in the field of science and religion The MBS genre has come a long way from the Indian fables and drug induced journeys of the sixties and seventies Pillow s overall message that the power of love

is greater than the love of power points us in the right direction for the twenty first century **The Truth Seeker** ,1991

Problems of Living Dan J. Stein,2021-05-11 *Problems of Living Perspectives from Philosophy Psychiatry and Cognitive Affective Science* addresses philosophical questions related to problems of living including questions about the nature of the brain mind reason and emotion happiness and suffering goodness and truth and the meaning of life It draws on critical pragmatic and embodied realism as well as moral naturalism and brings arguments from metaphysics epistemology and ethics together with data from cognitive affective science This multidisciplinary integrated approach provides a novel framework for considering not only the nature of mental disorders but also broader issues in mental health such as finding pleasure and purpose in life Draws on the strongest aspects of polar positions in philosophy and psychiatry to help resolve important perennial debates in these fields Explores continuities between early philosophical work and current cognitive affective sciences including neuroscience and psychology Employs findings from modern cognitive affective science to rethink key long standing debates in philosophy and psychiatry Builds on work showing how mind is embodied in the brain and embedded in society to provide an integrated conceptual framework Assesses both the insights and the limitations of cognitive affective science for addressing the big questions and hard problems of living **Basic Types of Pastoral Care & Counseling** Howard John Clinebell,Howard Clinebell,Bridget Clare McKeever,2011 *Basic Types of Pastoral Care and Counseling* remains the standard in pastoral care and counseling This third edition is enlarged and revised with updated resources methods exercises and illustrations from actual counseling sessions This book will help readers be sensitive to cultural diversity ethical issues and power dynamics as they practice holistic growth oriented pastoral care and counseling in the parish **Suitable Heresies** Graham Rabey,2009 The theory suggests that there is a structural similarity between certain basic brain forms and certain basic mind forms and that the former provide a credible explanation for the latter It does not suggest that the causative link has been proved thereby What is claimed is that in the jungle of brain mind research where fundamental physical evidence for speculation is often in short supply the theory provides a scientifically and philosophically arguable clearing and thus a hypothesis worthy of investigation by anyone interested in the mysteries of human thought One implication of the theory amounts to a central heresy namely that on the accumulating evidence our traditional and much cherished one truth thinking conventions will need to be replaced by two truth thinking conventions Another implication of the theory is that it now seems entirely possible that the emergence and nature of philosophy itself have been crucially dependent on our long human struggle to extract single responses from thinking equipment that appears necessarily i e anatomically double and circular the double cycles being mutually inverted *Science, Religion, and the Meditative Mind* J. Richard Wingerter,2003-05-07 *Meditative mind awareness* gives one a proper understanding of what science and what religion is The meditative mind sees itself as fundamentally different from the scientific mind and from the mind to which ordinary religion relates
