The act of interrogation and the debate over its use pervades our culture whether through fictionalized depictions in movies and television or discussions of real life interrogations on the news But despite daily mentions of the practice in the media there is a lack of informed commentary on its moral implications Moving beyond the narrow focus on torture that has characterized most work on the subject An Ethics of Interrogation is the first book to fully address this complex issue In this important new examination of a controversial subject Michael Skerker confronts a host of philosophical and legal issues from the right to privacy and the privilege against compelled self incrimination to prisoner rights and the legal consequences of different modes of interrogation for both domestic criminal and foreign terror suspects These topics raise serious questions about the morality of keeping secrets as well as the rights of suspected terrorists and insurgents Thoughtful consideration of these subjects leads Skerker to specific policy recommendations for law enforcement military and intelligence professionals

Defendant Participation in the Criminal Process Abenaa Owusu- Bempah, 2016-10-04 Requirements for the defendant to actively participate in the English criminal process have been increasing in recent years such that the defendant can now be penalised for their non cooperation This book explores the changes to the defendant s role as a participant in the criminal process and the ramifications of penalising a defendant s non cooperation particularly its effect on the adversarial system The book develops a normative theory which proposes that the criminal process should operate as a mechanism for calling the state to account for its accusations and request for official condemnation and punishment of the accused It goes on to examine the limitations placed on the privilege against self incrimination the curtailment of the right to silence and the defendant s duty to disclose the details of his or her case prior to trial The book shows that by placing participatory requirements on defendants and penalising them for their non cooperation a system of obligatory participation has developed This development is the consequence of pursuing efficient fact finding with little regard for principles of fairness or the rights of the defendant
