Social Protest in Contemporary China, 2003-2010 Yanqi Tong, Shaohua Lei, 2013-11-12 China's economic transformation has brought with it much social dislocation which in turn has led to much social protest This book presents a comprehensive analysis of the large scale mass incidents which have taken place in the last decade The book analyses these incidents systematically discussing their nature causes and outcomes It shows the wide range of protests tax riots land and labour disputes disputes within companies including private and foreign companies environmental protests and ethnic clashes and shows how the nature of protests has changed over time The book argues that the protests have been prompted by the socioeconomic transformations of the last decade which have dislocated many individuals and groups whilst also giving society increased autonomy and social freedom enabling many people to become more vocal and active in their confrontations with the state It suggests that many protests are related to corruption that is failures by officials to adhere to the high standards which should be expected from benevolent government it demonstrates how the Chinese state far from being rigid bureaucratic and authoritarian is often sensitive and flexible in its response to protest frequently addressing grievances and learning from its own mistakes and it shows how the multilevel

responsibility structure of the Chinese regime has enabled the central government to absorb the shock waves of social protest and continue to enjoy legitimacy

Defending Rights in Contemporary China Jonathan Benney, 2013-02-15 The growth of rights defence movements in China reflects the increasing capacity of Chinese citizens to shape their own civic discourse in order to achieve diverse goals Rights defence campaigns have taken novel forms which are unprecedented in China including the use of the Internet by rights campaigners the development of rights entrepreneurs and the selection of representatives and leaders in rights defence campaigns *Defending Rights in Contemporary China* offers the first comprehensive analysis of the emergence and development of notions of rights defence or weiquan in China Further it shows that rights defence campaigns reflect the changing lives and priorities of Chinese citizens both urban and rural and the changing distribution of power in China The Chinese government first used rights defence to promote the law and protect the rights of the weak But the use of rights defence strategies by private citizens and lawyers also demonstrates changing power structures in areas as diverse as private property rights rights for the handicapped corruption claims and grievances with officials In this book Jonathan Benney argues that the idea of rights defence has gone from being a tool of the government to being a tool to attack the party state and explores the consequences of this controversial activist movement This book offers essential insight into the development of rights in contemporary China and will be highly relevant for students scholars and specialists in legal developments in Asia as well as anyone interested in social movements in China

Useful Complaints Jing Chen, 2016-09-09 This book develops an informational theory to account for the coexistence of China's exceptionally resilient authoritarianism and its high decentralization The nuanced information contained in citizens complaints which are filed through the petition system helps to sustain China's decentralized authoritarianism in three important ways First petitions help to alleviate the information asymmetry problem that arises when the central government has less information than lower level governments do When studying citizens petitions higher level governments can obtain valuable and accurate information about local officials performance in policy implementation public goods provision and corruption Higher level governments need this information in order to effectively utilize the cadre management system to reward good performance and punish malpractice

The result of this interaction is the PRC's relatively high quality of governance and effective control of local officials. There is also a second way in which citizens' petitions help the government to overcome the dictator's dilemma that arises when an authoritarian regime is uncertain about how much support it really enjoys among its citizens. Citizens' specific grievances are revealed in these petitions and are mostly addressed in their beginning stages. When citizens' complaints are rooted in central policy, they set the agenda for policy change in order to maintain social order. There is yet a third benefit conferred upon the PRC by the petition system. Thanks to the petition system, the central government can present itself as the ally of citizens when it addresses the matters raised by their petitions. As a result, the petition system grants the central government an opportunity to hold local officials accountable. Scapegoat local authorities divide citizens and local officials and justly claim all the credit when its policies succeed. This helps to build citizens' trust in their central government and reinforces its legitimacy in their eyes. In Huntington's terms, the Chinese Communist Party institutionalizes mass support by addressing citizens' grievances expressed through the channel of communication provided by the petition system. In this sense, the complaints of citizens can be very useful tools for regime maintenance. The author substantiates these points with case studies and statistical analysis.

Power versus Law in Modern China Qiang Fang, Xiaobing Li, 2017-11-15. Today 700 million Chinese citizens, more than fifty-four percent of the population, live in cities. The mass migration of rural populations to urban centers increased rapidly following economic reforms of the 1990s, and serious problems such as overcrowding, lack of health services, and substandard housing have arisen in these areas. Since China's urban citizens have taken to the courts for redress and fought battles over failed urban renewal projects, denial of civil rights, corruption, and abuse of power. In *Power versus Law in Modern China*, Qiang Fang and Xiaobing Li examine four important legal cases that took place from 1995 to 2013 in the major cities of Wuhan, Xuzhou, Shanghai, and Chongqing. In these cases, citizens protested demolition of property as well as corruption among city officials, developers, and landlords but were repeatedly denied protection or compensation from the courts. Fang and Li explore how new interest groups comprised of entrepreneurs and Chinese graduates of Western universities have collaborated with the CCP-controlled local governments to create new power bases in cities. Drawing on newly available official sources, private collections, and interviews with Chinese administrators, judges, litigants, petitioners, and legal experts, this interdisciplinary analysis reveals the powerful and privileged will most likely continue to exploit the legal asymmetry that exists between the courts and citizens.

Politics in China William A. Joseph, 2019. On October 1, 2019, the People's Republic of China (PRC) will celebrate the 70th anniversary of its founding. And what an eventful and tumultuous seven decades it has been. During that time, under the leadership of the Chinese Communist Party (CCP), China has been transformed from one of the world's poorest countries into one of its fastest growing economies and from a weak state barely able to govern or protect its own territory to a rising power that is challenging the United States for global influence. But in the late 1950s, the PRC experienced the most deadly famine in human history, caused largely by the actions and inactions of

its leaders Not long after there was a collapse of government authority that pushed the country to the brink of and in some places actually into civil war and anarchy And in 1989 the CCP unleashed the army to brutally crush demonstrations by students and others calling for political reform China is now for the most part peaceful prospering and proud The CCP maintains a firm grip on power through a combination of harsh repression and popular support largely based on its recent record of promoting rapid economic growth Yet the party and country face serious challenges on many fronts including a slowing economy environmental desecration pervasive corruption extreme inequalities ethnic unrest and a rising tide of social protest Politics in China provides an accessible yet authoritative introduction to how the world s most populous nation and rapidly rising global power is governed today The third edition has been extensively revised thoroughly updated and includes a new chapter on the internet and politics in China The book s chapters provide overviews of major periods in China s modern political history from the mid nineteenth century to the present examinations of key topics in contemporary Chinese politics and analyses of developments in four important areas located on China s geographic periphery Tibet Xinjiang Hong Kong and Taiwan

Towards a New Development Paradigm in Twenty-first Century China Éric Florence, Pierre Defraigne, 2013 This book argues that the current state of China requires an important paradigm shift in the way the party state manages the country's development and goes on to assess the fitness of the party state for implementing such a paradigm shift and the likelihood of the party state bringing this about It brings together an examination of the very latest situation in a range of key areas where current developments have the potential to undermine substantially the status quo areas such as the recent economic crisis and the resulting economic slowdown increasing labour unrest mounting calls for social justice worsening urban rural disparity the urgent need to implement social welfare programmes the rise of civil society and the impact of new media Overall the book provides a thorough appraisal of the difficulties which China currently faces *Will China Democratize?* Andrew J. Nathan, Larry Diamond, Marc F. Plattner, 2013-09-01 Leading experts on China offer their enlightening analysis on one of the most crucial and complex questions facing the future of international politics Moving toward open markets and international trade has brought extraordinary economic success to China yet its leadership still maintains an authoritarian grip over its massive population From repressing political movements to controlling internet traffic China's undemocratic policies present an attractive model for other authoritarian regimes But can China continue its growth without political reform In *Will China Democratize* Andrew J Nathan Larry Diamond and Marc F Plattner present valuable analysis for anyone wondering if when or how China might evolve politically Since the *Journal of Democracy*'s very first issue in January 1990 which featured articles reflecting on the then recent Tiananmen Square massacre the Journal has regularly published articles about China and its politics By bringing together the wide spectrum of views that have appeared in the Journal's pages from contributors including Fang Lizhi Perry Link Michel Oksenberg Minxin Pei Henry S Rowen and Nobel laureate Liu Xiaobo *Will China Democratize* provides a clear view of the complex forces driving change in China's regime and society *China's Water Warriors* Andrew C. Mertha, 2014-10-03 Today opponents of large scale dam projects in China rather than being greeted with indifference or repression are part of the hydropower policymaking process itself What accounts for this dramatic change in this critical policy area surrounding China's insatiable quest for energy In *China's Water Warriors* Andrew C Mertha argues that as China has become increasingly market driven decentralized and politically heterogeneous the control and management of water has transformed from an unquestioned economic imperative to a

lightning rod of bureaucratic infighting societal opposition and open protest Although bargaining has always been present in Chinese politics more recently the media nongovernmental organizations and other activists actors hitherto denied a seat at the table have emerged as serious players in the policy making process Drawing from extensive field research in some of the most remote parts of Southwest China China's Water Warriors contains rich narratives of the widespread opposition to dams in Pubugou and Dujiangyan in Sichuan province and the Nu River Project in Yunnan province Mertha concludes that the impact and occasional success of such grassroots movements and policy activism signal a marked change in China's domestic politics He questions democratization as the only or even the most illuminating indicator of political liberalization in China instead offering an informed and hopeful picture of a growing pluralization of the Chinese policy process as exemplified by hydropower politics For the 2010 paperback edition Mertha tests his conclusions against events in China since 2008 including the Olympics the devastating 2008 Wenchuan earthquake and the Uighar and Tibetan protests of 2008 and 2009
