Rights and the Common Good: The Communitarian Perspective

Amital Etzioni. Ed. 1995. New York: St. Martin's Press. 293 pp.

Robert C. Schehr,
University of Illinois – Springfield

Rights and the Common Good is comprised of five parts dedicated to articulation of the "Communitarian Paradigm," "Policy Applications," "Moral Infrastructure," "Shoring Up Communities," and guidance "Toward a Responsive Community." There are thirty separate entries comprising some of the most notable contributors to the communitarian literature (e.g., Robert Bellah, Christopher Lasch, Benjamin Barber, Robert Dahl). This review will focus on the contribution of Etzioni, then attempt to address in aggregate form specific themes emerging in the separate parts.

Etzioni inaugurates *Rights and the Common Good* with his "Introduction" and "Preamble" to the "Responsive Communitarian Platform." The "Introduction" is noteworthy on two counts, first, it reaffirms the communitarian commitment to "rights with responsibilities" by calling for a moratorium on new rights, what Etzioni refers to as "limiting adjustments." Etzioni contends that this is in keeping with a communitarian commitment to "balancing social forces," (that is balancing liberalism with republicanism), and the moral repudiation of individuals who take from the community without giving back. The second theme projected in the "Introduction" addresses virtue. Etzioni contends that communitarians seek the realization of shared virtues as a foundation from which to establish localized notions of the "good." Neither concept is defined.

The "Preamble" is more expansive. In it Etzioni makes a case for a society constituted by "a regime of rights" where attention is directed at cultivating greater responsibility between public and private, and the individual and collective spheres. He argues for participatory democracy, not majoritarianism, where policy decisions emerge from informed discourse constituted by shared values. The communitarian directive on moral education comprises the middle third of the "Preamble." The family (another amorphous concept in Etzioni's presentation) occupies center stage as the progenitor of moral guidance, responsible for the transmission of "moral education and character formation." It would be naive to think that Etzioni's configuration of character is not imbued with a value to his liking, but he refrains from overtly tipping his hand.

Understanding Dogmas and Dreams Nancy S. Love, 2006-02-09 Nancy Love's concise yet complete volume aims to inform students of their choices among political values. By exploring the assumptions of various ideologies and comparing their positions, students begin to understand political alternatives to be able to choose among them. In essence, they learn to think democratically. Offering historical and analytic context for the selections in her companion reader *Dogmas and Dreams*, Love challenges students to consider the various ways ideological frameworks shape political actions. Reframing her approach in this second edition, Love examines how traditional left-right ideologies—liberalism and conservatism, socialism and fascism—are shifting to adapt to new political realities in an ever-turbulent post-9/11 world. She also discusses why alternative ideologies—feminism, environmentalism, fundamentalism, and globalization—may better convey our global political future. While pushing the boundaries of the left-right political spectrum, she looks at how grassroots social movements offer alternative ways to view ideological differences, from cluster concepts to micro-discourses and even a planetary galaxy. Expanded coverage includes a new chapter on nationalism and globalization, which examines the work of Samuel Huntington, Kenichi Ohmae, Benjamin Barber, and many more to explore fundamentalism in Islamic politics; increased coverage of global environmental politics, including Shiva's *Stolen Harvest* and Kelly's *Thinking Green*, examining the relationships between developed and developing countries; fresh material on socialist politics post-1989 and the rise of neo-fascist movements in the United States and Europe, including analysis of Hayden and Flacks' *The Port Huron Statement* at 40 and Bob Moser's *The Age of Rage*; an updated feminism chapter that considers the impact of third-wave post-colonial and so-called power feminists and incorporates new analysis of Wollstonecraft's *A Vindication of the Rights of Woman* and Mohanty's *Under Western Eyes Revisited*.

Health Care Policy in an Age of New Technologies Kant Patel, Mark E. Rushefsky, 2015-05-20 Revolutionary advances in biomedical research and information systems technology pose new and difficult issues for American health care policy, especially in the context of managed care. *Health Care Policy in a New Millennium* takes on this challenging array of

issues where the dignity of individual life meets the imperatives of national level health care systems patients rights rationing of care organ transplants genetic research confidentiality of medical records the right to die and other ethical dilemmas The book places these critical questions about the quality of life in our society in their political legal social economic and ethical contexts Business Education and Training: Instilling values in the educational process Samuel M. Natale, Mark B. Fenton, 1997 Co published with the Oxford Philosophy Trust this third volume of collected papers focuses on the moral and ethical concerns and theological reflections encountered in professional training Essential for those involved in the instruction and training of other professionals *Characteristics of a Profession* Artur Victoria, 2025-04-02 The sociological understanding of professions goes beyond a simple job description to address the complex interplay of expertise social power and ethical responsibility Defining a profession requires going beyond the superficial aspects of work to consider the intricate web of social structures and relationships that shape the practice and perception of different occupations This is not a static definition but a dynamic process subject to historical and societal influences A key characteristic is the possession and application of specialised knowledge This knowledge is not just technical skills but a deep understanding of principles theories and methodologies that requires extensive education and training This expertise is the basis of professional authority and legitimacy It enables professionals to make informed judgements and decisions that others who lack this expertise cannot This expertise isn't simply acquired through rote learning it's refined through experience and continuing professional development further enhancing the professional's authority and credibility Another characteristic is autonomy Professions have considerable control over their own work processes This includes setting standards of practice regulating entry to the profession and maintaining disciplinary mechanisms for members who breach these standards This self regulation is crucial in ensuring the quality of professional work and the protection of the public interest The medical profession for example sets rigorous standards for medical education and licensing to ensure that only qualified individuals can practice medicine Similarly the legal professions maintain strict codes of conduct and disciplinary procedures to deal with instances of professional misconduct thus maintaining the integrity of the legal system However this autonomy is not absolute it's a negotiated balance constantly refined by societal expectations and legal frameworks The degree of autonomy varies from profession to profession and is often challenged by external forces such as government regulation or technological advances The concept of self regulation is inextricably linked to the ethical responsibilities inherent in professional practice Professions are expected to adhere to strict ethical codes that place the welfare of their clients or patients above personal gain These ethical codes are more than a set of rules they represent a commitment to uphold the trust that society places in professionals Breaches of this trust can have devastating consequences eroding public confidence and undermining the legitimacy of the profession Medical malpractice legal malpractice and engineering failures all illustrate the potentially disastrous consequences of professionals failing to meet their ethical obligations The ethical dimension

reinforces the social contract between professionals and the public a reciprocal agreement whereby professionals receive privileged status in exchange for service to the public good Distinguishing professions from mere occupations highlights the essential distinction between expertise and specialised knowledge While occupations involve specific skills and training professions involve a higher degree of autonomy self regulation and ethical responsibility The distinction isn't always clear cut and some professions aspire to professional status a process known as professionalization This process typically involves a formalised educational structure the establishment of professional associations the development of professional codes of conduct and efforts to gain legal recognition and regulatory authority The evolution of nursing from a largely informal occupation to a highly regulated profession over the last century illustrates this dynamic The historical development of professions provides a rich background for understanding their current characteristics The medical profession for example underwent a long process of professionalization moving from a largely unregulated practice to a highly specialised and regulated field This process involved the development of medical schools the establishment of licensing boards and the creation of professional associations The legal profession followed a similar trajectory with the establishment of law schools bar associations and rigorous licensing requirements However the trajectories of different professions were different influenced by social economic and political forces The interplay of these forces highlights the social construction of professions their characteristics and boundaries are not inherent but rather shaped by social processes and power dynamics The digital age has brought significant changes to the scenery of professions Technological advances have affected the nature of professional work blurring traditional limitations and creating new opportunities and challenges Telemedicine online legal services and remote engineering consultations have changed the way professionals interact with their clients and colleagues This digital transformation also requires the adaptation of ethical frameworks and regulatory mechanisms to address unique challenges such as data privacy cyber security and the potential for bias in algorithmic decision making The evolving nature of professional work in the digital age requires continuous reassessment of professional standards to ensure they remain relevant and effective in a rapidly changing world This ongoing adaptation demonstrates the dynamic nature of professions a constant negotiation between established norms and emerging realities Exploring these changes is essential to understanding the future of professions and their role in society The rapid pace of change requires an ongoing dialogue between professionals policy makers and the public to ensure that professional practice remains aligned with societal values and expectations The ongoing challenge is to promote a balance between innovation and ethical considerations and to maintain the integrity and public trust that underpin the professional enterprise Professional power is not simply the ability to perform a specific task it's a multifaceted phenomenon woven into the fabric of social control It derives from the specialised knowledge and skills that professionals possess giving them authority and influence far beyond the technical aspects of their work This power manifests itself in a variety of ways shaping social norms influencing policy decisions and

even affecting the distribution of resources and opportunities The ability to diagnose disease represent clients in court or design safe infrastructure all carry an inherent power that stems from societal dependence on these specialised skills However this dependence requires careful consideration of the potential for misuse and abuse of this power **The**

The proposition that the tort of defamation protects reputation has long been axiomatic in the law The axiom's endurance is surprising it has long been observed that the law is riddled with inconsistencies and moreover the courts and the scholarly literature have rarely discussed exactly what reputation is and how judgments about reputation are made Reputation and Defamation develops a theory of reputation and uses it to analyze evaluate and propose a revision of the law It is the first book to present a comprehensive study of what reputation is how it functions and how it is and should be protected under the law Reputation it argues is best understood in terms of the moral judgments a community makes about its members Viewed in this way it becomes apparent contrary to the legal orthodoxy that defamation law did not really aim and function to protect reputation until the early nineteenth century A revised legal framework is proposed It rethinks how and why different criteria for moral judgment should or should not be recognized when courts determine whether an attack on reputation will be actionable as defamation It is argued that the right thinking person should be associated with an inclusive liberal premise of equal moral worth and a shared commitment to moral diversity The proposed framework demands that when courts recognize values at odds with that premise then such recognition must be justified on sound and expressly stated ethical grounds That demand serves to protect reputation appropriately and effectively in an age of moral diversity *Correctional Mental Health*

Negotiating Postmodernism Wayne Gabardi,2001 Joining the modern postmodern debate this book suggests that the polarizing polemics of the radical postmodernists who once dominated the discussion have given way to a new critical postmodernism characterized by dialogue accommodation and synthesis A comprehensive survey Negotiating Postmodernism also marks the arrival of a powerful critical presence on the scene one that advances the idea of a late modern postmodern social and cultural transition

Debating Human Rights in China Marina Svensson,2002 Drawing on little known sources Marina Svensson argues that the concept of human rights was invoked by the Chinese people well before the adoption of the Universal Declaration of Human Rights in 1948 and it has continued to have strong appeal after 1949 both in Taiwan and on the mainland These largely forgotten debates provide important perspectives on and contrasts to the official PRC line The author gives particular attention to the issues of power and agency in describing the widely divergent views of official spokespersons establishment intellectuals and dissidents Until recently the PRC dismissed human rights as a bourgeois slogan yet the globalization of human rights and the growing importance of the issue in bilateral and multilateral relations has grown Thus the regime has been forced to embrace or rather appropriate the language of human rights an appropriation that continues to be vigorously challenged by dissidents at home and abroad
