Rights From The Sea:

International Law and the Protection of People at Sea Irini Papanicolopulu, 2018-03-09 Media interest in the fates of people at sea has heightened across the last decade The attacks and the hostage taking of victims by Somali pirates and the treatment of migrants and asylum seekers in the Mediterranean ask pressing questions as does the sinking of the Costa Concordia off the Italian island of Giglio which one hundred years after the Titanic capsized reminded the world that despite modern navigation systems and technology shipping is still fallible Do pirates have human rights Can migrants at sea be turned back to the State from which they have sailed How can the crews of vessels be protected against inhuman and degrading working and living conditions And are States liable under international human rights treaties for arresting drug traffickers on the high seas The first text to comprehensively compare the legal rights of different people at sea Irini Papanicolopulu s timely text argues that there is an overarching duty of the state to protect people at sea and adopt all necessary acts with a view towards ensuring enjoyment of their rights Rather than being in doubt she reveals that the emerging law in this area is watertight

The International Law of the Sea Yoshifumi Tanaka, 2023-03-02 Provides clear systematic and comprehensive coverage of fundamental and contemporary issues of the law of the sea

The Law of the Sea Robin Rolf Churchill, Alan Vaughan Lowe, 1983 Introductory survey covering 1982 U N Convention on the Law of the Sea and the customary and conventional law which supplements it

Aboriginal Customary Law: A Source of Common Law Title to Land Ulla Secher, 2014-12-01 Described as ground breaking in Kent McNeil s Foreword this book develops an alternative approach to conventional Aboriginal title doctrine It explains that aboriginal customary law can be a source of common law title to land in former British colonies whether they were acquired by settlement or by conquest or cession from another colonising power The doctrine of Common Law Aboriginal Customary Title provides a coherent approach to the source content proof and protection of Aboriginal land rights which overcomes problems arising from the law as currently understood and leads to more just results The doctrine s applicability in Australia Canada and South Africa is specifically demonstrated While the jurisprudential underpinnings for the doctrine are consistent with fundamental common law principles the author explains that the Australian High Court s decision in Mabo provides a broader basis for the doctrine a broader basis which is consistent with a re evaluation of case law from former British colonies in Africa as well as from the United States New Zealand and Canada In this context the book proffers a reconceptualisation of the Crown s title to land in former colonies and a reassessment of conventional doctrines including the doctrine of tenure and the doctrine of continuity With rare exceptions the existing literature does not probe as deeply or question fundamental assumptions as thoroughly as Dr Secher does in her research She goes to the root of the conceptual problems around the legal nature of Indigenous land rights and their vulnerability to extinguishment in the former colonial empire of the Crown This book is a formidable contribution that I expect will be influential in shifting legal thinking on Indigenous land rights in progressive new directions

International Courts and the Development of International Law Nerina Boschiero, Tullio Scovazzi, Cesare Pitea, Chiara Ragni, 2013-03-15 This book contains a collection of essays by leading experts linked to the outstanding characteristics of the scholar in honour of whom it is published Tullio Treves who combines his academic background with his practical experiences of a negotiator of international treaties and a judge of an international tribunal It covers international public and private law related to international courts and the development of international law Under Article 38 of its Statute the International Court of Justice can apply judicial decisions only as a subsidiary means for the determination of rules of law However there are many reasons to believe that international courts and tribunals do play quite an important role in the progressive development of international law There are a number of decisions which are inevitably recalled as the first step or a decisive step in the process of the formation of a new rule of customary international law In these cases can the judge be considered as a subsidiary of others Are these cases compatible with the common belief that a judge cannot create law Is this a peculiarity of international law which is characterized by the existence of several courts but the lack of a legislator Do decisions by different courts lead to the consequence of a fragmented international law This volume provides the reader with an elaboration of various questions linked to the legislative role of courts In their choices of subjects some contributors have taken into account the general aspects of the development of international rules through court decisions or specific sectors of international law such as human rights international crimes international economic law environmental law and the law of the sea Others have chosen the subject of the rules on jurisdiction and procedure of international courts The question of the courts role in the development of areas of law different from public international law namely private international law and European Union law has also been considered The information and views contained in this book will be of great value to academics students judges practitioners and all others interested in the public and private international law aspects of the link between international courts and the development of international law

The Routledge Handbook of International Law and Anthropocentrism Vincent Chapaux, Frédéric Mégret, Usha Natarajan, 2023-06-15 This handbook explores contextualises and critiques the relationship between anthropocentrism the idea that human beings are socially and politically at the centre of the cosmos and international law While the critical study of anthropocentrism has been under way for several years it has either focused on specific subfields of international law or emanated from two distinctive strands inspired by the animal rights movement and deep ecology This handbook offers a broader study of anthropocentrism in international law as a global legal system and academic field It assesses the extent to which current international law is anthropocentric contextualises that claim in relation to broader critical theories of anthropocentrism and explores alternative ways for international law to organise relations between humans and other living and non living entities This book will interest international lawyers environmental lawyers legal theorists social theorists and

those concerned with the philosophy and ethics of ecology and the non human realms Chapter 6 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license Funded by University of Gothenburg and Lund University
