Gill, Dieter Fleck, 2015 Based on best practice rules of global importance this handbook offers authoritative commentary and analysis of the international law of military operations encompassing self defence peace operations and other uses of force **Due Diligence Obligations in International Human Rights Law** Maria Monnheimer, 2021-02-18 An analytical framework of due diligence obligations to address the increasing prevalence of non State human rights risks *The Practice of Shared Responsibility in International Law* André Nollkaemper, Ilias Plakokefalos, 2017-02-02 This is the third book in the series *Shared Responsibility in International Law* which examines the problem of distribution of responsibilities among multiple states and other actors In its work on the responsibility of states and international organisations the International Law Commission recognised that attribution of acts to one actor does not exclude possible attribution of the same act to another state or organisation Recognising that the applicable rules and procedures for shared responsibility may differ between particular issue areas this volume reviews the practice of states international organisations courts and other bodies that have dealt with the issue of international responsibility of multiple wrongdoing actors in a wide range of issue areas

including energy extradition investment law NATO led operations and fisheries These analyses jointly assess the fit of the prevailing principles of international responsibility and provide a basis for reform and further development of international law State Responsibility, Climate Change and Human Rights under International Law Margaretha

Wewerinke-Singh, 2019-03-21 The last decade has witnessed an increasing focus on the relationship between climate change and human rights Several international human rights bodies have expressed concern about the negative implications of climate change for the enjoyment of human rights and the Paris Agreement is the first multilateral climate agreement to refer explicitly to states human rights obligations in connection with climate change Yet despite this there are still significant gaps in our understanding of the role of international human rights law in enhancing accountability for climate action or inaction As the Paris Agreement has shifted the focus of the climate change regime towards voluntary action and the humanitarian impacts of climate change are increasingly being felt around the world accountability for climate change has become an increasingly salient issue This book offers a timely and comprehensive analysis of the legal issues related to accountability for the human rights impact of climate change drawing on the state responsibility regime It explains when and where state action relating to climate change may amount to a violation of human rights and evaluates various avenues of legal redress available to victims The overall analysis offers a perceptive insight into the potential of innovative rights based climate actions to shape climate and energy policies around the world **Corporate Obligations under International**

Law Markos Karavias, 2013-11-28 This book examines the extent to which international law places obligations directly on corporate entities It is often argued that corporations are bound by inter alia the same human rights and environmental obligations that states have This book examines the source of these supposed obligations in treaty law international custom and in internationalized contracts to determine whether they really can be transposed to corporations so easily The focus of the book is on the regulation by international law of private corporate conduct It examines whether corporate obligations namely obligations binding directly upon a corporation under positive international law have indeed emerged and if so whether corporations may be systemically included in the predominantly state centric framework of international law It investigates the challenges facing international law as a result of the potential emergence of corporate obligations and engages in a structural analysis of what corporate obligations under international human rights law might entail Ultimately it warns against conceptualizing corporations as both holders and potential violators of human rights explaining why they are not automatically bound by the same obligations that are imposed on states **The EU's Human Rights Responsibility**

Gap Joyce De Coninck, 2024-11-14 Can the EU be held legally responsible for its contributions to human rights harms in its Integrated Border Management policy Or do systemic legal design flaws in the EU's human rights responsibility regime give rise to a significant responsibility gap This book delves into these pressing questions offering a transversal analysis of applicable legal frameworks under international and EU law Divided into three parts the book first analyses the international

and EU human rights responsibility frameworks revealing both normative incongruency as well as liability incongruency Part two applies these frameworks to specific illustrations within the four tiers of the EU's Integrated Border Management exposing the critical points where responsibility falters Building on these findings and drawing from shared responsibility and relationality theories part three briefly introduces Relational Human Rights Responsibility as an alternative method to ascertaining human rights responsibility of the EU specifically and international organisations more generally

Theory of Obligations in International Law Cezary Mik, 2024-05-07 Examining the fulfilment of international obligations by subjects of this law this book explores the normative and functional links between the sources and rules of international law on the one hand and the responsibility for violating international law on the other In the sphere of law making the theory of obligations allows for a more precise and considered formulation of international obligations It has the potential to enable subjects of international law to behave more rationally allowing deeper reflection on whether to take on obligations and how to properly perform them This book proposes a new approach to the issue of the proper operation of international law with the theory of obligations at its heart Linking the institutions and concepts of international law into a rational whole the book offers an analysis of the operation of international law and the behaviour of its subjects to develop a framework for ensuring the ultimate effectiveness of international law Analysing sources of law including treaties and common law alongside the resolutions of international organisations this book demonstrates the practical application of the subject with reference to the jurisprudence of international courts and other bodies The volume will be of interest to scholars students and practitioners concerned with international law its creation performance application compliance and enforcement

International Human Rights Law and Practice Ilias Bantekas, Lutz Oette, 2016-09-29 The second edition of this innovative textbook explores human rights law through an engaging combination of theory and practice

State Responsibility for Non-State Actors Richard Mackenzie-Gray Scott, 2022-09-08 This book investigates how state responsibility can be determined for the wrongdoing of non state actors Every day people businesses and societies around the world pay a price arising from interactions between states and non state actors From insurrections that attempt to create new governments to states arming belligerent proxies operating overseas to companies damaging natural environments or providing suspect services the impact of such situations are felt in numerous ways They also raise many questions relating to responsibility In answering these State Responsibility for Non State Actors provides a picture of what the law governing this area is what it could be and what it should be in light of past histories present realities and future prospects

International Law Obligations on Climate Change Mitigation Benoit Mayer, 2022-07-11 Recent years have witnessed exciting developments in international negotiations litigation and

scholarship about climate change but doctrinal research in the field remains in its infancy In particular little is known about how fast states are required to limit and reduce their greenhouse gas emissions The first part of the book identifies the relevant obligations through an analysis of treaties custom and other sources of international law Beyond express quantified commitments contained for instance in nationally determined contributions the book sheds light on the existence of general obligations of due diligence While these general obligations are difficult to interpret they are often more demanding The second part explores how these general obligations can be applied objectively for instance by a court in concrete cases Instead of an improbable judicial assessment of a state's requisite level of mitigation action the book shows the possibility of assessing a state's conduct based on the measures that general mitigation obligations entail These measures relate to corollary duties of cooperation vigilance and consistency This book presents a first comprehensive doctrinal study of states obligations on climate change mitigation It shows that such obligations arise not only from climate treaties but also from customary international law unilateral declarations and possibly human rights treaties It also explores the interactions between these multiple obligations

Obligations Erga Omnes and International Crimes André de Hoogh, 2023-12-18 This book provides a comprehensive analysis of the law of State responsibility It addresses fundamental questions such as which subjects of international law are entitled to invoke the responsibility of the author state the forms of reparation demands which may be made and the means and counter measures including the use and level of force which may be employed to enforce demands Audience Academics and researchers in international law

State Responsibility in the International Legal Order Katja Creutz, 2020-09-24 The book analyzes State responsibility in international law from a holistic and critical perspective

Complicity and its Limits in the Law of International Responsibility Vladyslav Lanovoy, 2016-09-22 This book examines the responsibility of States and international organizations for complicity aid or assistance in an internationally wrongful act Despite the recognition of responsibility for complicity as a rule of customary international law by the International Court of Justice this book argues that the effectiveness and utility of this form of responsibility is fraught with systemic and operational limits These limits include a lack of clarity in its constituent elements its co existence with primary rules prohibiting complicity and the obligations of due diligence its implementation and the underlying causal tests its uncertain relationship to other forms of shared and indirect responsibility and its potential as a form of attribution of conduct This book submits that the content and elements of this form of responsibility need adjustments to respond more effectively to the phenomenon of complicity in international affairs Awarded The Paul Guggenheim Prize in International Law 2017

The Role of Ethics in International Law Donald Earl Childress, III, 2011-11-14 The purpose of this book is to explore what role ethical discourse plays in public and private international law The book seeks 1 to delineate the role of ethical investigation in creating sustaining challenging and changing international law and 2 to open up a conversation between two related disciplines public and private international law that frequently labor in different vineyards By examining the role of

ethical discourse in international law's public and private dimensions this volume will hopefully open new avenues for cross disciplinary exchange in these important fields and related disciplines The chapters in this book show that there is a way to engage the ethical dimension of international law without seeking to use ethics as raw politics and the will to power
