Rise And Fall Of An Urban School System Detroit 1907 1981:

The Origins of the Urban Crisis Thomas J. Sugrue, 2014-04-27 The reasons behind Detroit's persistent racialized poverty after World War II. Once America's arsenal of democracy, Detroit is now the symbol of the American urban crisis. In this reappraisal of America's racial and economic inequalities, Thomas Sugrue asks why Detroit and other industrial cities have become the sites of persistent racialized poverty. He challenges the conventional wisdom that urban decline is the product of the social programs and racial fissures of the 1960s. Weaving together the history of workplaces, unions, civil rights groups, political organizations, and real estate agencies, Sugrue finds the roots of today's urban poverty in a hidden history of racial violence, discrimination, and deindustrialization that reshaped the American urban landscape after World War II. This Princeton Classics edition includes a new preface by Sugrue discussing the lasting impact of the postwar transformation on urban America and the chronic issues leading to Detroit's bankruptcy.

The Failed Century of the Child Judith Sealander, 2003-11-03 Charts the effort to use state regulation to guarantee health and security for America's children.

Inequity in Education Debra Meyers, Burke Miller, associate professor of history, social studies education specialist, Northern Kentucky University, 2009-10-29 Inequity in Education represents the latest scholarship investigating issues of race, class, ethnicity, religion, gender, and national identity formation that influenced education in America throughout its history. This exciting collection of cutting-edge essays and primary source documents represents a variety of theoretical and methodological perspectives that will appeal to both social and cultural historians as well as those who teach education courses, including introductory surveys and foundations courses.

Demolition Means Progress Andrew R. Highsmith, 2016-12-30 Flint, Michigan is widely seen as Detroit's Detroit, the perfect embodiment of a ruined industrial economy and a shattered American dream. In this deeply researched book, Andrew Highsmith gives us the first full-scale history of Flint, showing that the Vehicle City has always seen demolition as a tool of progress. During the 1930s, officials hoped to renew the city by remaking its public schools into racially segregated community centers. After the war, federal officials and developers sought to strengthen the region by building subdivisions in Flint's segregated suburbs, while GM executives and municipal officials demolished urban factories and rebuilt them outside the city. City leaders later launched a plan to replace black neighborhoods with a freeway and new factories. Each of these campaigns, Highsmith argues, yielded an ever more impoverished city and a more racially divided metropolis. By intertwining histories of racial segregation, mass suburbanization, and industrial decline, Highsmith gives us a deeply unsettling look at urban industrial America.

Racism in the Neoliberal Era Randolph Hohle, 2025-08-22 Racism in the Neoliberal Era explains how simple racial binaries like black/white are no longer sufficient to explain the persistence of racism, capitalism, and elite white power. The neoliberal era features the largest Black middle class in US history and extreme racial marginalization. Racial languages change the meaning of public and private political economy's two fundamental terms. Randolph Hohle focuses on how the origins and

expansion of neoliberalism depended on a racial language of white private black public The language of neoliberalism explains how the white racial frame operates like a web of racial meanings that connect social groups with economic policy geography and police brutality When America was racially segregated elites consented to political pressure to develop and fund white public institutions The Black civil rights movement eliminated legal barriers that prevented racial integration The elite white response to Black civic inclusion was to deregulate the Voting Rights Act and banking policy Elites gave themselves tax cuts and implemented austerity measures on government programs to aid the poor They privatized neighborhoods schools and social welfare creating markets around poverty They oversaw the mass incarceration and systemic police brutality against people of color Citizenship was recast as a privilege instead of a right Neoliberalism is the result of an elite white meta strategy to maintain political and economic power This new edition is thoroughly revised and updated to take account of the further history and debates over neoliberalism in the Trump and Biden eras and the significant social and political discussions around race and racism policing housing health care and citizenship as they interconnect with the American neoliberal economic and political system The new edition will be a vital textbook for students instructors and researchers in sociology politics race and economics **Schools of Our Own** Worth Kamili

Hayes, 2019-12-15 Winner 2020 American Educational Studies Association Critics Choice Award As battles over school desegregation helped define a generation of civil rights activism in the United States a less heralded yet equally important movement emerged in Chicago Following World War II an unprecedented number of African Americans looked beyond the issue of racial integration by creating their own schools This golden age of private education gave African Americans unparalleled autonomy to avoid discriminatory public schools and to teach their children in the best ways they saw fit In **Schools of Our Own** Worth Kamili Hayes recounts how a diverse contingent of educators nuns and political activists embraced institution building as the most effective means to attain quality education **Schools of Our Own** makes a fascinating addition to scholarly debates about education segregation African American history and Chicago still relevant in contemporary discussions about the fate of American public schooling Parents and Schools William W. Cutler, 2015-05-01 Who holds ultimate authority for the education of America's children teachers or parents Although the relationship between home and school has changed dramatically over the decades William Cutler's fascinating history argues that it has always been a political one and his book uncovers for the first time how and why the balance of power has shifted over time Starting with parental dominance in the mid nineteenth century Cutler chronicles how schools growing bureaucratization and professionalization allowed educators to gain increasing control over the schooling and lives of the children they taught Central to his story is the role of parent teacher associations which helped transform an adversarial relationship into a collaborative one Yet parents have also been controlled by educators through PTAs leading to the perception that they are company unions Cutler shows how in the 1920s and 1930s schools expanded their responsibility for children's well being

outside the classroom These efforts sowed the seeds for later conflict as schools came to be held accountable for solving society's problems Finally he brings the reader into recent decades in which a breakdown of trust racial tension and parents' rights have taken the story full circle with parents and schools once again at odds Cutler's book is an invaluable guide to understanding how parent teacher cooperation which is essential for our children's educational success might be achieved

Race and the Origins of American Neoliberalism Randolph Hohle, 2015-06-12 Why did the United States forsake its support for public works projects public schools public spaces and high corporate taxes for the neoliberal project that uses the state to benefit businesses at the expense of citizens The short answer to this question is race This book argues that the white response to the black civil rights movement in the 1950s 60s and early 70s inadvertently created the conditions for emergence of American neoliberalism Neoliberalism is the result of an unlikely alliance of an elite liberal business class and local segregationists that sought to preserve white privilege in the civil rights era The white response drew from a language of neoliberalism as they turned inward to redefine what it meant to be a good white citizen The language of neoliberalism depoliticized class tensions by getting whites to identify as white first and as part of a social class second This book explores the four pillars of neoliberal policy austerity privatization deregulation and tax cuts and explains how race created the pretext for the activation of neoliberal policy Neoliberalism is not about free markets It is about controlling the state to protect elite white economic privileges

Ghetto Schooling Jean Anyon, 1997 Argues that without fundamental change in government and business policies and restoring political power and economic opportunities to inner city residents and the redirection of major resources back into the schools and the communities they serve urban schools are consigned to failure and no effort at raising standards improving teaching or boosting achievement can occur

Race and Education in New Orleans Walter Stern, 2018-05-04 Surveying the two centuries that preceded Jim Crow s demise *Race and Education in New Orleans* traces the course of the city s education system from the colonial period to the start of school desegregation in 1960 This timely historical analysis reveals that public schools in New Orleans both suffered from and maintained the racial stratification that characterized urban areas for much of the twentieth century Walter C Stern begins his account with the mid eighteenth century kidnapping and enslavement of Marie Justine Sirnir who eventually secured her freedom and played a major role in the development of free black education in the Crescent City As Sirnir s story and legacy illustrate schools such as the one she envisioned were central to the black antebellum understanding of race citizenship and urban development Black communities fought tirelessly to gain better access to education which gave rise to new strategies by white civilians and officials who worked to maintain and strengthen the racial status quo even as they conceded to demands from the black community for expanded educational opportunities The friction between black and white New Orleanians continued throughout the nineteenth century and well into the twentieth when conflicts over land and resources sharply intensified Stern argues that the post Reconstruction reorganization of the city into distinct black and white enclaves marked a new phase in the evolution of racial disparity segregated schools gave rise to segregated communities which in turn created structural inequality in housing that impeded desegregation s capacity to promote racial justice By taking a long view of the interplay between education race and urban change Stern underscores the fluidity of race as a social construct and the extent to which the Jim Crow system evolved through a dynamic though often improvisational process A vital and accessible history *Race and Education in New Orleans* provides a comprehensive look at the ways the New Orleans school system shaped the city s racial and urban landscapes
