Rise And Fall Of British Shipbuilding:

The Rise and Fall of British Shipbuilding Anthony Burton, 2013-05-01 From modest beginnings Britain rose throughout the nineteenth century to become the greatest shipbuilding nation in the world yet by the end of the following century the British merchant fleet ranked just 38 in the world The glory days of sail had given way to the introduction of the steam age Traditional shipwrights had railed against new industrial methods resulting in the infamous demarcation disputes Talented men like Brunel and Armstrong had always sought change and development but too many shipbuilders were relying on old technologies From building mighty battleships and extravagant ocean liners the nation became complacent and its yards were eventually no longer as innovative as their foreign competitors In the twenty first century British shipbuilding has shrunk to a mere fraction of its former size and has become almost totally dependent on government contracts The popularity of and fascination with this subject has prompted a new edition of Anthony Burton s successful book With fresh images and a new final chapter the story of the rise and cataclysmic fall of British shipbuilding has been brought right up to date

Shipbuilding in the United Kingdom Hugh Murphy, 2020-12-28 Shipbuilding in the United Kingdom provides a systematic historical account of the British Shipbuilders Corporation first looking at this major industry under private enterprise then under state control and finally back in private hands The chapters trace the evolution of public policy regarding shipbuilding ship repair and large marine engine building through the tenures of radically different Labour and Conservative governments and through the response of the board of the British Shipbuilders Corporation trade unions and local management also The book benefits from comprehensive archival research and interviews from the 1990s with leading players in the industry as well as politicians shipbuilders trade union leaders and senior civil servants This authoritative monograph is a valuable resource for advanced students and researchers across the fields of business history economic history industrial history labour history maritime history and British history Britain and the Sea Glen O'Hara, 2010-06-30 O Hara presents the first general history of Britons relationship with the surrounding oceans from 1600 to the present day This all encompassing account covers individual seafarers ship borne migration warfare and the maritime economy as well as the British people s maritime ideas and self perception throughout the centuries **Maritime Science and Technology: Changing Our**

World Nigel Watson, 2015-01-01 This book addresses some key questions Did the marine sector drive the developing technologies Or did it just adopt them It would appear that the former is the case as the industry has moved from sail to steam from steam to internal combustion engines from wood to steel and to increasing sizes and types of specialist vessels the pioneers of naval architects and marine engineers have applied the latest technologies and our global society has benefited **Modern British Shipbuilding** L. A. Ritchie, 1980 *Extreme Economies* Richard Davies, 2020-01-14 A New Statesman best book of the year New York Times Editors Choice pick A Financial Times best economics book of 2019 An accessible story driven look at the future of the global economy written by a leading expert To predict our future we must

look to the extremes So argues the economist Richard Davies who takes readers to the margins of the modern economy and beyond in his globe trotting book From a prison in rural Louisiana where inmates purchase drugs with prepaid cash cards to the poorest major city on earth where residents buy clean water in plastic bags from the world's first digital state to a prefecture in Japan whose population is the oldest in the world how these extreme economies function most often well outside any official oversight offers a glimpse of the forces that underlie human resilience drive societies to failure and will come to shape our collective future While the people who inhabit these places have long been dismissed or ignored Extreme Economies revives a foundational idea from medical science to turn the logic of modern economics on its head arguing that the outlier economies are the place to learn about our own future Whether following Punjabi migrants through the lawless Panamanian jungle or visiting a day care for the elderly modeled after a casino Davies brings a storyteller's eye to places where the economy has been destroyed distorted and even turbocharged In adapting to circumstances that would be unimaginable to most of us the people he encounters along the way have helped to pioneer the economic infrastructure of the future At once personal and keenly analytical Extreme Economies is an epic travelogue for the age of global turbulence shedding light on today's most pressing economic questions Waves of Prosperity Greg Clydesdale, 2016-09-16 When the Venetian merchant Marco Polo first arrived in Dynastic China he was faced with a society far advanced of anything he had encountered in Europe The ports were filled with commodities from all over the eastern world while new technology was driving the economy forward It would take another 400 years before European trade in the Atlantic eclipsed the Pacific markets From China's phenomenally successful Sung dynasty c AD 960-1279 Cargoes reveals the power of the Mughals merchants of Gujarat who built an empire so powerful that even in the 17th century the richest man in the world was a Gujarat trader It was not until the opening up of the spice routes and the discovery of South American gold that medieval Iberia came to the fore It was only then that the Atlantic Empire of the west came to dominate world trade first the Dutch Republic in the seventeenth century then the British Empire in the age of the Industrial Revolution American supremacy in the twentieth century and the development of post war Japan Along the way Greg Clydesdale looks at the parallel lives and ideas of merchants and explorers missionaries kings bankers and emperors He shows how great trading nations rise on a wave of technological and financial innovation and how in that success lies the cause of their inevitable decline **Steel, Ships and Men** Kenneth Warren, 1998-07-01 The firm of Cammell Laird originated in a boiler works in 1824 before growing and diversifying to become one of a small number of companies worldwide which could build armour and arm the largest warships from the operations of a single company group After World War I it was reconstructed as a naval and mercantile shipbuilder with important financial interests in steel and rolling stock manufacture Booming activity in World War II and continuing prosperity until the late 1950s was followed by increasing competition and deepening problems By the 1980s the firm's remaining steel interests had failed in 1993 the once great Birkenhead shipyard closed How and why did the

businesses grow then experience such problems and eventually collapse This book tries to find answers **The British Economy in Transition** Royce Turner,1995-08-10 The British Economy in Transition From the Old to the New examines attempts at economic regeneration in areas that have experienced the decline in traditional industry of recent years The contributors also look at the impact of techno and managerial modernization strategies in industries that have survived but have had to adapt rapidly to do **The Transformation of British Naval Strategy** James Davey,2012 Shows how the system of supply was perfected during the later part of the Napoleonic Wars enabling fleets to stay at sea on a permanent basis After the Battle of Trafalgar the navy continued to be the major arm of British strategy Decades of practice and refinement had rendered it adept at executing operations fighting battles blockading and convoying across the globe And yet as late as 1807 fleets were forced from their stations due to an ineffective provisioning system The Transformation of British Naval Strategy shows how sweeping administrative reforms enacted between 1808 and 1812 established a highly effective logistical system changing an ineffective supply system into one which successfully enabled a fleet to remain on station for as long as was required James Davey examines the logistical support provided for fleets sent to Northern Europe during the Napoleonic War and shows how this new supply system successfully transformed naval operations enabling the navy to pursue crucial objectives of national importance protect essential exports and imports and attack the economies of the Napoleonic Empire The Transformation of British Naval Strategy is a detailed study of national policy administrative and political reform and strategic viability It delves into the nature of the British state its relationship with the private sector and its ability to reform itself in a time of war Bureaucratic restructuring represented the last stage in a century long process of logistical improvement As a result of the reforms the navy was able to conduct operations beyond the realms of possibility even twenty years earlier and saw the reach of its power transformed Military and Napoleonic historians will find this book invaluable JAMES DAVEY is Research Curator at the National Maritime Museum and Visiting Lecturer at the University of Greenwich where he teaches British naval history **The Iron Men** Anthony Burton,2015-08-03 The eighteenth century saw the second Iron Age Practically everything was made of iron the machines of the Industrial Revolution bridges and the ships that went under them the trains running on their rails and the frames of the first skyscrapers But progress was bought at a price and the working classes paid it The knife grinders of Sheffield were lucky to reach their 30th birthday before their ruined lungs gave up women chain makers were described as The White Slaves of England and in a time before health and safety regulations each advance in technology risked a new kind of deadly accident Tracking both the brilliant innovation of the period and the hardship and struggle that powered it this is the story of how iron changed the world *Planning and Profits* Christopher Miller,2018-04-11 This book examines the relationship between the private naval armaments industry businessmen and the British government defence planners between the wars It reassesses the concept of the Military Industrial Complex through the impact of disarmament upon private industry the role of leading industrialists in supply and

procurement policy and the successes and failings of government organisation

Tracing Your Liverpool Ancestors Mike Royden, 2010-03-10 Tracing Your Liverpool Ancestors gives a fascinating insight into everyday life in the Liverpool area over the past four centuries Aimed primarily at the family and social historian Mike Royden's highly readable guide introduces readers to the wealth of material available on the city's history and its people In a series of short information packed chapters he describes in vivid detail the rise of Liverpool through shipping manufacturing and trade from the original fishing village to the cosmopolitan metropolis of the present day Throughout he concentrates on the lives of the local people on their experience as Liverpool developed around them He looks at their living conditions at poverty and the laboring poor at health and the ravages of disease at the influence of religion and migration at education and the traumatic experience of war He shows how the lives of Liverpudlians changed over the centuries and how this is reflected in the records that have survived His useful book is a valuable tool for anyone researching the history of the city or the life of an individual ancestor

The Royal Navy, 1930-2000 Richard Harding, 2005 This book explores innovation within the Royal Navy from the financial constraints of the 1930s through to the refocusing of the Royal Navy after 1990

Crossing the Bar Anthony Slaven, Hugh Murphy, 2017-10-18 This book is a collection of sixty interviews with key figures in British shipbuilding ship repair and marine engine building industries across the United Kingdom plus government and civil service members in the sector from the 1960s to the 1980s The aim of the project is to understand the economic social and political environment of the shipping industry from the perspective of those who worked in it The interviews place the twentieth century decline of British shipbuilding into a firm context The topics covered include international competition a recurring pertinent theme labour difficulties industry modernisation the attitude of shipowners the strong belief in traditional methods which kept many of those in the industry from recognising the cheaper faster and better quality work taking place overseas and leaving Britain behind ship production and production control the postwar boom shipyard overcrowding the decline of the domestic industry in favour of the international marketing weaknesses trade disputes and trade unions and nationalisation and privatisation concerns Opinions and viewpoints often conflict particularly between the perspectives of those working within the industry and the civil servants working outside of it but the interviews are presented as a unit and the reader is encouraged to draw their own conclusion The result is a unique historical archive that offers a multitude of firsthand perspectives on the British shipping decline open to interpretation by historians and future researchers It includes a preface introduction and select bibliography The interviews are grouped together by location and role
