Nemetz, 1990-01-01 As the importance of the Pacific Rim as a global centre of large scale investment development and trade continues to increase so do the potential benefits that Canada and other countries could reap as a result of an increased presence in this diverse region This book a revised and to a large extent new version of The Pacific Rim Investment Development and Trade 1987 integrates a broad range of current economic data concerning the Pacific Rim with some of the more important theoretical issues in the area of economic development and trade It demonstrates the paradoxical combination of strength and fragility that characterizes the emerging integrated Pacific Rim economy and attempts to clarify the nature of the framework and constraints that face foreign investors and trading partners The historical background of Japan s trade with other Pacific nations is examined in the opening chapter which is complemented by a new article outlining in detail the nature of and rationale for the profound change in Japan s foreign direct investment in the 1980s Other articles analyze trade in the ASEAN countries Indonesia Malaysia the Philippines Singapore and Thailand and discuss the emerging financial centres in the Pacific Rim New contributions deal with the policy environment for Pacific strategic management compare the financial centres of Hong Kong and Singapore as these face the challenge of strategic adjustment and repositioning in international financial markets during the 1990s and present a theoretical framework for comparing US and Japanese trade policies The second part of the book examines the critical role of energy in the future development of the Pacific Rim and its interdependence with other global regions New articles discuss the progress and prospects for energy cooperation in the Pacific Basin and the potential for further development of nuclear power while those dealing with the British Columbia coal industry and the changes in the energy systems of Japan and China have been updated to reflect current data Another new contribution seeks to explain the excess capacity in the coal industry coming to the conclusion that the experience of the past twenty years is unlikely to be repeated thanks to new technologies in steel production and the increased steel capacity of such Pacific Rim countries as Korea Taiwan and China Looking beyond its traditional ties with Europe and the United States Canada is in a particularly advantageous position to participate in the development and integration of the Pacific Basin Canada s geographic location coupled with its increasing economic and cultural ties to East Asia suggest that this country can have a profound effect upon and will be profoundly affected by Pacific Rim development in the coming decade While the risks may be high and the payback period long the potential return on

**On the Causes of Economic Growth** Carlos Sabillon, 2008 In a sweeping review of economic history the author presents the salient facts of booms and slowdowns in the major economies of the world in 50 year intervals and demonstrates the weakness of orthodox theories The only factor that consistently causes growth he shows is centralized support for manufacturing which spurs the creation of new technologies which lead to wealth creation Since the earliest of times human beings have endeavored to uncover the causes of prosperity Step by step Sabillon tests the principal theories on the causes of economic growth against the facts of history Here economic statistics of the world are presented in a rationalized format that allows for comparison across countries and through time with a challenge to those who study them to determine with an open mind what the statistics show and what are the trends beyond cherished theories that suit various political purposes Tested against the historical data textbook ideas and theories consistently come up short Such analyses are highly troubling because they reveal an absence of correlation between theory and reality The data statistics illustrating the development of the world economy during the last several centuries were extracted from economic history and economic history books from publications of the World Bank the Organization for Economic Cooperation and Development the International Monetary Fund the World Trade Organization the United Nations specialized agencies research institutes and country statistical publications and other books and journals Analyzing the data over geography and time Sabillon concludes that contrary to contemporary wisdom left to market forces alone the economy will not and does not flourish Only decisive intervention in support of manufacturing and technological advancement can provide growth This systematic review of history and test of accepted dogma challenges economic theorists to consider one part of the equation of economic policy that has been wiped off the blackboard in today's politically correct debates
