

A collection of historical artifacts is arranged on a light-colored, textured surface. In the top left corner, a portion of a wooden chessboard with a checkered pattern is visible, featuring several light-colored chess pieces. Below the chessboard, there are two ornate medals. The top medal has a red ribbon and a circular emblem with a starburst design. The bottom medal has a blue ribbon and a circular emblem with a starburst design. To the right of the medals, a pair of round-rimmed spectacles with thin metal frames and a bridge is lying flat. In the bottom left corner, a circular compass with a metal casing and a visible compass rose is partially visible. A single quill pen with a dark, pointed tip and a light-colored, textured body lies diagonally across the center of the image, crossing over the spectacles.

Anter, 2014-02-19 Andreas Anter reconstructs Max Weber's theory of the modern state showing its significance to contemporary political science He reveals the ambivalence of Weber's political thought the oscillation between an statist position mainly oriented to the reason of state and an individualistic one focussed on the freedom of individuals **Political Economy in the Modern State** Harold A. Innis, 2018-01-01 Political Economy in the Modern State is Harold Innis's transitional and in some respects his most transformative book Completed in 1946 it is a collection of fifteen chapters plus a remarkable Preface selected and crafted to address four main themes the problem of power and peace in the post War era the ascent of specialized and mechanized forms of knowledge involving most particularly the media the state and the academy the crisis facing civilization and more generally the modern penchant for unreflexive short term thinking in the face of mounting contradictions and Innis's growing focus on what would be called media bias In this new edition editors Robert E Babe and Edward A Comor provide not only a general introduction to Innis's

largely forgotten book but also dedicated introductions to each of its fifteen chapters and a comprehensive index Together Babe and Comor demonstrate how Innis s volume reflects a shift in Innis s focus away from analytical relativism towards instead a reflexive search for objective truths

Woodrow Wilson and the Roots of Modern Liberalism Ronald J. Pestritto,2005-01-20 Woodrow Wilson is best known for his service as the twenty eighth president of the United States and his influence on American foreign policy in the twentieth century and beyond Yet Wilson is equally important for his influence on how Americans think about their Constitution and principles of government Woodrow Wilson and the Roots of Modern Liberalism highlights Wilson s sharp departure from the traditional principles of American government most notably the Constitution Ronald J Pestritto persuasively argues that Wilson s unfailing criticism places him clearly in line with the Progressives assault on the original principles of American constitutionalism Drawing primarily from early writings and speeches that Wilson made during his years as a scholar Pestritto examines the future president s clear and consistent ideologies that laid the foundation for later actions taken as a public leader Engaging and thought provoking Woodrow Wilson and the Roots of Modern Liberalism gets to the heart of Wilson s political ideologies and brings a fresh perspective to the study of American political development

Colonialism and Modern Social Theory Gurminder K. Bhambra, John Holmwood, 2021-05-18 Modern society emerged in the context of European colonialism and empire So too did a distinctively modern social theory laying the basis for most social theorising ever since Yet colonialism and empire are absent from the conceptual understandings of modern society which are organised instead around ideas of nation state and capitalist economy Gurminder K Bhambra and John Holmwood address this absence by examining the role of colonialism in the development of modern society and the legacies it has bequeathed Beginning with a consideration of the role of colonialism and empire in the formation of social theory from Hobbes to Hegel the authors go on to focus on the work of Tocqueville Marx Weber Durkheim and Du Bois As well as unpicking critical omissions and misrepresentations the chapters discuss the places where colonialism is acknowledged and discussed albeit inadequately by these founding figures and we come to see what this fresh rereading has to offer and why it matters This inspiring and insightful book argues for a reconstruction of social theory that should lead to a better understanding of contemporary social thought its limitations and its wider possibilities

From Religious Empires to Secular States Birol Başkan, 2014-03-26 In the 1920s and the 1930s Turkey Iran and Russia vehemently pursued state secularizing reforms but adopted different strategies in doing so But why do states follow different secularizing strategies The literature has already shattered the illusion that secularization of the state has been a unilinear homogeneous and universal process and has convincingly shown that secularization of the state has unfolded along different paths Much however remains to be uncovered This book provides an in depth comparative historical analysis of state secularization in three major Eurasian countries Turkey Iran and Russia To capture the aforementioned variation in state secularization across three countries that have been hitherto analyzed as separate studies Birol Ba kan adopts three modes of state secularization accommodationism separationism and eradicationism Focusing thematically on the changing relations between the state and religious institutions Ba kan brings together a host of factors historical strategic and structural to account for why Turkey adopted accommodationism Iran separationism and Russia eradicationism In doing so he expertly demonstrates that each secularization strategy was a rational response to the

strategic context the reformers found themselves in **Capitalism and Modern Social Theory** Anthony Giddens, 1973-02-08 Giddens's analysis of the writings of Marx Durkheim and Weber has become the classic text for any student seeking to understand the three thinkers who established the basic framework of contemporary sociology The first three sections of the book based on close textual examination of the original sources contain separate treatments of each writer The author demonstrates the internal coherence of their respective contributions to social theory The concluding section discusses the principal ways in which Marx can be compared with the other two authors and discusses misconceptions of some conventional views on the subject *The Early Modern State: Drivers, Beneficiaries and Discontents* Pepijn Brandon, Lex Heerma van Voss, Annemieke Romein, 2022-06-30 In the course of the early modern period the capacity of European states to raise finances wage wars subject their own and far away populations and exert bureaucratic power over a variety of areas of social life increased dramatically Nevertheless these changes were far less absolute and definitive than the literature on the rise of the modern state once held While war pushed the boundaries of the emerging fiscal military states of the seventeenth and eighteenth centuries rulers remained highly dependent on negotiations with competing elite groups and the private networks of contractors and financial intermediaries Attempts to increase control over subjects often resulted in popular resistance that in their turn set limits to and influenced the direction of the development of state institutions Written in honour of the leading historian of war and state formation in the early modern Low Countries Marjolein t Hart the chapters gathered in this volume examine the main drivers beneficiaries and discontents of state formation across and beyond Europe in the early modern period **The Impossible State** Wael Hallaq, 2012-12-18 Wael B Hallaq boldly argues that the Islamic state judged by any standard definition of what the modern state represents is both impossible and inherently self contradictory Comparing the legal political moral and constitutional histories of premodern Islam and Euro America he finds the adoption and the practices of the modern state to be highly problematic for modern Muslims By Islamic standards the state's technologies of the self are severely lacking in moral substance and today's Islamic state as Hallaq shows has done little to advance an acceptable form of genuine Shari'a governance Hallaq then turns to the rich moral resources of Islamic history to prove that political and other crises of Islam are integral to the modern condition of both the East and the West and by acknowledging these parallels Muslims can engage more productively with their Western counterparts book cover **Imams and Emirs** Fuad Ishaq Khuri, 2014-07-01 In this classic comprehensive study of Islamic sects in the contemporary Arab world Khuri focuses on the Sunni Shi'a Alawis Druze Ibadis Zaidis Yazidis and the Maronites who although Christian are included because they share certain distinguishing features His placements of these groups on a single comparative scale was unprecedented Khuri argues that conflicts among Muslims arise from the struggle between two opposing forces religious doctrinaire authorities imams and leaders who derive their authority from power and coercion emirs He discusses the role of dogma but also uniquely the critical factors that differentiate sects from

religious communities and religions from sects Following a thorough review of the structural characteristics of individual sects Khuri addresses issues of religious change dealing with the interplay between religions states and nationalism Here he explores the contradictions between modern state structures and the Islamic umma showing how some religious concepts had begun to take on nationalistic meanings
