Protect your business from all types of risks, insure your projects with advice from the experts. Here you'll find the answers to your questions about insurance, bonding, and risk management for all of your construction projects. This much-needed book helps you assess your requirements for insurance coverage, evaluate policies, find the fairest rates, obtain bonding, and manage risks professionally and confidently. Written by the foremost experts at Ernst & Young, it determines how to get the insurance you need at the best rate, read and evaluate insurance contracts, secure bonds for both contractors and subcontractors, obtain workers' compensation coverage, evaluate environmental issues, understand the role of sureties in litigation. Construction contractors and subcontractors, CPAs, law firms, and insurance and bonding agents will all welcome this comprehensive guide and the authoritative help it gives in ensuring successful outcomes for construction projects of every kind. *Risk and Insurance in Construction* Nael G. Bunni, 2003-09-02. Those involved in construction have to cope with so much learning in their own discipline that they shun further involvement in subjects such as insurance and law, which in themselves are so deeply and intensely complex. However, insurance and law are interwoven in the basic procedures used in the construction industry for undertaking work, be they design, construction, supervision, or operation, or any combination of them. This thoroughly revised edition of Nael Bunni's successful book, formerly called *Insurance in Construction*, provides information on risk, construction law, and construction insurance for those involved with all aspects of construction. The chapters on risk have been expanded to include recent developments in the area and provide further examples of events which could occur on what can be viewed as the most risky human work activity, namely, construction. New chapters are also added to deal with the insurance clauses of the many new standard forms of contract published in recent years, including FIDIC's new suite of contracts published in September 1999, ICE's seventh edition of the civil engineering standard form of contract, and ICE's second edition of the design-build form.

*Risk and Insurance in Construction* Nael G. Bunni, Lydia B. Bunni, 2022-02-16. The new 3rd edition of Nael Bunni's *Risk and Insurance in Construction* now co-authored with Lydia Bunni, explains the need for insurance in construction and engineering projects and why it must be incorporated into the Conditions of Contract for such projects. It is unique in bringing together the background of the two topics of risk and construction insurance, explaining the flow and the interaction between them, and then dealing with how they have been used to formulate the 2017 FIDIC Suite of Contracts and the 2021 Green Book. This edition has been fully updated, and new chapters deal with the latest definitions of risk outlined in ISO 31000:2009 and specifically explain the principles embodied in the new Clauses 17, 18, and 19 of the Major Suite of the FIDIC forms of contract and how they should be used. An important chapter, Chapter 5, is included discussing the logical

transition from decision making to risk identification to responsibility for those allocated with particular risks to the potential liability that results This includes discussing particular liabilities that may arise for parties typically involved in construction and engineering projects including developers owners contractors and designers This part of the book links insurance to the law and explains the interaction between the two topics The correlation between liability and the need for indemnity which can only be provided properly through insurance is highlighted The book is essential reading for practitioners from both the engineering profession and the insurance industry in all types of projects Engineers who are required to use one of the Major Forms of the FIDIC Suite of Contracts whether they are designers or contractors and those involved in the insurance sector whether brokers claim consultants or insurance company personnel will find this book to be an indispensable reference

**Using and Understanding Engineering Service and Construction Contracts** John R. Clark, 2012-12-06 1 HISTORICAL BACKGROUND In the late 1950s many members of the design professions Engineers as well as Architects became concerned about their exposure to claims for professional malpractice and particularly about the increasing number of claims that had been successfully brought against them arising out of their Construction Phase activities This led to special studies sponsored by the American Institute of Architects and the Engineers joint Counsel The outcome was twofold the development of a policy of professional liability insurance to insure Engineers and Architects against errors and omissions in the performance of their professional services and the review and development of the customary contractual arrangements defining the design professional's undertakings vis a vis his client the Owner the Project to be designed and the Contractor who was to implement that design At the outset the AIA's Owner Architect Agreement No B131 General Conditions No A201 and the Owner Contractor Agreements Nos A101 111 were the

documents most frequently used by design professionals and these received particular attention In the early 1960s it became apparent that there was a need for a separate series of documents prepared to address these relationships when the Project to be designed involved primarily engineering considerations The number of Projects for which the Engineer was employed by the Owner as the prime professional to handle the Project design and construction administration was increasing
