**Stress Testing for Risk Control Under Basel II** Dimitris N. Chorafas, 2011-04-08. The Consultative paper issued by the Basel Committee on Banking Supervision. Basel II cites the failure of bankers to adequately stress test exposures as a major reason for bad loans. Sample quotes from this crucial document: Banks should take into consideration potential future changes in economic conditions when assessing individual credits and their credit portfolios and should assess their credit risk exposures under stressful conditions. The recent disturbances in Asia and Russia illustrate how close linkages among emerging markets under stress conditions and previously undetected correlations between market and credit risks as well as between those risks and liquidity risk can produce widespread losses. Effective stress testing which takes account of business or product cycle effects is one approach to incorporating into credit decisions a fuller understanding of a borrower's credit risk. Written for professionals in financial services with responsibility for IT and risk measurement management and modeling.
