Risky Business Canadas Changing Science Based Policy And Regulatory Regime:

Canadian Science, Technology, and Innovation Policy G. Bruce Doern, David Castle, Peter W.B. Phillips, 2016-06-01 Canadian Science Technology and Innovation Policy presents new critical analysis about related developments in the field such as significantly changed concepts of peer review merit review the emergence of big data in the digital age and the rise of an economy and society dominated by the internet and information The authors scrutinize the different ways in which federal and provincial policies have impacted both levels of government including how such policies impact on Canada's natural resources They also study key government departments and agencies involved with science technology and innovation to show how these organizations function increasingly in networks and partnerships as Canada seeks to keep up and lead in a highly competitive global system The book also looks at numerous realms of technology across Canada in universities business and government and various efforts to analyze biotechnology genomics and the Internet as well as earlier technologies such as nuclear reactors and satellite technology The authors assess whether a science and technology centred innovation economy and society has been established in Canada one that achieves a balance between commercial and social objectives including the delivery of public goods and supporting values related to redistribution fairness and community and citizen empowerment Probing the nature of science advice across prime ministerial eras including recent concerns over the Harper government's claimed muzzling of scientists in an age of attack politics Canadian Science Technology and Innovation Policy provides essential information for academics and practitioners in business and government in this crucial and complex field

Strategic Science in the Public Interest G. Bruce Doern, Jeffrey S. Kinder, Jeff Kinder, 2007-01-01 The past twenty years have seen considerable shifts and struggles in government science that is in the way the state funds supports regulates conducts and uses scientific and technological activity Focusing on federal labs and agencies Strategic Science in the Public Interest explores how these labs have been located within and often buried by the larger commercially focussed federal innovation agenda G Bruce Doern and Jeffrey S Kinder examine four labs whose mandates deal with the Alberta oil sands environmental technologies wildlife research and mining and metals respectively The authors use these cases to explain why a better middle level approach to analysis is needed for strategic public interest centred government science They illustrate the importance of understanding the variety as well as the similarity of federal science and technology labs and agencies and of instituting policies that reflect this diversity The growing importance of Related Science Activities RSA is also explored as well as the core trade offs between commercial and public goods science in their mandates and their internal capacities

Canadian Nuclear Energy Policy CRUISE Conference on the Future of Nuclear Energy in Canada (1999 : Ottawa, Ont.), 2001-01-01 Focusing on the federal government but with special attention given to key changes in Ontario the analytical core of this book identifies five key nuclear energy choices and challenges that face the federal government and other Canadian policy makers

The National Research Council in the Innovation

Policy Era G. Bruce Doern, Richard Levesque, Institute of Public Administration of Canada, 2002-01-01 The authors show how the NRC's history is interwoven with the evolution of Canada's economic and industrial development and with the fostering of science at Canada's universities in industry and within the federal government The Oxford Handbook of Canadian Politics John Courtney, John Childs Courtney, David Smith, 2010-04-29 The Oxford Handbook of Canadian Politics provides a comprehensive overview of the transformation that has occurred in Canadian politics since it achieved autonomy nearly a century ago examining the institutions and processes of Canadian government and politics at the local provincial and federal levels It analyzes all aspects of the Canadian political system the courts elections political parties Parliament the constitution fiscal and political federalism the diffusion of policies between regions and various aspects of public policy Policy Analysis in Canada Laurent Dobuzinskis, David H. Laycock, Michael Howlett, 2007-01-01 This volume offers a comprehensive overview of the many ways in which the policy analysis movement has been conducted and to what effect in Canadian governments and for the first time in business associations labour unions universities and other non governmental organizations Canadian Energy Policy and the Struggle for Sustainable Development G. Bruce Doern, 2005-01-01 In recent years energy policy has been increasingly linked to concepts of sustainable development In this timely collection editor G Bruce Doern presents an overview of Canadian energy policy gathering together the top Canadian scholars in the field in an examination of the twenty year period broadly benchmarked by energy liberalization and free trade in the mid 1980s and by Canada's ratification of the Kyoto Protocol in 2002 The contributors examine issues including electricity restructuring in the wake of the August 2003 blackout the implications of the Bush Administration's energy policies energy security northern pipelines and Aboriginal energy issues provincial changes in energy policy and overall federal provincial changes in regulatory governance They also demonstrate that since per capita energy usage has actually increased in the past several years sustainable development remains very much a struggle rather than an achievement When the Kyoto Protocol and its requirements for reductions in greenhouse gas emissions are factored in the Canadian record is especially dubious in basic energy terms Canadian Energy Policy and the Struggle for Sustainable Development is key to understanding many of the issues in Canada's endeavour to live up to its energy related environmental responsibilities Presenting and Representing Environments Graham Humphrys, Michael Williams, 2006-01-27 The presentation and representation of the environment occurs throughout academia and across all news media The strict protocols of science often clash with environmental information available from sources that dwell on subjective aesthetic emotional and personal sensitivities This book challenge the reader as student teacher researcher or policy maker to reflect critically on the ways that environments are studied interpreted presented and represented in education and public policy **New Institutionalism** André Lecours, 2005-01-01 Featuring discussions of comparative politics public policy and international relations this collection from editor Andr Lecours is a comprehensive examination of the subject making it a crucial addition to any political scientist

s library **How Ottawa Spends 2004-2005** G. Bruce Doern, 2004 Drawing on the work of academics and other experts from across Canada Carleton University's School of Public Policy and Administration's annual book takes a focused and robust look at an era where a political coronation seemed inevitable but high expectations had to be managed downwards almost immediately A less than buoyant fiscal surplus escalating concerns about liberal ethics and corruption and a growing volatility in public opinion are examined as are Canadians increasingly uncertain views about the new Liberal leadership versus the old Liberal Party's ten year hold on power A new Conservative Party and a suddenly feisty New Democratic Party are also a central part of the new 2004-2005 Canadian political and policy milieu Networks, Alliances and Partnerships in the Innovation Process John de la Mothe, Albert N. Link, 2012-12-06 In an era of intense knowledge based globalization and technology based competition the central role of networks alliances and partnerships is now becoming recognized By looking at the dynamics of these strategic organizational activities leading authors in the field examine in this book how firms align themselves how they use networks and enter into partnerships in order to develop new or radically improved processes and how they introduce new or radically improved products to the market The topic excludes as the primary interest spatial effects such as those found in geographic clusters or in regional innovation systems The focus here is instead on the innovation process and therefore examines framework issues about how we can assess networks of innovators measurement issues for both researchers and official statisticians and impact issues for both industry strategists and policy makers Using an evolutionary perspective and drawing on a range of disciplines Networks Partnerships and Alliances explores important issues at the conceptual methodological and comparative levels concerning the construction of comparative advantage

Climate Adaptation Policy and Evidence Peter Tangney, 2017-07-28 Evidence based policymaking is often promoted within liberal democracies as the best means for government to balance political values with technical considerations Under the evidence based mandate both experts and non experts often assume that policy problems are sufficiently tractable and that experts can provide impartial and usable advice to government so that problems like climate change adaptation can be effectively addressed at least where there is political will to do so This book compares the politics and science informing climate adaptation policy in Australia and the UK to understand how realistic these expectations are in practice At a time when both academics and practitioners have repeatedly called for more and better science to anticipate climate change impacts and thereby to effectively adapt this book explains why a dearth of useful expert evidence about future climate is not the most pressing problem Even when it is sufficiently credible and relevant for decision making climate science is often ignored or politicised to ensure the evidence based mandate is coherent with prevailing political economic and epistemic ideals There are other types of policy knowledge too that are arguably much more important This comparative analysis reveals what the politics of climate change mean for both the development of useful evidence and for the practice of evidence based policymaking *Three Bio-realms* G. Bruce Doern, Michael J. Prince, 2012-01-01 Biotechnology has become one of the

most important issues in public policy and governance altering the boundaries between the public and the private the economic and the social and further complicating the divide between what is scientifically possible and ethically preferred Given the importance of biotechnology in shaping relations between the state science the economy and the citizenry a book that explores the Canadian biotechnology regime and its place in our democracy is timelier than ever *Three Bio Realms* provides the first integrated examination of the thirty year story of the democratic governance of biotechnology in Canada G Bruce Doern and Michael J Prince two recognized specialists in governance innovation and social policy look at particular network based factors that seek to promote and to regulate biotechnology inside the state as well as at broader levels Unmatched by any other book in its historical scope and range *Three Bio Realms* is sure to be read for years to come **The greening of golf** Brad Millington, Brian Wilson, 2016-04-20 This electronic version has been made available under a Creative Commons BY NC open access license Golf is a major global industry The sport is played by more than 60 million people worldwide and there are more than 32 000 courses in 140 countries across the globe This book looks at the power relationships in and around golf examining whether the industry has demonstrated sufficient leadership on environmental matters to be trusted to make weighty decisions with implications for public and environmental health The first comprehensive study of the varying responses to golf related environmental issues it is based on extensive empirical work including research into historical materials and interviews with stakeholders in golf such as course superintendents protesters and health professionals The authors examine golf as a sport and as a global industry drawing on and contributing to literatures pertaining to environmental sociology global social movements institutional change corporate environmentalism and the sociology of sport **Purchase for Profit** Heather Whiteside, 2015-01-01 Purchase for Profit will be important for those studying public policy in any of the areas in which public private partnerships are now being adopted *Globalization and Food Sovereignty* Peter André, Jeffrey Ayres, Michael J. Bosia, Marie-Josée Massicotte, 2014-01-01 This collection examines expressions of food sovereignty ranging from the direct action tactics of La V a Campesina in Brazil to the consumer activism of the Slow Food movement and the negotiating stances of states from the global South at WTO negotiations With each case the contributors explore how claiming food sovereignty allows individuals to challenge the power of global agribusiness and reject neoliberal market economics Deliberative Democracy for the Future Genevieve Fuji Johnson, 2008-06-13 In today s world public policies are increasingly associated with social and environmental risk and scientific uncertainty Given such potential impacts on the moral freedom and equality for existing and future generations policies should reflect decision making standards beyond those of economic efficiency and technical safety They should reflect the imperatives of social justice and democratic legitimacy now and into the future *Deliberative Democracy for the Future* identifies an approach to ethical policy analysis that promises to serve the ends of justice and legitimacy in areas of public policy such as hazardous waste management energy generation and regulation climate change control and genomics

research and commercialization Based on a wide reading of ethical approaches to policy analysis found in contemporary political theory moral philosophy and public policy literatures it evaluates these three central approaches to ethical policy analysis in light of moral dilemmas arising in a particularly timely case Canadian nuclear waste management policy The volume's central argument is that the most desirable approach to ethical policy analysis contains the philosophical tools necessary to address problems of understanding risk and safety identifying obligations to both existing and future generations and conceptualizing legitimacy conferring decision making processes Genevieve Fuji Johnson argues that neither welfare utilitarianism nor modern deontology is sufficiently equipped for these tasks She proposes that only deliberative democracy contains convincing conceptions of the good justice and legitimacy that provide for the justifiable resolution of debates about the moral foundations of public policy Responding to challenges in nuclear waste management in ways more comprehensive and more tenable than both utilitarianism and deontology deliberative policy analysis promises to be an effective approach to other cases associated with risk uncertainty and futurity Transforming Provincial Politics Bryan M. Evans, Charles W. Smith, 2015-01-01 Transforming Provincial Politics is the first province by province analysis of politics and political economy in more than a decade and the first to directly examine the turn to neoliberal policies at the provincial and territorial level and examines how neoliberal policies have affected politics in each jurisdiction in Canada **Resistance Is Fertile** Wilhelm Peekhaus, 2013-03-13 For decades government industry and the mainstream media have extolled the virtues of biotechnology downplaying its negative side effects and claiming that it can improve everything from our health and diet to our environment and economy Focusing on agricultural biotechnology Resistance Is Fertile challenges this dominant rhetoric by offering a critical analysis of the role of capital and the state in the development of this technoscience Wilhelm Peekhaus analyzes the major issues around which opponents of agricultural biotechnology in Canada are mobilizing resistance namely the enclosure of the biological commons and the knowledge commons which together form the BioCommons What emerges is an empirically and theoretically informed analysis of topics such as Canada's regulatory regime the corporate control of seeds the intellectual property system and attempts to construct and control public discussions about agricultural biotechnology *Small Nations, High Ambitions* X. Hubert Rioux, 2020-02-24 Given the importance that entrepreneurship and start up businesses in technology intensive sectors like life sciences renewable energy artificial intelligence financial technologies software and others have come to assume in economic development the access of entrepreneurs to appropriate levels of finance has become a major focus of policymakers in recent decades Yet this prominence has led to a variety of policy models across countries and even within countries as different levels of government have adapted to new challenges by refining or transforming pre-existing institutions and crafting new policy tools Small Nations High Ambitions investigates the roots of such policy diversity at the subnational level offering in depth accounts of the evolution of Quebec's and Scotland's policy strategies in the entrepreneurial finance sector and venture capital more

specifically As compared to other regions and provinces in the United Kingdom and Canada Quebec and Scottish venture capital ecosystems rely on a high degree of state intervention either direct through public investment funds or indirect through government backed hybrid or tax advantaged funds These two regions can thus be described as sponsor states heavily involved in the strategic backing of innovative businesses Whereas most of the literature on venture capital has focused on economic variables to explain variations in policy models this book seeks to explain policy divergence in Quebec and Scotland through political and ideological lenses Its main argument is that the development of venture capital ecosystems in these regions was underpinned by Qu b cois and Scottish nationalisms which induced preferences for policy asymmetry and state intervention
