of Carbonneau's treatise is built upon a comprehensive update of the federal circuit and U S Supreme Court cases on arbitration. The Introduction has been rewritten to take into account *AT T Mobility v Concepcion* and the American Express Merchants Litigation in the development of U S arbitration law. These decisions represent landmark USSC pronouncements on adhesive arbitration. The Introduction also contains a new section on the foundational legitimacy of arbitration in the U S legal system. The two landmark decisions are also incorporated into the text of Chapter 8 on the topic of adhesive arbitration. Chapter 9 on the award enforcement assesses the standing of *Stolt Nielsen* in light of the Court's recent decision in *Sutter* asking whether this re-evaluation might be a de facto reversal of the earlier and highly unusual opinion. The assessment takes into account Justice Alito's concurring opinion in *Sutter*. Chapter 10 on International Commercial Arbitration has undergone substantial rewriting and makes its various points more lucidly and effectively. This is also true of chapters 2, 3 and 5. Many footnotes have been perfected in form and content. The per curiam opinions *KPMG LLP v Cocchi*, *Marmet Health Care v Brown* and *Nitro Lift v Howard* are all integrated into the text and fully assessed. The USSC's decision in *CompuCredit v Greenwood* is evaluated for its significance on the issue of Congressional intent to preclude arbitration. There are updates on how the courts define arbitration, the waiver of the right to arbitrate, in particular the Ninth Circuit opinion in *Richards v Ernst Young*, the enforcement of arbitration agreement with emphasis upon the curious Third Circuit decision on the matter in *Guidotti*, the latest adherents to the ill conceived RUA, the Ninth Circuit's favorable response to *AT T Mobily* in *Mortensen and Murphy* and an assessment of recent developments on the judicial imposition of penalties for frivolous vacatur actions. The treatise continues to be a highly contemporary and complete statement on the law of arbitration.

International Contracts and National Economic Regulation: Dispute Resolution Through International Commercial Arbitration Mahmood Bagheri, 2000-12-06. The growth of national economic regulation and the process of globalisation increasingly expose international transactions to an array of regulations from different jurisdictions. These developments often contribute to widespread international contractual failures when parties claim the incompatibility of their contractual obligations with regulatory laws. The author challenges conventional means of dispute resolution and argues for an interdisciplinary approach whereby disciplines such as international economic law, conflict of laws, contract law, and economic regulations are functionally united to resolve international and multifaceted regulatory disputes. He identifies the normative foundation of contract law as an important determinant in this process, contending that contract law is essentially neutral and underpinned by the concept of corrective justice, while economic regulations are mainly prompted by distributive

justice Applying this corrective distributive justice dichotomy to international contracts the author critically assesses major conflict of laws approaches such as proper law the Rome Convention and governmental interest analysis which could disregard either public interest or private rights The author taking these theories into account proposes an alternative two dimensional interest analysis approach He tests the viability of this approach with reference to arbitral awards and court decisions in various jurisdictions and concludes that it uniquely fits into the structure of international commercial arbitration In adopting this approach arbitrators would take into account both corrective and distributive justice and to the extent that corrective justice prevails would be able to avert a total failure of the contract
