Security Vs. Survival Theresa C. Smith,Indu Bhushan Singh,1985-01-01 *Rethinking National Security* Frances Scott,1990 **Security V[ersu]s Survival** Theresa C. Smith,Indu Bhushan Singh,1985 **India's National Security Dilemma** Rajpal Budania,2001 **The New Europe** Frances Scott,1991 Special Bibliography Series ,1957 *Special Bibliography Series* United States Air Force Academy. Library,1990 **Paul Rogers: A Pioneer in Critical Security Analysis and Public Engagement** Paul Rogers,2018-07-30 This book brings together a collection of writings over the past half century from Professor Paul Rogers As a leading peace researcher he has gained an international reputation for the critical independent and rigorous analysis of international security and the underlying causes of global conflict His work on the responses to 9 11 and the continuing failure of the war on terror in particular has shown prescience that has attracted widespread attention Moreover he has coupled his academic analysis with a determination to communicate widely beyond the university environment With many thousands of radio and television interviews hundreds of public lectures and a world wide following for his web publishing this extramural engagement consistently seeks to raise the level of public debate on international security issues Provides a radically different perspective on global security based on 50 years of analysis Uniquely integrates economic environmental and security analysis into a single overview Cogently demonstrates the urgent need to rethink our entire approach to global security *Coexistence, Cooperation and Common Security* Joseph Rotblat,Laszlo Valki,1988-07-29 To remove the threat of nuclear annihilation changes in attitudes are required such as the acceptance of the concept of common security to take the place of reliance on nuclear deterrence to keep the peace This book gives an insight into thinking about ways to deal with the crisis Toward Nuclear Disarmament And Global Security Burns H Weston,2019-06-04 This text is designed to provide students and others with a theoretical and factual base for understanding the complex questions posed by continued reliance on nuclear weapons to protect geopolitical interests In Part One the authors examine the destructiveness and cost of modern nuclear arsenals and offer both normative and systemic explanations Congressional Record United States. Congress,1984 *Yearbook of the United Nations. 39. 1985 (1989)* United Nations. Final Document of Assembly Session on Disarmament (23 May - 1 July 1978) United Nations. Office of Public Information, 1978 **Northern European Security Issues**, 1983 Global Problems and Common Security Josef Rotblat, Vitalii I. Goldanskii, 2012-12-06 After many years of sterile arms control negotiations between the super powers which did not produce a single genuine disarmament measure and sometimes had the opposite effect of stimulating the development of new weapons to serve as bargaining chips an agreement to abolish completely two categories of nuclear weapons the INF Treaty was signed and is now being implemented This historical event the first actual destruction of deployed nuclear missiles although not of their warheads became possible largely because of the radical changes in the policies of the Soviet Union the new way of thinking advanced by its leader Mikhail Gorbachev The relaxation of tension that resulted from this policy was one of the factors contributing to the successful conclusion of the INF Treaty Another no less important factor was the acceptance by the Soviet Union of on site inspections as a basic element of a verification system essential to ensure compliance with the Treaty This breakthrough led to the mutual acceptance of an elaborate and precise verification regime and thus made possible the signing of the INF Treaty which in turn contributed to the further lessening of tension between East and West But perhaps the most important factor one which carries much promise for the future was the changed approach to security problems Strategic Power and National Security J. I. Coffey, 2010-11-23 In this closely reasoned and lucid analysis an important thinker on American strategy surveys weapons technology and its military and political implications for the 1970s J I Coffey refutes the argument that American national security requires superior strategic offensive forces or extensive air and missile defenses In so doing he assesses in simple terms the various factors involved in this complex and difficult subject While many books on strategy deal only with a single area or a particular weapons system this work synthesizes technical and non technical considerations across the whole range of national security issues affected by strategic power war fighting deterrence Communist behavior alliance relationships nuclear proliferation and arms control Its orderly and authoritative marshaling of tabulated data its citations from Department of Defense documents and congressional hearings and its classifications of the alternative options which strategy makers can now pursue are all invaluable to both the student of national security and the professional strategist South, 1985 Future Survey Annual 1984 World Future Society, 1984-06-01
