Security Studies In South Asia Change:

Understanding Security Practices in South Asia Monika Barthwal-Datta, 2012-05-04 This book explores the ways in which non state actors NSAs in South Asia are involved in securitizing non traditional security challenges in the region at the sub state level South Asia is the epicentre of some of the most significant international security challenges today Yet the complexities of the region s security dynamics remain under researched While traditional security issues such as inter state war border disputes and the threat of nuclear devastation in South Asia remain high on the agendas of policy makers and academics both within and beyond the region scant attention has been paid to non traditional or new security challenges Drawing on various case studies this work offers an innovative analysis of how NSAs in South Asia are shaping security discourses in the region and tackling security challenges at the sub state level Through its critique of securitization theory the book calls for a new approach to studying security practices in South Asia one which considers NSAs as legitimate security actors This book will be of much interest to students of security studies Asian security Asian politics critical security studies and IR in general

Climate Change and Food Security in South Asia Rattan Lal, Mannava VK Sivakumar, S.M.A. Faiz, A.H.M. Mustafizur Rahman, Khandakar R. Islam, 2010-10-17 This book addresses an important topic of food security in South Asia with specific reference to climate change Of the 1 billion food insecure people in the world more than 30% are in South Asia The problem of food insecurity may be exacerbated by the projected climate change especially because of the water scarcity caused by rapid melting of the glaciers in the Himalayas and increase in variability in monsoonal rains and frequency of extreme events Furthermore large populations of Bangladesh and other coastal regions may be displaced by sea level rise Thus this volume addresses recommended land use and soil water crop vegetation management practices which would enable land managers to adapt to climate disruption by enhancing soil ecosystem social resilience In addition to biophysical factors this book also addresses the issues related to human dimensions including social ethnical and political considerations

Changing Security Dynamics in East Asia Elena Atanassova-Cornelis, Frans-Paul van der Putten, 2016-04-30 This original and detailed collection explores how regional

actors deal with uncertainties that are inherent to the current geopolitical situation in East Asia The contributors collectively demonstrate that strategic uncertainty has become a major factor in the shaping of the security order in East Asia

Handbook of Asian Security Studies Sumit Ganguly, Andrew Scobell, Joseph Liow, 2009 **Changing Security Dynamic in Eastern Asia** N. S. Sisodia, G. V. C. Naidu, 2005 Proceedings of the 7th Asian Security Conference held at New Delhi in January 2005 Regionalism and Regional Security in South Asia Zahid Shahab Ahmed, 2016-04-08 Zahid Shahab Ahmed evaluates the progress of the South Asian Association for Regional Cooperation SAARC This study goes beyond economic integration to present a detailed appraisal of cooperation under the overarching themes of economic cooperation environmental security human welfare and cooperation in security matters According to the author SAARC is making progress in addressing the myriad of issues on its agenda The transition from agreements to actions and frequent interactions among the member states has boosted confidence The progress of SAARC is more evident in the less controversial areas of human security such as poverty alleviation health and safety human resources development and higher education Notwithstanding enthusiastic commitments reflected in agreements and action plans there is a gulf between rhetoric and implementation most notably in sensitive areas relating to traditional security In the light of the findings of this study the author proposes that greater cooperation in common human security areas has a potential to pave the way for a cooperation on issues of a contentious nature particularly terrorism Human Security and Climate Change in Southeast Asia Lorraine M. Elliott, Mely Caballero Anthony, 2013 This book makes an important and timely contribution to debates about the relationship between climate change and security in Southeast Asia It does so through a human security lens drawing on local and regional expertise to discuss the threats that climate change poses to human security in Southeast Asia and to show how a human security approach draws attention to the importance of adaptation and strategies for social resilience In doing so it exposes the consequences of climate change the impact on community rights and access the special problem of border areas before going on to investigate local and regional strategies for addressing the human security challenges of climate change The water, energy and food-security nexus in Asia and the Pacific UNESCO, 2024-08-06 **International Security Studies and Technology** Tobias T. Gibson, Kurt W. Jefferson, 2024-10-03 International Security Studies and Technology applies an interdisciplinary perspective to the study of emerging technologies and issues related to their development governance laws ethics understanding and mis use considering their impact on international security and established international norms Bringing together a diverse collection of experts Tobias T Gibson and Kurt W Jefferson analyse international security and technology through three conceptual frameworks approaches assessments and frontiers **Environmental Change and Security Project Report** , 1998 *Managing Urbanization, Climate Change and Disasters in South Asia* Ravindra Kumar Srivastava, 2020-07-20 This book offers essential insights into potential catastrophic events that might befall upon the emerging urban landscape in South Asia and which are due to hazards risks and

vulnerabilities inherent in the region's geophysical location as well as due to climate change and unplanned urbanization. It highlights major physiographic, demographic, geological, and geophysical indicators that are responsible for changing the pattern and trend of urbanization in South Asia, a crucial issue in view of emerging threats of climate change and changes in the demographic profile. The book addresses the disaster management scenario in South Asia, manifestations of climate change in the region, and various urban setups under climate change-induced risks. Further, it elaborates on the challenges of urbanization-based risks and vulnerabilities which manifest in the form of slum area growth, piling and littering of waste and filth, new health risks, groundwater contamination, air pollution, highly energy-dependent lifestyles, poverty, socio-economic tensions, etc. It also critically examines the institutional mechanisms for disaster risk reduction (DRR), climate change adaptation, CCA, and urban governance and suggests appropriate changes in the governing structure to mitigate these risks. The book draws the attention of urban planners and policymakers to current shortcomings in the administrative and financial structures of local urban bodies. While outlining climate-associated risks and adaptation strategies in South Asia, it also suggests measures for integrating climate change and urban adaptation with state's planning processes and puts forward a risk alleviation platform to bring the risk managers working in different fields together so that they make concerted efforts to achieve sustainable development. It offers valuable takeaways for researchers, urban planners, those working in industry, consultants, and policymakers.

Maritime Security of India Dr. Suresh R, 2014-02-01 This book focuses on various aspects of maritime security of India. Starting with the changing dimensions of national security, it addresses the issues such as non-traditional threats to security, the threat posed by non-state actors, the causes of insecurity, and also the imperatives of tackling the human security challenges. The need for a comprehensive change in India's security policy is well exposed, and certain policy prescriptions are also given. The oceans are generally meant for better inaction among nations, especially in the era of accelerated pace of globalization. With regard to the coastal security of India, the role of coastal community is significant. The needs for inculcating awareness among the coastal community on coastal security matters, as well as infrastructure development along the coastal area, are also emphasized. It is very important to look into the basic problems of coastal people as they face many human security challenges. When we look into the coastal security, a convergence of the national security concerns and human security concerns is visible. The overall development of the coastal area would lead to better human security, and better human security would result in enlisting the support of the coastal community to ensure national security, especially the coastal security. In short, coastal security is not only about protecting the coastal terrain and territorial waters from direct attacks by the state actors or non-state actors but also safeguarding the interests of all stakeholders.

Climate Security in the Indo-Pacific Mely Caballero-Anthony, Alistair D.B. Cook, 2025-08-14 This book explores the intersection of climate change and security in the Indo-Pacific, from the South China Sea disputes to national and regional security practices in India, Japan, and Southeast Asia, highlighting the vulnerability of countries facing extreme

weather sea level rise and geopolitical tensions The Indo Pacific is the world s most exposed region to natural hazards and climate change is highly likely to impact the frequency and severity of these events threatening people s lives and livelihoods Over the last two decades research into the security implications of climate change has gained considerable interest among scholars and policy analysts across the world Evidence based research has shown how the impact of climate change such as sea level rise long droughts and extreme weather events have led to loss of livelihoods economic downturns forced migration and health threats from emerging infectious diseases The effects of climate change in turn have led to greater potential for conflicts breaking out in societies most affected by climate change As countries in the region face both climate challenges and strategic competition their experiences offer valuable insights into how we can tackle this issue This book is essential reading for students scholars and policymakers engaged in the fields of climate change security studies and international relations The chapters in this book were originally published as a special issue of Third World Quarterly

East and South-East Asia Andrew T. H. Tan, 2013-07-03 The economic growth of East and South East Asia in the context of the global financial crisis has strengthened the view that this region is emerging in the 21st century as the most economically vibrant region in the world With some of the largest economies and generally high economic growth rates compared to the rest of the world it is unsurprising that East and South East Asia has become the subject of global interest East Asia s rise inevitably focuses attention on the issue of China s emergence as a regional and global power Such a prospect challenges the current status quo in which the region is dominated by the USA and its regional allies and issues in Sino US strategic relations have raised global awareness of the need to understand this pivotal region better In addition the Taiwan issue continues to evoke nationalist sentiments in China and North Korea continues to threaten regional stability Non traditional or alternative security issues are also of major importance in the region including natural disasters and epidemics as well as challenges relating to human rights and governance transnational crime demographic issues economics and trade and regionalism This Handbook aims to offer an insight into these issues The volume is divided into two main sections The first International Relations and Security Perspectives will focus on the international relations of the region paying special attention to the key state players The chapter contributions will examine the security perspectives and foreign and defence policies of these states as well as key bilateral relationships The second section will examine key Regional Non traditional Security Issues including globalization transnational health challenges population growth and the environment

Multi-Hazard Early Warning and Disaster Risks Dilanthi Amaratunga, Richard Haigh, Nuwan Dias, 2021-09-11 This book presents a collection of papers under the theme of multi hazard early warning and disaster risks These were selected from the presentations made at the International Symposium on Tsunami and Multi Hazard Risks Early Warning and Community Awareness in supporting implementation of the Sendai Framework for Disaster Risk Reduction 2015 2030 This conference aimed to recognize achievements and to highlight work that still needs to be carried out The conference promoted collaboration among academia research institutions and disaster management offices and further encouraged multidisciplinary and multi sectoral interaction This International Symposium on Multi Hazard Early Warning and Disaster Risk Reduction provided an important opportunity to reflect upon our progress to date in tackling disaster risk but also to consider some of the challenges and opportunities that lay ahead of us A particular focus of this event was Multi Hazard Early Warning During the negotiations for the Sendai Framework countries and partners highlighted the need to

- 1 Continue to invest in develop maintain and strengthen people centred end to end early warning systems
- 2 Promote the application of simple and low cost early warning equipment and facilities
- 3 Broaden the dissemination channels for early warning information to facilitate early action

Countries also called for the further development of and investment in effective nationally compatible regional multi hazard early warning mechanisms To address these needs global Target g of the Sendai Framework was adopted namely to substantially increase the availability of and access to multi hazard early warning systems and disaster risk information and assessments to the people by 2030 As illustrated by recent events in Indonesia it is also vital to address the challenge of cascading hazards that pose a tsunami risk and the importance of linking tsunami early warning to a multi hazard environment However moving towards a multi hazard environment is complex and poses many challenges but can bring significant benefits in terms of efficiencies and also in recognising the links between hazards such as cascading threats We very much hope that this book will provide an important platform to address these and other challenges in addressing disaster risk as well as supporting implementation of the Sendai Framework for Disaster Risk Reduction

Enhancing Food Production System Resilience for Food Security Facing a Changing Environment Liming Ye, Ping Zhu, 2023-11-28 As the dominant source of the human food supply the global land system underlies the foundation of the livelihood and wellbeing of humanity on Earth On the one hand the growth rate in the land system s productive capacity of food has played a key role in global food provision Technological breakthroughs in wheat and rice production during the past few decades for instance have greatly contributed to the maintenance of this growth rate in many parts of the world On the other hand however the terrestrial food production system is facing increasing challenges from environmental stressors ranging from climate change air pollution to land degradation Whether and how the global land system will support the food security of more than 10 billion people in the 21st

century while minimizing its environmental footprint remains an open question to debate It is inevitable that the global food production system has to be shifted from focusing on production expansion to land system resilience so that the dual goals of sustainable production and environmental friendliness can be simultaneously achieved Water Security, Conflict and Cooperation in Peri-Urban South Asia Vishal Narain,Dik Roth,2021-12-09 This open access book explores the implications of urbanization in South Asia for water in security in the peri urban spaces of Dhaka and Khulna in Bangladesh Bengaluru Gurugram Hyderabad Kolkata and Pune in India and Kathmandu Valley in Nepal The book looks into specifically peri urban water security issues in a context of rapid urbanization and social environmental changes including the changing climate and its emerging impacts It demonstrates how urbanization processes change water flows between rural and urban areas the implications of this processes for the water security of peri urban populations and how new institutions and technologies develop to mediate the relationships between peri urban communities and water The book seeks to further the debate on peri urban water security including what constitutes the peri urban socially differentiated access to water in peri urban spaces interventions for improving water access and emerging forms of cooperation and conflict related to water access in a context of urbanization and climate change As such this book is an interesting read for academics with various disciplinary backgrounds professionals working in the worlds of national and international policy NGOs activist groups research and development institutes and individual readers interested in water security and urbanization **Handbook on Water Security** Claudia Pahl-Wostl,Anik Bhaduri,Joyeeta Gupta,2016-01-29 Water security has received increasing attention in the scientific and public policy communities in recent years The Handbook on Water Security is a much needed resource that helps the reader navigate between the differing interpretations of water security It explains the various dimensions of the topic by approaching it both conceptually and thematically as well as in relation to experiences in different regions of the world The international contributors explore the various perspectives on water security to show that it has multiple meanings that cannot easily be reconciled Topics discussed include challenges from human security to consumerism how trade policies can help to achieve water security in a transboundary setting the potential of risk based governance arrangements and the ecology of water security Scholars and postgraduate students in the social sciences working on water related issues will find this book to be of substantial interest It will strongly appeal to policymakers and practitioners looking at the strengths and limitations of water security
