White Shark Michael Bright, 2025-07-29 An adult great white is a big shark really big It has been responsible for more shark bites and human deaths than any other species according to the International Shark Attack File This is probably because it sees us as aberrant marine mammals flailing about in the water and certainly worth an exploratory bite but a gentle mouthing from a two tonne white shark its jaws filled with row upon row of razor sharp teeth could result in a severe mauling for any victim unlucky enough to have attracted its attention Though its danger was well known to ancient mariners it was not until the mid 1970s that it came to occupy its current place in the popular imagination when Jaws was unleashed on an unsuspecting public The great white shark's reputation hit rock bottom in the wake of the Spielberg classic But during the fifty years since the film's first release public interest in the species has sparked a renaissance in research producing remarkable new insights into the life of this extraordinary animal Telling the story of the great white shark from the perspectives of history psychology and biology White Shark is nothing less than the biography of the world's most fascinating fish

The Secret Life of Sharks A. Peter Klimley, 2008-06-17 Marine biologist Pete Klimley swims with the sharks He was one of the first scientists to free dive among sharks and he has spent nearly thirty years studying shark behavior sometimes swimming in schools of several hundred sharks From his firsthand observations he has learned that sharks are not the vicious man eaters that we imagine but fascinating animals with complex behaviors Most people who think of sharks at all think immediately of great white sharks But there are more than four hundred species of shark Dr Klimley has studied several species most notably the great white and the hammerhead He describes the great white as the athlete among sharks and the hammerhead as the Ph D of the shark world In *The Secret Life of Sharks* Dr Klimley reveals the significant discoveries he made about hammerhead navigation and great white eating habits By studying hammerheads gathered around underwater seamounts Dr Klimley learned that hammerheads rely on sophisticated tracking of ocean floor magnetism to navigate His long term study of great white sharks off the California coast demonstrated that these huge sharks prefer to eat seals and sea lions because of the energy contained in their fatty bodies They are selective eaters not the man eaters we expect and they sometimes go weeks between meals But Dr Klimley did observe a ritualized behavior that great whites practice in order to avoid deadly disputes over prey that one shark has captured and another wants Although we have learned a great deal about shark behavior says Dr Klimley there is much that we do not know Unfortunately we are destroying these magnificent creatures of the deep through overfishing and degradation of the oceans Already some populations of sharks have declined steeply Vividly written by one of the foremost authorities on sharks *The Secret Life of Sharks* is a fascinating account of some of the world s most magnificent animals
