Seeding Solutions The Crucible II Group Staff,2001-12 **Seeding Solutions** Crucible II Group,2000 *Seeding solutions* The Crucible II Group,2000 *Seeding Solutions: Options for national laws governing control over genetic resources and biological innovations* Crucible II Group,Dag Hammarskjöld Foundation,International Development Research Centre (Canada),International Plant Genetic Resources Institute,2000 *Seeding Solutions Volume 2 Options for national laws governing control over genetic resources and biological innovations* **IPGRI Thematic Report 2000-2001** International Plant Genetic Resources Institute,2003 **A Guide to Effective Management of Germplasm Collections** Jan Engels,2003 Introduction Context of genebank management Setting objectives for genebanks Considerations for improved conservation and utilization concepts and strategies Genebank management procedures Rationalization of genebank management Economic costs of genebank operations Sharing responsibilities *Bibliography on Access to Plant Genetic Resources and Intellectual Property Rights* , **Drafting Successful Access and Benefit-sharing Contracts** Tomme Rosanne Young,Morten Walløe Tvedt,2017-10-23 In *Drafting Successful Access and Benefit sharing Contracts* Young and Tvedt offer an insightful and profound analysis of how ABS can be made truly functional through the use of legally binding and enforceable contracts Contracts are foreseen as the main legal tool for making access and benefit sharing work thus realizing the third objective of the Convention on Biological Diversity Many years have gone by since contracts were first suggested as a solution to resolve the challenges of ABS but so far few successful benefit sharing cases have been presented This volume explores the possibilities and limits of contract law which both practitioners and stakeholders need in order for ABS contracts to become an effective solution for sustainable use of biological diversity *The Custodians of Biodiversity* Manuel Ruiz,Ronnie Vernooy,2012-03-15 Globally local and indigenous approaches to conserving biodiversity crop improvement and managing precious natural resources are under threat Many communities have to deal with biopiracy for example As well existing laws are usually unsuitable for protecting indigenous and traditional knowledge and for recognizing collective rights such as in cases of participatory plant breeding where farmers researchers and others join forces to improve existing crop varieties or develop new ones based on shared knowledge and resources This book addresses these issues It outlines the national and international policy processes that are currently underway to protect local genetic resources and related traditional knowledge and the challenges these initiatives have faced In particular these themes are addressed within the context of the Convention of Biological Diversity and the International Treaty on Plant Genetic Resources for Food and Agriculture The authors broaden the policy and legal debates beyond the sphere of policy experts to include the knowledge holders themselves These are the custodians of biodiversity farmers herders and fishers in local communities Their experience in sharing access and benefits to genetic resources is shown to be crucial for the development of effective national and international agreements The book presents and analyzes this experience including case studies from China

Seeds and Synergies Yiching Song, Ronnie Vernooy, 2010 For resource poor farmers however such conditions simply don't exist **Differing Diversities** Tony Bennett, 2001-01-01 Cultural diversity in all its forms poses a challenge to traditional cultural policy This report discusses the issues of citizenship and the nature of democratic public policy in culturally diverse societies It takes a comparative international perspective and focuses on ethnic based cultural differences The report considers five policy contexts which have a significant bearing on the general direction of cultural policy and identifies four principles of cultural entitlements based on heterogeneity It recommends a number of steps that the Council of Europe and its member states should take in order to further promote cultural diversity **Intellectual Property Rights**

in Agricultural Biotechnology Frederic H. Erbis, Karim M. Maredia, 2004 During the past twenty five years biotechnology has revolutionized agricultural research The enormous potential together with a landmark decision by the US Supreme Court to allow the patenting of genetically engineered organisms has encouraged private sector companies to invest in research programmes This book first edition in 1998 is now fully revised and updated with five completely new chapters It presents definitive information on intellectual property law in a simplified form **The Politics of Precaution** Robert L. Paarlberg, 2001-09-17 Genetically modified GM food crops have inspired increasing controversy over the past decade By the mid 1990s they were widely grown in the U S Canada and Argentina but precautionary regulations continue to limit their use elsewhere The restrictive policies of Europe and Japan toward GM crops have been much discussed Less attention has been paid to the policies affecting the adoption of GM crops in the developing world where their potential impact on the availability and quality of food is even greater In this book Robert Paarlberg looks at the policy choices regarding GM food made by four important developing countries Kenya Brazil India and China Of these so far only China has approved the planting of GM crops Paarlberg identifies five policy areas in which governments of developing countries can either support or discourage GM crops intellectual property rights biosafety trade food safety and public research and investment He notes that highly cautious biosafety policies have so far been the key reason that Kenya Brazil and India have hesitated to plant GM crops These cautious policies have been strongly reinforced by international market forces and international diplomatic and NGO pressures China has been less cautious toward GM crops in part because there is less opportunity in China for international organizations or independent critics of GM crops to challenge official policy

International Law and Indigenous Knowledge Chidi Oguamanam, 2006-01-01 Discusses the suitability of mainstream forms of intellectual property rights to indigenous knowledge and efforts to reconcile the Western concept of intellectual property with indigenous knowledge Towards a "second Generation" in Environmental Laws in the Asian and Pacific Region Lin Heng Lye, Maria Socorro Z. Manguiat, 2003 Laws in the twentieth century were based on economic growth and development This new century calls for the reassessment of all laws from an environmental perspective in consideration of

such looming environmental concerns as global warming degradation of biodiversity and pollution This book captures some provoking thoughts raised during a symposium on second generation environmental laws held in Japan in 2002 The wide range of articles will promote greater understanding of what has been achieved with the first generation of environmental laws what is needed for the second generation and how to bridge the two

State Agency and the Patenting of Life in International Law Bitu Amani, 2016-12-05 How should a state respond to competing international obligations where the patenting of life is concerned Following the institutionalization of Intellectual Property in the world trading system under the Agreement on Trade Related Aspects of Intellectual Property Rights TRIPS states face differing challenges and restraints on their freedom to develop biopatenting programmes Through a comparative review of patenting in two key but diverging jurisdictions Canada and the US this book considers how states might exercise the right of self determination in their domestic law and policy over biopatenting to promote objectives of human welfare and fair competition Departing from existing studies this timely and important volume offers a pragmatic two step approach to state agency to resolve apparent conflicts between the regulatory options afforded by economic globalization and the need to forge domestic laws that reflect community values In this approach rich and poor countries alike are invited to assert the primacy of human rights in their industrial and cultural policies

Sustainable Development Principles in the Decisions of International Courts and Tribunals Marie-Claire Cordonier Segger, Judge C.G. Weeramantry, 2017-05-08 The 2002 New Delhi Declaration of Principles of International Law relating to Sustainable Development set out seven principles on sustainable development as agreed in treaties and soft law instruments from before the 1992 Rio Earth Summit UNCED to the 2002 Johannesburg World Summit on Sustainable Development to the 2012 Rio UNCSA Recognition of the New Delhi principles is shaping the decisions of dispute settlement bodies with jurisdiction over many subjects the environment human rights trade investment and crime among others This book explores the expanding international jurisprudence incorporating principles of international law on sustainable development Through chapters by respected experts the volume documents the application and interpretation of these principles demonstrating how courts and tribunals are contributing to the world's Sustainable Development Goals by peacefully resolving disputes It charts the evolution of these principles in international law from soft law standards towards recognition as customary law in certain instances assessing key challenges to further judicial consideration of the principles and discussing for instance how their relevance for compliance and disputes related to the 2015 Paris Agreement on climate change The volume provides a unique contribution of great interest to law and policy makers judges academics students civil society and practitioners concerned with sustainable development and the law globally

Indigenous Intellectual Property Rights Mary Riley, 2004 Riley and her group of expert contributors supply a unique set of worldwide case studies and policy analyses as guidance for indigenous communities and their partners in attempting to protect their intellectual property Much of the existing literature already addresses the poor fit between

western regimes of intellectual property rights and the requirements for safeguarding indigenous cultural resources The manuscript gets beyond these negative claims in depicting positive efforts at protecting indigenous knowledge and cultures notwithstanding these legal limitations The reader is exposed to a wide array of legal political organizational and contractual strategies deployed by indigenous groups to protect their intellectual property interests

Global Justice and the Politics of Information Sky Croeser, 2014-09-19 The global social justice movement attempts to build a more equitable democratic and environmentally sustainable world However this book argues that actors involved need to recognise knowledge including scientific and technological systems to a greater extent than they presently do The rise of the Occupy movement the Arab Spring and the Wikileaks controversy has demonstrated that the internet can play an important role in helping people to organise against unjust systems While governments may be able to control individual activists they can no longer control the flow of information However the existence of new information and communications technologies does not in itself guarantee that peoples movements will win out against authoritarian governments or the power of economic elites Drawing on extensive interviews and fieldwork this book illustrates the importance of contributions from local movements around the world to the struggle for global justice Including detailed case studies on opposition to genetically modified crops in the south of India and the digital liberties movement this book is vital reading for anyone trying to understand the changing relationship between science technology and progressive movements around the world This book will be of interest to students and scholars of International Politics Social movements Global Justice and Internet politics

Biological Diversity L. N. Petrov, 2003 One of the cornerstones of life s wonders is the vast array of species filling the planet From plants to animals to humans there is no shortage of beings to provide spice of life variety is said to be Periodically scientists announce the discovery of a new form of life so it seems as if Earth is capable of producing new species just to keep us on our toes At times the immense breadth of living things can even feel overwhelming as one pauses to ponder how numerically insignificant humans are when compared to the insect population Given the biological diversity of the planet it is incumbent upon humans to safeguard the natural beauty of the environment To that end conservation takes on special importance necessitating the balancing of industrial expansion with preserving the flora and fauna surrounding us This book is an important tool in understanding and researching the many different life forms spanning the globe Collected here is a substantial and carefully selected listing of relevant literature on biological diversity and its conservation Following this bibliography are author title and subject indexes to allow for further access to this information The sheer bulk of the works about biological diversity can be so intimidating that a book such as this one becomes useful in sorting through the resources about the importance of life s variety
