Seeds and Sovereignty Jack R. Kloppenburg Jr., 2013-07-21 Seeds for economically important crops are big business indeed As large seed companies continue to improve their product in various ways they make use of the original gene pools of these plants often located in tropical and subtropical areas of the world With increasing recognition that plant germplasm is an important raw material highly charged international disputes have developed over the exchange and use of this material adding another point of contention between poor nations and the manufacturing wealthier ones Twenty experts from several nations representing both the natural and social sciences consider the historical background the issue of patent rights as applied to plant germplasm the nature of global genetic interdependence the internationalization of the seed industry the implications of biotechnology on genetic resources the Third World attitude toward the debate and the viewpoints of the International Agricultural Research Centers

**Endangered Maize** Helen Anne Curry, 2022-01-25 Many people worry that we are losing genetic diversity in the foods we eat Over the past century crop varieties standardized for industrial agriculture have increasingly dominated farm fields Concerned about what this transition means for the future of food scientists farmers and eaters have sought to protect crop plants they consider endangered They have organized high tech genebanks and heritage seed swaps They have combed fields for ancient landraces and sought farmers growing Indigenous varieties Behind this widespread concern for the loss of plant diversity lies another extinction narrative about the survival of farmers themselves a story that is often obscured by urgent calls to collect and preserve Endangered Maize draws on the rich history of corn in Mexico and the United States to trace the motivations behind these hidden extinction stories and show how they shaped the conservation strategies adopted by scientists states and citizens In Endangered Maize historian Helen Anne Curry investigates more than a hundred years of agriculture and conservation practices to understand the tasks that farmers and researchers have considered essential to maintaining crop diversity Through the contours of efforts to preserve diversity in one of the world's most important crops Curry reveals how conservationists forged their methods around expectations of social political and economic transformations that would eliminate diverse communities and cultures In this fascinating study of how cultural narratives shape science Curry argues for new understandings of endangerment and alternative strategies to protect and preserve crop diversity

**Ethnomedicine and Tribal Healing Practices in India** Sunita Reddy, Nemthianngai Guite, Bamdev Subedi, 2023-02-19 This book examines various aspects of ethnomedicine and tribal healing practices including its importance for inclusion and integration from a health systems perspective Tribal healing practices is an understudied component in healthcare system health policy and health systems research The book consists of original research papers based on empirical studies done by anthropologists sociologists public health practitioners and

research scientists in various parts of India. It discusses issues of non codified folk healing with a focus on the therapeutic ideas and practices of tribal communities located in anthropological theory and methods. It has a balance of empirical papers, review and theoretical papers not only explaining what is inside the healing practices but also touching upon the question of why and delving into what should be looking into the possibility to apply it for a larger good i.e. health care for all. This book discusses several important issues related to legitimacy, evidence and efficacy, recognition, certification and integration, protection and preservation, bio piracy and bioprospecting, benefit sharing and intellectual property rights, sustainable use of medicinal herbs and conservation of nature and natural resources, biodiversity and possibilities of mainstreaming tribal healing. It is of interest to students and researchers from medical anthropology, medical sociology, cultural geography, liberal studies, tribal studies, ecology, sustainability and development and public health.

**Governing Agrobiodiversity** Regine Andersen, 2016-04-22. Plant genetic diversity is crucial to the breeding of food crops and is therefore a central precondition for food security. Diverse genetic resources provide the genetic traits required to deal with crop pests and diseases as well as changing climate conditions. Plant genetic diversity is also essential for traditional small scale farming and is therefore an indispensable factor in the fight against poverty. However the diversity of domesticated plant varieties is disappearing at an alarming rate while interest in the commercial use of genetic resources has increased in line with bio technologies followed by demands for intellectual property rights. This important book contributes to our understanding of how international regimes affect the management of plant genetic resources for food and agriculture in developing countries. It identifies entry points to shape a better governance of agrobiodiversity and provides the first comprehensive analysis of how the international agreements pertaining to crop genetic resources affect the management of these vital resources for food security and poverty eradication in developing countries.
