Seis Arquitectos Six Architects

Jorge Glusberg

Seis Arquitectos Six Architects:

Six Architects Seis Arquitectos, 2002 In this extraordinary book we see the work of six Guatemalan architects six creative voices who in an individual or collective form have redefined and given a poetic spatial quality to the contemporary architecture of their country Members of the firm known quite simply as Seis Arquitectos Peter Giesemann Carlos M Lara Raul Minondo Ernesto Porras Rodolfo Solares Rafael Tinoco they are exponents of a style with a minimalist touch and a strong commitment to the value of the abstract the geometrically pure and the spatially rich Without falling into a reductionist posture their design proposals seek a primal purity based on ideas which emphasize that form and space shape and adjust themselves to function without superficial ornamentation nor the utilization of rigid axes nor the imposition of classical orders Guided by a romantic minimalism they give a frank expression to the structure that delineates the different ambits they create giving priority to the light that defines the simple and austere forms of their architecture A passion for light and natural beauty drives them to establish a dialogue between the exterior and interior spaces causing architecture and nature to interact and create areas that are strongly illuminated by direct light or by means of great panes of glass The designs shown here cover a range of expressions from serious and formal buildings for banks offices and stores to private homes and housing developments in which rural and urban living interact The architecture of Seis Arquitectos is an architecture that respects and fits into its particular context recognizing the value of place as the receptacle of cultural traits that complement the configuration of the constructed space In this environment of contemporary art these talented architects have succeeded in expressing themselves conceptually seeking inspiration at times in their nation's Mayan roots at times through volumes with a symbolic value In both cases they have created a sublime architecture that leads us to undertake a silent reflection

Rhetoric of Art Jorge Glusberg,1986 *California. Court of Appeal (1st Appellate District). Records and Briefs* California (State)., Modern Architecture in Mexico City Kathryn E. O'Rourke,2017-02-10 Mexico City became one of the centers of architectural modernism in the Americas in the first half of the twentieth century Invigorated by insights drawn from the first published histories of Mexican colonial architecture which suggested that Mexico possessed a distinctive architecture and culture beginning in the 1920s a new generation of architects created profoundly visual modern buildings intended to convey Mexico s unique cultural character By midcentury these architects and their students had rewritten the country s architectural history and transformed the capital into a metropolis where new buildings that evoked pre conquest colonial and International Style architecture coexisted Through an exploration of schools a university campus a government ministry a workers park and houses for Diego Rivera and Luis Barragan Kathryn O Rourke offers a new interpretation of modern architecture in the Mexican capital showing close links between design evolving understandings of national architectural history folk art and social reform This book demonstrates why creating a distinctively Mexican architecture captivated architects whose work was formally dissimilar and how that concern became central to the profession

Design and Construction of High-performance Homes Franca Trubiano,2013 Both professionals and students are increasingly committed to achieving high performance metrics in the design construction and operation of residential buildings This book responds to this demand by offering a comprehensive guide which features architectural innovations in building skin technologies which make lighter more transparent buildings high performing energy free architectural design principles and advances in building integrated photovoltaics essential engineering principles controls and approaches to simulation for achieving net zero the advantages of integrated design in residential construction and the challenges and opportunities it engenders detailed case studies of innovative homes which have incorporated low

energy design solutions new materials alternative building assemblies digital fabrication integrated engineering systems and operational controls Divided into four parts the book discusses the requisite AEC Architecture Engineering and Construction knowledge needed when building a high performance home It also communicates this information across four case studies which provide the reader with a thorough overview of all aspects to be considered in the design and construction of sustainable homes With contributions from experts in the field the book provides a well rounded and multi faceted approach This book is essential reading for students and professionals in design architecture engineering civil mechanical and electrical construction and energy management Structures and Architecture Paulo J. Cruz,2013-06-27 Although the disciplines of architecture and structural engineering have both experienced their own historical development their interaction has resulted in many fascinating and delightful structures To take this interaction to a higher level there is a need to stimulate the inventive and creative design of architectural structures and to persua *Tensegrity Structures and their Application to Architecture* Valentín Gómez Jáuregui,2020-11-06 Tensegrity structures are really intriguing bars floating in the air without any contact to a solid support attached only by wires to other bars that are also floating in the air The aim of this work is to serve as an introduction to such an atypical kind of structure It tries to explain everything about the controversial origins and polemic fatherhood tensegrities from various fields other than Architecture structural principles characteristics advantages and weakness precedent and current works and patents and finally some new proposals proving that it is possible to find some applications to architectural and engineering purposes In conclusion this work tries to be a guide and reference to a new world of structural possibilities that is blooming and finding its path Key Urban Housing of the Twentieth Century Hilary French,2008-10-28 A collection of housing designs built over the last hundred years illustrating innovative approaches Fourth in the Key series with newly drawn plans suitable for study in architecture schools this volume will appeal to students of urban design and planning as well as architecture Key developments covered include early apartment blocks the projects of European modernism high rise and large scale schemes and postmodernism Exterior and interior photographs show materials massing and context 150 color photographs 500 line drawings **The Spiritual Rococo** GauvinAlexander Bailey,2017-07-05 A groundbreaking approach to Rococo religious d r and spirituality in Europe and South America The Spiritual Rococo addresses three basic conundrums that impede our understanding of eighteenth century aesthetics and culture Why did the Rococo ostensibly the least spiritual style in the pre Modern canon transform into one of the world s most important modes for adorning sacred spaces And why is Rococo still treated as a decadent nemesis of the Enlightenment when the two had fundamental characteristics in common This book seeks to answer these questions by treating Rococo as a global phenomenon for the first time and by exploring its moral and spiritual dimensions through the lens of populist French religious literature of the day a body of work the author calls the Spiritual Rococo and which has never been applied directly to the arts The book traces Rococo s development from France through Central Europe Portugal

Brazil and South America by following a chain of interlocking case studies whether artistic literary or ideological and it also considers the parallel diffusion of the literature of the Spiritual Rococo in these same regions placing particular emphasis on unpublished primary sources such as inventories One of the ultimate goals of this study is to move beyond the cliché of Rococo's frivolity and acknowledge its essential modernity Thoroughly interdisciplinary The Spiritual Rococo not only integrates different art historical fields in novel ways but also interacts with church and social history literary and post colonial studies and anthropology opening up new horizons in these fields **Nueva York: oasis y vitrinas** Ana Morcillo

Pallares, 2021-06-01 Oasis y Vitrinas nos descubre dos ciudades en una Por un lado un Nueva York Oasis en plena euforia constructiva tras la Segunda Guerra Mundial Una ciudad donde la diversidad de usos la sensibilidad social la exquisita sofisticación la supervisión cercana y el continuo mantenimiento son claves a la hora de mantener el vulnerable equilibrio de la vida urbana Por otro lado el texto vuelve la mirada hacia un Nueva York contemporáneo Un Nueva York Vitrina donde la presión del mercado inmobiliario la sobreprotección los intereses privados y políticos la excesiva mercantilización y programación de usos comprometen el carácter cívico del espacio abierto urbano Una lectura que invita a la reflexión sobre el verdadero sentido de la revitalización de lo público entendida en relación con las interacciones que fomenta y que se producen más allá de las intenciones de los autores de los proyectos Una oportunidad que no solo ahonda en la dimensión pública de las obras analizadas sino que pretende arrojar luz al proceso no siempre visible de la elaboración de estas obras en el espacio público quien las propone por qué y a quienes van dirigidas *ZARCH. Journal of interdisciplinary studies in Architecture and Urbanism. nº 6, 2016. Ideas no construidas* Javier Monclús Fraga, 2016-08-17 La arquitectura no construida favorece la idealización Al no existir el objeto final la sugerencia por otros medios abre nuevas vías a interpretaciones que pueden ser incluso más estimulantes que las ideas iniciales En este número de la revista Zarch se quiere hacer hincapié en esas ideas que no se han construido pero que han tenido una fuerza tal que han sobrevivido incluso sin haber llegado a contruirse Clip, Stamp, Fold Beatriz Colomina, 2021-04-29 An explosion of little architectural magazines in the 1960s and 1970s instigated a radical transformation in architectural culture as the magazines acted as a site of innovation and debate Clip Stamp Fold takes stock of seventy little magazines from this period The book brings together a remarkable range of documents and original research which the project has produced during its continuous travels over the last four years starting with the exhibition at the Storefront in November 2006 The book features transcripts from the Small Talks events in which editors and designers were invited to discuss their magazines a stocktaking of over 100 significant issues that tracks the changing density and progression of the little magazine phenomenon transcripts of more than forty interviews with magazine editors and designers from all over the world a selection of magazine facsimiles and a fold out poster that offers a mosaic image of more than 1 200 covers examined during the research Chilean Modern Architecture Since 1950 Fernando Pérez Oyarzun, Rodrigo Pérez de Arce, Horacio Torrent, 2010 Chilean architecture along with that of Sao Paulo and Mexico City sets

a benchmark for the intersection of modernism with vernacular influences in Latin America Culture landscape and the geology of this earthquake prone region have all served as important filters for the practice of post 1950s design in Chile This volume introduces the modern architecture of Chile to readers in the United States Looking primarily at domestic architecture as a lens for studying the larger movement Fernando Perez Oyarzun considers the relationship between theory and practice in Chile As he shows in his chapter during the early 1950s the School of Valparaíso offered the possibility of developing experimental projects accompanied by theoretical statements There visual artists considered poetry the starting point of modern architecture and contributed their radically modern views to the design process of the project Next Rodrigo Perez de Arce examines the material context of architecture in Chile the availability of materials and technologies the frequency of violent earthquakes and related seismic activity and the nation's craft based labor intensive building practices He applies these considerations to a series of case studies to demonstrate how they interact with cultural historical economic and even political influences In the book's final chapter Horacio Torrent reviews the interplay between the architectonic culture and modern shapes that came into sharp focus in the 1950s in Chile In another series of case studies he highlights the formation of a system of concepts thought processes instruments and values that have given Chilean architecture a certain singularity during the last fifty years
